Employment Deconcentration in European Metropolitan Areas Eran Razin, Martin Dijst, Carmen Vázquez, 2007-09-06 This book provides a comparative perspective on employment deconcentration within selected European metropolitan areas. The book introduces a comparative framework, followed by eight chapter-length case studies: three based in northern Europe, three in the south European-Mediterranean region and two in post-Communist central Europe. Most chapters examine two metropolitan areas, usually a large and a smaller one. The comparison reveals considerable variations in the magnitude, form, and process of employment deconcentration.

Social Sector in a Decentralized Economy Pinaki Chakraborty, Lekha Chakraborty, Anit Mukherjee, 2016-03-11 This book is an analytical examination of financing and public service delivery challenges in a decentralized framework. It also provides critical insights into the effectiveness of public expenditure, through benefit incidence analysis of education and healthcare services in India. The benefits of decentralization always come with conflicts and trade-offs. By unpacking the process of decentralization, the authors identify that 'unfunded mandates', arising from the asymmetry

between finances and functions at local levels, are a major challenge. The analysis is carried out by distilling the existing studies in this area, and through an empirical investigation of public finance data at different public sector levels in India, as well as in some selected developing countries. Using the household survey statistics of consumption expenditure, an analysis of utilization or benefit incidence of public spending on social sectors in India is achieved, covering education and health sectors. This title is available as Open Access on Cambridge Core.

Decentralization and Infrastructure in the Global Economy Jonas Frank, Jorge Martinez-Vazquez, 2015-07-03 The subnational dimension of infrastructure has emerged as one of the greatest challenges in contemporary public finance policy and management. Ensuring the efficient provision of infrastructure represents a challenge for all countries irrespective of their level of centralization or decentralization. This book proposes an innovative approach for the strengthening of decentralized public investment and infrastructure management. *Decentralization and Infrastructure in the Global Economy: From Gaps to Solutions* covers the most important aspects of infrastructure investment in a decentralized setting. It discusses infrastructure gaps and the quality of subnational spending; how functional responsibilities, financing and equalization can be designed; sector-specific arrangements in high expenditure areas, such as health, education and roads; key steps of the public investment cycle and management; and

analyses the political economy and corruption challenges that typically accompany decentralized infrastructure projects. This book challenges some of the well-accepted principles of intergovernmental fiscal relations and will be useful to researchers and practitioners of public finance policy and management.

Decentralization In Mexico Victoria

Rodriguez,2018-05-04 This book assesses the impact of decentralization on Mexico's intergovernmental relations and examines the constraints upon the devolution of political power from the center to the lower levels of government. It also discusses the distribution of power and authority to governments of opposition parties within the context of a more open political space. Victoria Rodríguez uncovers a new paradox in the Mexican political system: retaining power by giving it away. She argues that since the de la Madrid presidency (1982–1988), the Mexican government has embarked upon a major effort of political and administrative decentralization as a means to increase its hold on power. That effort continued under Salinas, but paradoxically led to further centralization. However, since Zedillo assumed the presidency, it has become increasingly clear that the survival of the ruling party and, indeed, the viability of his own government require a genuine, de facto reduction of centralism.

Decentralisation in Africa Gordon

Crawford,Christof Hartmann,2008 'Decentralisation in Afrika' is een sobere beoordeling van wat decentralisatie precies kan bereiken.
Decentralisatie van overheden in Afrikaanse landen

en elders in de derde wereld krijgt de laatste tijd een impuls, vaak gedreven door Multilaterale en bilaterale instanties (de 'donoren'). Maar worden de voordelen hiervan wel gerealiseerd? In dit boek worden vraagtekens gezet bij de kwestie of decentralisatie wel een gunstige uitweg biedt voor de armoede en het conflict in Afrika.

Policy Reform for Sustainable Development in the

Caribbean Michele Garrity, Louis A. Picard, 1996 The

Caribbean countries, and many other Third World countries in Latin America, Asia and Africa, have been under the yoke of structural adjustment measures for more than a decade. Numerous studies have addressed the inequality of North-South relations, the lack of transparency in negotiations that have led to the signature of agreements, the absence of a clear definition of responsibilities of the parties engaged, the inadequacy and inadaptation of policies with regard to the socio-cultural context, and especially the refusal to take into account the social demands of the most deprived. The criticisms formulated in this book can only find a beginning of solutions by the setting up of a solid administrative organization in which the public officials are made accountable and who, once aware of the national and international stakes, can confront the constraints involved in State/international negotiation relations. The book is a very rich presentation of the concept and the problems of structural adjustment and institutional development in the developing

countries. Beside the impressive introduction and the convincing conclusion, the articles on these prerequisites for institutional sustainability present the most important empirical research results. The contents is a clear description of problems, failures and results in institutional reforms.

Micro- and Macrodata of Firms Silvia

Biffignandi, 2013-03-08 In industrial countries there is a strong interest in the international comparison of business data regarding productivity efficiency and competitiveness. This volume presents methods for the statistical analysis of micro- and macrodata of firms and for an international comparison of the aggregates. Case studies referring to specific countries play an important role for the development of economic hypotheses that should be tested at the international level.

Pêche thonière et dispositifs de concentration de poissons Patrice Antenne Cayré, Marc Taquet, 2000 The international symposium Tuna fishing and fish aggregating devices, October 1999, in Martinique, takes stock of the exploitation of large pelagic fish around FADs, based on regional synthesis for the three oceans and the Mediterranean Sea. Main themes include technology, fishing methods, impact on resources, biology of fish aggregation, anthropology and economic aspects of FAD exploitation.

Decentralizing Health Services Krishna

Regmi, 2013-11-19 Decentralizing Health Services A Global Perspective Krishna Regmi, editor Current economic, demographic, and environmental shifts

are presenting major challenges to health care systems around the world. In response, decentralization--the transfer of control from central to local authorities--is emerging as a successful means of meeting these challenges and reducing inequities of care. But as with health care itself, one size does not fit all, and care systems must be responsive to global reality as well as local demand. *Decentralizing Health Services* explores a variety of applications of decentralization to health care delivery in both the developing and developed worlds. Outfitted with principles, blueprints, and examples, this ambitious text clearly sets out the potential role of decentralized care as a major player in public health. Its models of service delivery illustrate care that is effective, inclusive, flexible, and in tune with the current era of preventive and evidence-based healthcare . Contributors point out opportunities, caveats, and controversies as they: Clarify the relationships among decentralization, politics, and policy Differentiate between political, fiscal, and administrative decentralization in health care systems Consider public/private partnerships in health systems Explain how the effects of decentralization can be evaluated. Present the newest data on the health outcomes of decentralization Explore some challenges and global issues of health systems in the 21st century And each chapter features learning goals, discussion questions, activities, and recommendations for further reading *Heralding changes poised to revolutionize care, Decentralizing Health Services* will broaden the

horizons of researchers and administrators in health services, health economics, and health policy

Based on 0 rating(s) Title Revitalized agriculture for balanced growth and resilient livelihoods Center for Economic and Social Development (CESD), International Food Policy Research Institute (IFPRI), Michigan State University, 2016-09-20 The purpose of this report is to provide national- and state-level policymakers, private-sector investors, civil society, and donors with an analysis of the rural economy of Mon State and pathways to improved prosperity for its population. The analysis is based on a representative survey of rural households, which make up 73 percent of Mon State's 2 million residents, and extensive interviews with farmers, traders, processors, local leaders, and government officials. Whereas some parts of the Mon State economy are quite dynamic, such as construction, others are stagnant and far from reaching their full potential. Furthermore, the dynamic sectors are heavily dependent on remittances from migrants to neighboring countries. The current pattern of donor investment is heavily focused on necessary infrastructure and energy investments, but with only very limited support to productive sectors, especially agriculture and fisheries. Major investments in education, both formal and vocational training, are also necessary to support the growth of a modern economy. The analysis in this report identifies options for more balanced growth, leading to a vibrant economy in which

returning migrants can invest and find employment.

French Musical Life Katharine Ellis, 2021

Explicitly or not, the historical musicology of post-Revolutionary France has focused on Paris as a proxy for the rest of the country. This distorting lens is the legacy of political and

cultural struggle during the long nineteenth century, indicating a French Revolution unresolved both then and now. In light of the capital's power as the seat of a centralizing French state (which provincials found 'colonizing') and as a cosmopolitan musical crossroads of nineteenth-century Europe, the struggles inherent in creating sustainable musical cultures outside Paris, and in composing local and regionalist music, are ripe for analysis. Replacement of 'France' with Paris has encouraged normative history-writing articulated by the capital's opera and concert life. Regional practices have been ignored, disparaged or treated piecemeal. This book is a study of French musical centralization and its discontents during the period leading up to and beyond the provincial awakening of the Belle Époque. The book explains how different kinds of artistic decentralization and regionalism were hard won (or not) across a politically turbulent century from the 1830s to World War II. In doing so it redraws the historical map of musical power relations in mainland France. Based on work in over 70 archives, chapters on conservatoires, concert life, stage music, folk music and composition reveal how tensions of State and locality played out differently depending on the structures and funding mechanisms in place, the musical priorities of different communities, and the presence or absence of galvanizing musicians. Progressively, the book shifts from musical contexts to musical content, exploring the pressure point of folk music and its translation into local color for officials who perpetually

feared national division. Control over composition on the one hand, and the emotional intensity of folk-based musical experience on the other, emerges as a matter of consistent official praxis. In terms of French music and its compositional styles, what results is a surprising new historiography of French neoclassicism, bound into and growing out of a study of diversity and its limits in daily musical life.

The Impact of COVID on Cities and Regions Peter K. Kresl, Mattia Bertin, 2023-10-06 The recent COVID-19 pandemic has arguably caused some of the most noticeable and influential societal and economic changes since World War Two. This path-breaking book investigates these changes and the subsequent responses of urban policy makers.

Suburbs under Siege Charles M. Haar, 2014-07-14 In *Suburbs under Siege* Charles Haar argues passionately that all people--rich or poor, black or white--have a constitutional right to live in the suburbs and that a socially responsible judiciary should vigorously uphold that right. For various reasons, American courts have generally failed to question local zoning regulations that trap the urban poor in the squalor of inner cities, away from decent housing and jobs in the suburbs. No U.S. Supreme Court case, for instance, has confronted exclusionary zoning rules, as *Brown v. Board of Education* once attacked school segregation. Instead, judges at all levels have most often reinforced the residential segregation that may well destroy American society. In this provocative book on the landmark Mount Laurel cases, Haar shows how the N.J. state judiciary

broke out of this pattern of judicial behavior. These courageous, innovative judges attracted nationwide attention by challenging the forces of affluence that ruled the suburbs (and the legislature) of their state. Furthermore, they based their reasoning on the N.J. state constitution in order to protect their rulings from invalidation by the U.S. Supreme Court. In the early 1970s, when the cases began, the plaintiffs, Ethel Lawrence and her daughter Thomasene, were barely making ends meet in the Philadelphia suburb of Mount Laurel, a town where their African-American ancestors had lived for seven generations. The Lawrences' dream was to live in a Mount Laurel garden apartment planned by a grassroots reform group as affordable housing: in their way stood a typical minimum acreage zoning ordinance. The eventual court victory of the Lawrences and their young public interest attorneys inspired other N.J. suits and a process of remediation that continues to this day, as judges, experts (special masters), the state legislature, and other citizens work to carry out the Mount Laurel principles. Haar's book is a bold attack on conventional doctrines of the separation of powers limitations on the judicial branch and a plea that judges across the country assume their proper responsibilities for fair housing before it is too late.
