JOHN MUIR: NATURE WRITINGS (LOA #92) JOHN MUIR, 1997-04-22 In a lifetime of exploration, writing, and passionate political activism, John Muir became America’s most eloquent spokesman for the mystery and majesty of the wilderness. A crucial figure in the creation of our national parks system and a far-seeing prophet of environmental awareness who founded the Sierra Club in 1892, he was also a master of natural description who evoked with unique power and intimacy the untrammeled landscapes of the American West. The Library of America’s Nature Writings collects his most significant and best-loved works in a single volume, including: The Story of My Boyhood and Youth (1913), My First Summer in the Sierra (1911), The Mountains of California (1894) and Stickeen (1909). Rounding out the volume is a rich selection of essays—including Yosemite Glaciers, God’s First Temples, Snow-Storm on Mount Shasta, The American Forests, and the late appeal Save the Redwoods—highlighting various aspects of his career: his exploration of the Grand Canyon and of what became Yosemite and Yellowstone National Parks, his successful crusades to preserve the wilderness, his early walking tour to Florida, and the Alaska journey of 1879. Library of America is an independent nonprofit cultural organization founded in 1979 to preserve our nation’s literary heritage by publishing, and keeping permanently in print, America’s best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

GEOSTATISTICS Tr&ia ’92A.O. SOARES,2012-12-06 The contributions in this book were presented at the Fourth International Geostatistics Congress held in Tr&ia, Portugal, in September 1992. They provide a comprehensive account of the current state of the art of geostatistics, including recent theoretical developments and new applications. In particular, readers will find descriptions and applications of the more recent methods of stochastic simulation together with data integration techniques applied to the modelling of hydrocabon reservoirs. In other fields there are stationary and non-stationary geostatistical applications to geology, climatology, pollution control, soil science, hydrology and human sciences. The papers also provide an insight into new trends in geostatistics particularly the increasing interaction with many other scientific disciplines. This book is a significant reference work for practitioners of geostatistics both in academia and industry.
