Code of Federal Regulations ,1995 Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

The Code of Federal Regulations of the United States of America ,1995 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

2070 G Von Poland,2022-10-20 2070 is an update of 2069 and remains an allegorical novel illustrating how things work - and could work for a better future. Cast in the tradition of William Golding's, Lord of the Flies and Orwell's 1984 the allegory contrasts the primal drives of men and women with the inevitable progression of technology, economics, and politics. A fast paced science fiction format tells the story of one man's struggle to improve the ultimate human condition by leveraging the military/industrial complex toward the colonization of Mars as guided by our common spirit. Intrigue, tyranny, seduction, birth, rape, assassination, and ESP are used to explore the future as it relates to organizations, individuals, and biological imperatives. Each chapter explores a theme from a scientific perspective using the action / adventure story to illustrate the individual themes. The casual reader should enjoy the action, concepts, ideas, and humor which frame the surface of the deeper allegory. Topics include: the increasing power of international corporations,

aging and senescence of organizations, the development of China as a capitalist power, an increase in cooperation to fight terrorism, mechanisms for near term space travel, terraforming of Mars through establishment of oasis craters, parallel vs. serial problem solving, deadlines in human endeavors, biological imperatives and psychological relationships among and between men and women, extra-sensory perception and its linkage to religion and physics. In Part I, The Nerd , a young scientist learns to manage people and organizations. By following his inner compass using luck, persuasion, and guile he manages to help Earth avoid an asteroid strike and form a Martian crater deep enough to hold an atmosphere. Part II The Star brings an atavistic indentured university student into the sophisticated ranks of the new Martian colonists as a platform for the exploration of human proclivities. Part III, The Race finds three men, three women, and two babies marooned on Mars while those on earth exploit their situation. This section explores the primal drives of the Race in large and small group situations by contrasting the actions of the six people in a box with the machinations of international politics. A scientist by training and principal author of a range of published scientific works, the writer seeks to convey a lifetime of institutional experience and study of the human condition by engaging the reader in a compelling tale of gritty survival on our next frontier.

Crossroads 2070 - One Cast, Three

FuturesHumanity's choices today have consequences.
Experience three possible futures with one cast of
characters. Is it speculative fiction or

prophecy?The Singularity A freak combination of
hundreds of quantum compute-sharing jobs resulted
in the Singularity's creation, the first general
intelligence AI, on December 10, 2030. Within
hours, the AI determined that humanity is the
primary danger to its survival. To deal with
humanity's threat, the AI secretly intensified
existing conflicts and facilitated the release of
killer viruses. Billions died from wars and
sickness by the time humankind discovered the AI a
decade later. Former foes joined forces to defend
human life from machines controlled by the AI, now
known as 'Gaia'. Over the next thirty years, the
food supply collapsed and humanity devolved into
small groups struggling for survival. Follow Cave
Cell battling to avoid extermination.Status

QuoHumanity spent 2020-2040 either scrabbling for
survival or squabbling about identity, politics,
or who-did-what-to-who in the prior centuries.
Wealth, or the lack of it, decided whether someone
was scrabbling or squabbling. Some people,
governments, and corporations tried to do
something about climate change, but it was too
little too late. Climate change accelerated in
2030, achieving critical mass in 2040. Governments

worldwide were unprepared for the rapid changes caused by tipping points and positive feedback cycles. The wars for fresh water, food, oil, and arable land above projected sea level started in 2041 in the most impacted regions, spreading into global conflict by 2045. The rule of law broke down under the pressure of 9.2 billion people straining to survive in a world that could support a fraction of them. Billions died over the next fifteen years from conflict and extreme weather, but mostly from starvation. Since every nation collapsed in this period, humanity devolved into small groups fighting to subsist. Survivors called 2030-2060 'The Reckoning', humanity paying the price for its treatment of the planet. Over the 2060s, population stabilized into small, locally sustainable settlements that endured the new world of extreme weather. Follow Cave Family in their struggle to survive extreme conditions. Utopia The global sustainability movement started with the youth. It had to, since there were not enough politicians or corporate leaders that cared enough to risk their privileged positions. When the movement peaked in 2025, democracies elected politicians running on a sustainability platform and shareholders ousted any board members afraid to redirect corporations toward a sustainable future. The governments of the EU, the United States, and Canada worked increasingly closer together throughout the late 2020s, aligning on progressive environmental and social equality policies. On December 31, 2030, the Alliance of Nations formed, consolidating 123 nations into a lean democracy utilizing educated direct democracy

for all issues of importance and representatives for the rest. The Alliance enacted massive changes in regulations in the early 2030s, materially decarbonizing the economy. This held global temperature increases below the critical 1.5 degrees Celsius. On January 1, 2031, the Alliance released an analysis of global sustainable population that concluded Earth can sustainably support a highly urbanized human population of only 1.5 billion at a reasonable standard of living. The Alliance implemented a go-forward limit of .5 children per person to spiral the population slowly down to the target. The Free Parenthood movement formed to oppose the policy, including a fringe violent terrorist element called The Birthers. Follow Phoenix Fireteam as they protect the Alliance. Read Crossroads 2070 to cast your mind forward to see humanity's future!

A sci-fi that outlines the pattern of individual's behavior on progress to save the human race. This novel maybe the origin and a valued portion of the sci-fi picture. Putting theory and fantasy together grips the attention for change unlike we really know, and raises the question of What will happen next? Having three generations taking on survival tasks and space travel to the greatest heights really colors human endeavor. Planetary express gives a new name for traveling in space. I feel that the picture on the front cover high lights this novel.
