Living To 100 Thomas T. Perls, Margery Hutter Silver, With *, John F.

Lauerman, 1999-05-02 Centenarians, once a rarity, are the world's fastest growing age group: there are currently about 50,000 people over 100 in the United States alone, almost three times as many as there were in 1980. Centenarians are setting the gold standard for healthy aging. What can we learn from these pioneers? How can people decades younger apply the centenarians' longevity lessons to their own lives? These are the questions Harvard scientists Thomas Perls and Margery Hutter Silver set out to answer when they launched the New England Centenarian Study. As they probed beyond disease to identify the parameters of an energetic later life, Perls and Silver realized that the key to preserving health and vitality lies not in learning how people stay young, but in understanding how they age well. By identifying lifestyle patterns, vitamins, and medications that contribute to aging well—and may even help slow down the aging process—they show how all of us can maximize the healthy portion of the life-span. Filled with personal profiles, informational sidebars, and quizzes, *Living to 100* offers inspiration and solid scientific information to the more than seventy-five million people alive today who can look forward to their ninth and tenth decades.

Estimation of the Time Since Death Burkhard Madea, 2015-09-08 *Estimation of the Time Since Death* remains the foremost authoritative book on scientifically calculating the estimated time of death postmortem. Building on the success of previous editions which covered the early postmortem period, this new edition also covers the later postmortem

period including putrefactive changes, entomology, and postmortem r

Oxford Textbook of Palliative Medicine Geoffrey Hanks (Deceased),Nathan I. Cherny,Nicholas A. Machine learning in data analysis for stroke/endovascular therapy Benjamin Yim,Shahram Majidi,Daniel Donoho,Andrew Gauden,2023-09-05 With an estimated global incidence of 11 million patients per year, research involving ischemic stroke requires the collection and analysis of massive data sets affected by innumerable variables. Landmark studies that have historically shaped the foundation of our understanding of ischemic stroke and the development of management protocols have been derived from only a miniscule fraction of a percent of the entire population due to feasibility and capability. Machine learning provides an opportunity to capture data from an extraordinarily larger cohort size, which can be applied to training models to formulate algorithms to forecast outcomes with unparalleled accuracy and efficiency. The paradigm-shifting integration of machine learning in other industries, i.e. robotics, finance, and marketing, foreshadows its inevitable application to large population-based clinical research and practice. While prior

multi-center studies have relied heavily on catalogued datasets requiring substantial manpower, the recent development of modern statistical methods can potentially expand the available quantity and quality of clinical data. In conjunction with data mining, machine learning has allowed automated extraction of clinical information from imaging, surgical videos, and electronic medical records to identify previously unseen patterns and create prediction models. Recently, its use in real-time detection of large vessel occlusion has streamlined health care delivery to a level of efficiency previously unmatched. The application of machine learning in ischemic stroke research – data acquisition, image evaluation, and prediction models – has the potential to reduce human error and increase reproducibility, accuracy, and precision with an unprecedented degree of power. However, one of the challenges with this integration remains the methods in which machine learning is utilized. Given the novelty of machine learning in clinical research, there remains significant variations in the application of machine learning tools and algorithms. The focus of the research topic is to provide a platform to compare the merits of various learning approaches – supervised, semi-supervised, unsupervised, self-learning – and the performances of various models.

Gastrointestinal Emergencies Autumn Graham, David J. Carlberg, 2019-02-05 This book answers key questions asked by emergency clinicians faced with complex gastrointestinal and abdominal pain presentations. Instead of a traditional format that includes epidemiology, pathophysiology, diagnosis, and treatment options, this book takes an approach that mirrors the way clinicians interact with patients – by asking and answering specific clinical care questions. The book is organized into sections by presentation –

gastrointestinal bleeding, for example – each of which contains chapters on specific questions, such as “What is the best clinical risk score for low risk GIB patients?” Each clinical question comes with a detailed, evidence-based response and a summary that gives best practices, recommendations, and references. Additionally, at the end of each section is a chapter titled “Expert Corner,” which asks the same clinical questions to a surgical or gastrointestinal specialist and includes key pearls these experts have for emergency medicine practitioners. *Gastrointestinal Emergencies: Evidence-Based Answers to Key Clinical Questions* is an essential guide for emergency medicine physicians, residents, and medical students who want to review and improve their care of acute gastrointestinal emergencies.

Advances in Intelligent Information Hiding and Multimedia Signal Processing Jeng-Shyang Pan, Jianpo Li, Keun Ho Ryu, Zhenyu Meng, Aleksandra Klasnja-Milicevic, 2021-04-20 This book presents selected papers from the Sixteenth International Conference on Intelligent Information Hiding and Multimedia Signal Processing, in conjunction with the Thirteenth International Conference on Frontiers of Information Technology, Applications and Tools, held on November 5–7, 2020, in Ho Chi Minh City, Vietnam. It is divided into two volumes and discusses the latest research outcomes in the field of Information Technology (IT) including information hiding, multimedia signal processing, big data, data mining, bioinformatics, database, industrial and Internet of things, and their applications.

Lifestyle Psychiatry: Investigating Health Behaviours for Mental Well-Being Joseph Firth, Philip B. Ward, Brendon Stubbs, 2019-10-18 Recent years have seen a substantial increase in both academic and clinical interest around how ‘lifestyle

behaviors', such as exercise, sleep and diet, can influence mental health. The aim of this Research Topic is to produce a novel body of work contributing towards the field of 'Lifestyle Psychiatry'; i.e. the use of lifestyle interventions in the treatment of mental disorders. In this way, the Research Topic aims to (a) present important 'behavioral targets' for lifestyle modification in public health and/or clinical settings, and (b) examine the efficacy and implementation of lifestyle interventions for people with mental health conditions. Collectively, this research presented within this Research Topic can increase understanding and inform evidence-based practice of 'Lifestyle Psychiatry', while providing clear directions for future research required to take the field forward.

Liver Transplantation, An Issue of Clinics in Liver Disease, E-Book David Goldberg, 2020-11-24 With collaboration from Consulting Editor, Dr. Norman Gitlin Dr. Goldberg has assembled a state-of-the-art issue devoted to management of liver transplant patients. Expert authors have contributed current clinical reviews that covers the breadth of the pre- and post-surgical journey. Articles are specifically devoted to the following topics: Obesity management of liver transplant waitlist candidates and recipients; Expanding the limits of liver transplantation for hepatocellular carcinoma: Is there a limit; Frailty and sarcopenia in patients pre- and post-liver transplant; Achieving tolerance in liver transplantation: Where are we now and what does the future hold; Expanding role of donation after cardiac death donors; Optimizing selection of patients for simultaneous liver-kidney transplant; Keeping the patient with end-stage liver disease alive while awaiting transplant; Management of complications of portal hypertension; Expanding donor selection and recipient indications for living donor liver transplantation; The

changing liver transplant recipient: From hepatitis C to NASH and alcohol; Cardiovascular risk stratification in liver transplant candidates; The role of machine perfusion in liver transplantation: Warm, Cold, or does it not matter; Paradigm shift in utilization of livers from hepatitis C-viremic donors into HCV-negative patients; Transplantation of elderly patients: Is there an upper age cutoff; Transplantation for acute alcoholic hepatitis: Controversies and early successes. Hepatologists will come away with the information they need to improve outcomes in liver transplant patients.

Lipids, An Issue of Endocrinology and Metabolism Clinics of North America, Donald A. Smith, 2014-12-26 This issue of Endocrinology and Metabolism Clinics, devoted to Lipids, is edited by Dr. Donald A. Smith. Articles in this issue include: Advanced Lipoprotein Testing; Improving Cardiovascular Risk Assessment: Coronary calcium score and CT coronary imaging; Understanding HDL; Statin Strategies for Maximizing Public Health: benefits and harms; Cellular Cholesterol Regulation: SREBP and miRNA; Mediterranean Diet – the best diet for CV protection?; Pediatric Lipidology: An Earlier Approach; Newer LDL-lowering Therapies; and Statin Combination Therapies.

Health Expectancy Jean-Marie Robine, 1992 The International Network for Research in the Interpretation of Healthy life Expectancy Data held its first meeting in Quebec in September 1989. This book gathers together and confronts the various studies devoted to disability-free expectancy carried out since 1988 and summarized the earlier studies presented and discussed at the Quebec meeting. Divided into three parts it deals with: the

initial studies (1964-1976); the empirical approach of the early 80s (1979-1983); and the beginning of the scientific approach (1983-1987) which is expended by current research.

Valvular Heart Disease Robert O. Bonow, 2020-06-10 Covering the full range of diagnosis and treatment for valvular heart disease, this award-winning reference provides the information you need for safe and effective practice. Part of the Braunwald's family of heart disease references, Valvular Heart Disease, 5th Edition, brings you fully up to date with the latest procedures, imaging modalities, basic science, diagnostic criteria, and treatment guidelines in this fast-changing area. Internationally renowned authors Dr. Catherine M. Otto and Dr. Robert O. Bonow help you apply today's best, evidence-based medical and surgical approaches in your daily practice. Covers current topics such as transcatheter aortic valve replacement (TAVR), timing of intervention for mitral regurgitation, imaging guidance of transcatheter valve procedures, management of prosthetic valve, advanced imaging of the aortic and mitral valves, management of valve disease in pregnant women, and advances in diagnosis and treatment of endocarditis. Contains new chapters on the imaging approach before TAVR, transcatheter valve-in-valve implantation for prosthetic valve stenosis, and management of pulmonic valve disease. Provides summaries of ACC, AHA, and ESC guidelines for guidance on best practices. Includes all the latest imaging modalities for a full understanding of tools needed for the most accurate physiologic understanding and accurate diagnoses. Offers access to 80 videos that help you visualize heart valve anatomy and dysfunction, as well as important techniques and procedures. Features an extensive number of new and updated illustrations of anatomy and physiology, methodology, flow charts, and clinical

examples—750 high-quality images in all. Reorganizes chapters to closely link imaging and interventional approaches for aortic and mitral valve disease. Emphasizes evidence-based approaches with outcome data and relevant references. 2014 BMA Medical Book Awards 1st Prize Award Winner in Cardiology category.

An Analysis of Human Behaviour in the Face of Imminent Death in Two Short Stories ,2022-09-29 Pre-University Paper from the year 2021 in the subject English Language and Literature Studies - Literature, grade: 15, , course:

Wissenschaftspropädeutischen Seminars, language: English, abstract: The intention of this term paper is to describe human behavior in the face of imminent death in general and, based on this topic, to analyze and compare it by using two short stories. The first story, *The Last Night of the World* by Ray Bradbury, deals with the simultaneous death of all people on the same day. All adults seem to have had the same dream that the world would end on this night. The story is about a couple and how they spend their final evening together. It specifically expresses their behavior and thoughts in their probably last hours. The second story, *The Knowers* by Helen Phillips, is about the prediction of the exact date of someone's death. The author describes a couple with very different opinions on whether they want to know their personal date. Against her husband's wish, the wife decides to learn her date of death and only reveals the day and month to him, but not the year. The behavior, thoughts, and feelings of the characters during the years until the expected date are described precisely. Both short stories are primarily concerned with how the characters behave after knowing the exact date of their deaths. There are many similarities, but also some differences, which are compared after the analysis of each

individual story.

Prognosis of Neurological Diseases Angelo Sghirlanzoni, Giuseppe Lauria, Luisa Chiapparini, 2015-11-19 This book offers clear, detailed guidance on all aspects of prognostic evaluation in patients who have been involved in a serious accident with neurological consequences or have been diagnosed with a severe neurological illness. It covers the full range of disorders of the central and the peripheral nervous system, not only providing very accurate prognostic estimates but also addressing relevant clinical issues, differential diagnosis, and the role of imaging. The book is practically oriented and designed for use on a daily basis when assessing prognosis and discussing the outcome with patients, their families, and other interested parties. It will support patient-doctor partnerships by ensuring that the most professional answers can be given to patients' and doctors' questions and by promoting realistic expectations of the effect of medical interventions. In addition, it will enable doctors, lawyers, and other professionals to understand relevant issues when an estimate of prognosis and life expectancy is the subject of legal dispute.

Ischemic Heart Disease Giovanni Concistrè, 2023-04-16 This book describes the different aspects of ischemic heart disease, one of the leading causes of death in industrialized countries, and whose growing prevalence represents a major challenge in terms of short- and long-term management and surveillance. This volume offers a comprehensive discussion of the state-of-the-art diagnostic imaging options, of disease risk stratification, selection of candidates for surgical intervention, percutaneous revascularization, mechanical assist devices implantation. Recently, the morbidity and

mortality of ischaemic heart disease have substantially improved because of the progress in therapeutic strategies, represented by the dramatic evolution of percutaneous coronary interventions, that are carefully described in the volume, together with all the other most recent treatment options: from medical therapy to conventional surgery, minimally invasive surgery, surgery of ischemic complications. The biggest challenge in the next years is, however, to reduce the incidence of coronary artery disease worldwide. This highly illustrated, case oriented reference book is aimed at cardiology fellows in training, while also helpful to surgeons, cardiologists, imaging specialists, interventional cardiologists, as well as other clinicians and students involved in the diagnosis and treatment of ischemic disease.

Cardiothoracic Critical Care E-Book David Sidebotham, Andrew McKee, Michael Gillham, Jerrold Levy, 2007-09-12 This new bedside manual guides you through all the practical aspects of managing patients following cardiothoracic surgery and critically ill cardiology patients. Primarily designed to use in cardiothoracic intensive care units and coronary care units, it covers the perioperative management for the full range of cardiothoracic surgical procedures, the management of complications, and related issues. Core topics in cardiothoracic critical care, such as hemodynamic instability, arrhythmias, bleeding, and mechanical cardiac support, are afforded broad coverage. Also included are sections on advanced ventilatory techniques and veno-venous ECMO for treating severe respiratory failure, as well as nutritional support, treating and preventing infection, renal failure, and care of the dying patient. Concisely written and featuring liberal use of illustrations as well as an integrated, tightly edited style, and a limited number of key

references, this volume will become your reference of choice for the care of of cardiothoracic surgery patients and critically ill cardiology patients. Find information quickly with concisely written text. Get a more complete picture with extensive illustrations. Focus on just the information you need using a a limited number of key references. Navigate the complexities of critical care for a full range of cardiothoracic surgery patients with in-depth coverage of perioperative care, management of complications, and more.

Mechanical Circulatory Support David L. Joyce, Lyle D. Joyce, 2020-01-03 Mechanical Circulatory Support: Principles and Applications offers innovative approaches to complex clinical scenarios and represents the current state-of-the-art for managing patients on mechanical circulatory support devices. Topics are presented in a concise fashion, making it a practical resource for care givers who need a user's manual in the heat of the moment during patient care as well as a reference for a better understanding of the unique components of every device available for human use. This book provides a comprehensive, up-to-date analysis of the most relevant issues facing health care providers in the management of advanced heart failure. With content that features patient selection strategies, implantation techniques, device specific considerations, and management of clinical challenges in the post-operative setting, this textbook offers evidence-based answers to the complex questions facing nurses, perfusionists, advanced practice providers, and physicians.
