Andras Sóbester

Stratospheric Flight Andras Sóbester, 2011-06-28 In this book, Dr. Andras Sobester reviews the science behind high altitude flight. He takes the reader on a journey that begins with the complex physiological questions involved in taking humans into the death zone. How does the body react to falling ambient pressure? Why is hypoxia (oxygen deficiency associated with low air pressure) so dangerous and why is it so difficult to 'design out' of aircraft, why does it still cause fatalities in the 21st century? What cabin pressures are air passengers and military pilots exposed to and why is the choice of an appropriate range of values such a difficult problem? How do high altitude life support systems work and what happens if they fail? What happens if cabin pressure is lost suddenly or, even worse, slowly and unnoticed? The second part of the book tackles the aeronautical problems of flying in the upper atmosphere. What loads does stratospheric flight place on pressurized cabins at high altitude and why are these difficult to predict? What determines the maximum altitude an aircraft can climb to? What is the 'coffin corner' and how can it be avoided? The history of aviation has seen a handful of airplanes reach altitudes in excess of 70,000 feet - what are the extreme engineering challenges of climbing into the upper stratosphere? Flying high makes very high speeds possible -- what are the practical limits? The key advantage of stratospheric flight is that the aircraft will be 'above the weather' - but is this always the case? Part three of the book investigates

the extreme atmospheric conditions that may be encountered in the upper atmosphere. How high can a storm cell reach and what is it like to fly into one? How frequent is high altitude 'clear air' turbulence, what causes it and what are its effects on aircraft? The stratosphere can be extremely cold - how cold does it have to be before flight becomes unsafe? What happens when an aircraft encounters volcanic ash at high altitude? Very high winds can be encountered at the lower boundary of the stratosphere - what effect do they have on aviation? Finally, part four looks at the extreme limits of stratospheric flight. How high will a winged aircraft will ever be able to fly? What are the ultimate altitude limits of ballooning? What is the greatest altitude that you could still bail out from? And finally, what are the challenges of exploring the stratospheres of other planets and moons? The author discusses these and many other questions, the known knowns, the known unknowns and the potential unknown unknowns of stratospheric flight through a series of notable moments of the recent history of mankind's forays into the upper atmospheres, each of these incidents, accidents or great triumphs illustrating a key aspect of what makes stratospheric flight aviation at the limit.

The John Wayne Filmography Fred Landesman, 2015-08-13 Decades after his death, annual Gallop polls reveal that Marion Morrison is still firmly implanted among the top-ten favorite motion picture celebrities and American heroes. Most of us know this box office star as John Wayne. This

comprehensive volume covers his expansive film career, from 1926 to 1976. Listed in alphabetical order are entries on films such as *Angel and the Badman* and *Noah's Ark* that exemplify the more than 170 films that the actor worked on. Each entry includes the film's date, run time, cast and crew credits, reviews, and a synopsis. Also under each entry is a special section devoted to rare information and interesting details such as where the productions were shot, budgets, costs, salaries, box-office performance, alternate casting and what competition existed for the moviegoer audience. Also included in this reference work are over 650 capsule biographies of the talent that shared the screen with the actor and worked on the productions, and over 800 contemporary reviews and commentary from such diverse sources as *The New York Times*, *Hollywood Reporter*, and *Life Magazine*. There is a series of five helpful Appendices: Appendix A lists films by order of their release dates; Appendix B lists Wayne's fellow actors and colleagues and tells under which entry the relevant capsule biography may be located; Appendix C offers specific review information for the films; Appendix D provides facts on the biggest box office films; and Appendix E details the most popular films on television.

John Wayne Allen Eyles,

Pirates of Pensacola Keith Thomson, 2005-04 The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns

up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

The Hike Don Shaw, 2006 For three grumpy old men, travelling at various speeds in the slow lane of retirement, their chosen method of escape from the modern world is a weekly hike in the Peak District where they can indulge their passion for bickering among themselves. As warm as the wind is cold, as dry as the lashing rain is wet, *The Hike* is a hilarious tale of bum-warmers,

crayfish-fanciers, East German Trabant enthusiasts, bodger philosophers, sticky ginger cake, gorgeous countryside and the subtle art of 'onedownmanship'.

The Hike Don Shaw, 2008 Once more we meet Freddy, Phil and Don - the hilarious, yet deep thinking, tales of three retired men determined to keep hiking to the bitter end in their beloved Peak District - but each for very different reasons...Phil - a former air-traffic controller and the group's self-appointed leader - is on a mission not to grow old. He believes his combination of obsessive physical exercise and the latest health supplements will hold back time. His constant sparring partner is Freddy - a shambolic slacker who prefers to stroll and smell the flowers. Freddy's eternal mission is to find the meaning of life. Until he does, he takes consolation in outmanoeuvring the vulgar, aspirational world around him with his very own art of 'onedownmanship'. Thankfully they have Don to calm the waters. All Don asks for in return is some peace, tranquility and perhaps a decent pint when they reach their destination. What all three share is a withering view of the modern world - a place resounding to the noise of traffic jams and mobile phones. And as they enjoy the peace of their weekly walks, weathering all that the elements and local characters can throw at them, they waste no time in setting that world to rights. Why not join them?
