H. Preston

Bahamarama Bob Morris,2007-04-01 Two years in a Florida federal prison on bogus charges has made former Miami Dolphins linebacker, Zack Chasteen, stir crazy. The first step toward getting his life back together is meeting up with his beautiful magazine mogul girlfriend, Barbara, on Harbor Island in the Bahamas. But making it out of Florida proves to be more trouble than a gator with a toothache--and even deadlier. Zack barely leaves the state alive before he discovers Barbara's been kidnapped and her ex-lover, a photographer, murdered. Once again trouble has come knocking on Zack's door. But this time he's fighting back, with the help of a Royal Bahamian police superintendent, his trusted mystical Taino Indian friend Boggy, and a cast of the most colorful characters ever to step into the warm Bahama sun. As unpredictable as island trade winds, Bahamarama twists and turns its way to a stunning conclusion and announces the arrival of a writer who is sure to surprise and delight mystery fans for years to come. Bahamarama is a 2005 Edgar Award Nominee for Best First Novel.

Project Deep Space H. Preston,2000-12 The year was 2115. For more than 150 years governments and private firms had been flying into space, but they still had not reached a point at which they had established a viable space travel industry. The growing public opinion was that they were spending too much money, wasting too much of Earth's scarce resources and were no nearer to the routine hauling of passengers and freight than they were 150 years ago. The idea of space travel beyond our planetary system had faded to a level of 'wild fantasy.' While an innovative spacecraft manufacturing company and an aggressive airline firm brought space travel to the level of a viable industry with the introduction of a propulsion system without the need to carry a fuel load. The new ships were powered by electrical energy. But they had a serious limitation: there had to be a power station at the destination. With bases on planets and satellites further and further away, they gradually established a system to exploit the resources of other planets and asteroids, mining and discovering new minerals. This story is about the results of a discovery on one of those planets that enabled the development of a propulsion system that revolutionized space travel, allowing journeys beyond the solar system.

Blindsight Greg Hewett,2016-10-10 Praise for Greg Hewett: 2010 Lambda Literary Award Finalist in Poetry 2003 Publishing Triangle Thom Gunn Award for Gay Poetry Winner In poems that are full of wit, touching, and introspective, as well as formally inventive, we find the poet losing his sight, becoming a parent, and occupying middle age with a sense of calm and inevitability. From Skyglow: we spin filaments of light into profiles, drawing each other through something resembling time and space and dark. Let's call this something something vague and mythic as the ether. Let's say we're ethereal.

Notes From a Big Country Bill Bryson,2012-05-15 When an old friend asked him to write a weekly dispatch from New Hampshire for the Mail on Sunday's Night and Day magazine, Bill Bryson firmly turned him down. So firm was he, in fact, that gathered here are nineteen months' worth of his popular columns about the strangest of phenomena -- the American way of life.Whether discussing the dazzling efficiency of the garbage disposal unit, the mind-boggling plethora of methods by which to shop, the exoticism of having your groceries bagged for you, or the jaw-slackening direness of American TV, Bill Bryson brings his inimitable brand of bemused wit to bear on the world's richest and craziest country.

A Knife Edge David Rollins,2010-01-05 By the time Special Investigator Vin Cooper arrives at the murder scene-the shark-infested waters off the Japanese coast-there's little left of the victim to prove that his death wasn't an accident. That's what the military wants Cooper to believe, but he isn't buying it. What kind of top secret project could the military be engaged in that would require the services of a foremost marine biologist and a genetic researcher? The ominous answer lies at the end of a trail of "accidental" deaths and presumed terrorist acts that leads Cooper to the ultimate showdown-with a secret shadow government convinced that its patriotic duty is to kill anyone who opposes it.
