World Painting Index Patricia Pate Havlice,1982 This supplement indexes an additional 616 art books and catalogs published between 1974 and 1980, following the format of the base volume. Works by less known Western painters, women, and Third World artists are included to a greater degree than in the original volumes, a reflection of the changing emphasis in publishing and gallery space allotments.

Coniferous Forests F.A. Andersson,2005-12-15 Starting with an account of the history and distribution of the conifers, this volume describes the most important areas in Asia, Europe, North and South America with conifer forests. The last in the Ecosystem of the World series, it deals with the functional aspects of the conifer forests, such as physiology, production, biomass, and more.

The Economics of Artificial Intelligence Ajay Agrawal,Joshua Gans,Avi Goldfarb,Catherine Tucker,2024-03-05 A timely investigation of the potential economic effects, both realized and unrealized, of artificial intelligence within the United States healthcare system. In sweeping conversations about the impact of artificial intelligence on many sectors of the economy, healthcare has received relatively little attention. Yet it seems unlikely that an industry that represents nearly one-fifth of the economy could escape the efficiency and cost-driven disruptions of AI. The Economics of Artificial Intelligence:

Health Care Challenges brings together contributions from health economists, physicians, philosophers, and scholars in law, public health, and machine learning to identify the primary barriers to entry of AI in the healthcare sector. Across original papers and in wide-ranging responses, the contributors analyze barriers of four types: incentives, management, data availability, and regulation. They also suggest that AI has the potential to improve outcomes and lower costs. Understanding both the benefits of and barriers to AI adoption is essential for designing policies that will affect the evolution of the healthcare system.
