Robert Loewendick

The Man Who Killed the Deer Frank Waters, 2023-09-05 The story of Martiniano, The Man Who Killed the Deer, is a timeless story of Pueblo Indian sin and redemption, and of the conflict between Indian and white laws; written with a poetically charged beauty of style, a purity of conception, and a thorough understanding of Native American values.

Dead On! Deer Anatomy and Shot Placement for Bow and Gun Hunters. Tracking Techniques for Wounded Whitetails. John Jeanneney, 2010-06

Deer Wars Bob Frye, 2010-11-01 The story of deer management in Pennsylvania is as complex as it is controversial. From the disappearance of deer in Pennsylvania forests at the beginning of the twentieth century to the population explosion that occurred in the latter half of the century, the balance between herd size and a healthy forest has long been a difficult one. In *Deer Wars*, Bob Frye examines this controversy and the effect that herd management has had on all of the citizens of Pennsylvania; farmers managing deer invasions and property rights, hunters dealing with changing herd densities and ever-complex restrictions, state agencies juggling the rights of hunters with the needs of commercial interests, all with stakes in the success and health of the deer herd. Now with deer harvests decreasing, Chronic Wasting Disease becoming a potential threat, and forests showing serious signs of trouble, the need for compromise from all of the players is essential, but is it possible? This well-researched and engrossing book

explores that question.

Deer Hunting P. Dorris, 2020-06-15 The writer has attempted to write this book for every sex and age. It suggests present modes and methods of deer hunting. It also points out certain types of weapons and equipment often used, impact of other animals encountered while deer hunting, changes in deer hunting which have occurred over the years, awards given for great kills, skinning a deer, deer clubs, and other things of interest to most deer hunters. At the end of the book, there will be accounts and pictures of some real fine deer specimens killed by the author over a period of fifty-three years in Arkansas. One thing that is stressed is how important it is to have good buddies and friends to make the world of deer hunting the most enjoyable sport you will ever experience.

Dead Deer Do Tell Tales Judith L. Harpole, 2006 Cathlapotle (45CL1), is a prehistoric-early historic period Chinookan village in southwest Washington. A sample of nearly 1400 mammalian remains from the site was examined and compared with an earlier study of another sample of mammalian remains from the site and with a study of mammalian remains from the adjacent and contemporaneous Meier site. Like the sample studied previously, deer and elk are the most commonly represented taxa, followed by beaver, raccoon, and mountain beaver. Deer and elk dominate the assemblage from Cathlapotle to a greater degree than at Meier, likely because of differences in prey availability, transport, and density-mediated attrition. Unlike what is

documented at other sites in the region, there appears to be no differences in prey selection over time at Cathlapotle based on the sample described here. Study of the complete collection from the site may overturn this conclusion.

Raising Baby Jim MacLachlan, 2021-06-19 Dead deer are an all too common sight on the sides of roads. A startled deer reacts quickly, but the reflexes & instincts which served them well for thousands of years don't work well with cars. The death of a doe can leave an orphaned fawn hidden nearby. Very young ones may starve to death &/or make a meal for a scavenger or predator. If they do wander into sight, they're often hit by another car, but occasionally one defies the odds & survives to be rescued. North-central Maryland in the 1990s was a rural area filled with white-tailed deer. While an orphaned fawn was a sad sight, there weren't any public facilities around for taking care of the situation, so we usually let nature take its course. The times & area were changing, though. Farmers were selling off their land to developers & suburbia was springing up. Some of the hardships we took for

granted were unacceptable to our new neighbors & one couple decided my mother could save a fawn they found. They were right & she went on to raise quite a few. These are their stories...

Deer Hunting in Ohio Robert Loewendick, 2010-09-27 Ohio has nurtured some of

the most celebrated deer-hunting ground in the country, with a deer population of about 650,000 and well over 400,000 sportsmen pursuing them. Muntjac and Water Deer Arnold Cooke, 2019-04-22 Muntjac and water deer were introduced to Britain from East Asia. This book provides a comprehensive overview of their natural history and the management of their environmental impacts. In lowland England, muntjac deer are one of the drivers of changes in woodland structure and species composition, and many of the principles relating to such woodland impact are also applicable to the activities of other species of deer. Interest in environmental impacts of deer is not solely restricted to woodlands. The highest densities of water deer occur in wetlands, where there is potential for conflict, and considerable numbers are also found on agricultural land. Muntjac have also settled in suburbia and frequently cause impacts there. Conservationists and national decision makers are concerned both about invasive alien species and about increasing deer populations. The first section covers the natural history of both species including: breeding biology, deer in the field, colonisation of Britain, a

detailed look at colonisation in a single county, methods for studying deer populations and a review of deer population numbers. The second section covers environmental impact: risk assessment, impact management, control of muntjac, effect of muntjac browsing and grazing, habitat recovery from muntjac impacts and a study on the impacts of water deer. The section concludes with an overview of management and monitoring. The costs and benefits of both species are discussed, and questions asked about whether we are getting on top of problems caused by muntjac (locally and nationally) and will water deer turn out to be similar to muntjac? Attitudes and approaches to these species are changing: with water deer we are actively studying whether it might be an environmental problem, not waiting until after it has obviously become one. What will happen to distribution, numbers, impacts and attitudes in the future? Will water deer ever become a suburban animal? What does the future hold for water deer in China and Korea - and how important is the English population as a global conservation resource?
