Dept.,2016-09-30 This October 2016 issue of
International Financial Statistics (IFS) is a
standard source of statistics on all aspects of
international and domestic finance. This issue
presents countries newly reporting monetary data

for Rwanda using the standardized report forms. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. Although the method of calculating the US dollar/SDR exchange rate has remained the same, the currencies' number and weight have changed over time. Their amount in the SDR basket is reviewed every five years. When a country joins the IMF, it is assigned a quota that fits into the structure of existing quotas. Quotas are considered in the light of the member's economic characteristics and considering quotas of similar countries.

Dept.,2016-04-01 This April 2016 issue of
International Financial Statistics (IFS) is a
standard source of statistics on all aspects of
international and domestic finance. The IMF
publishes calculated effective exchange rates data
only for countries that have given their approval.
The IMF cannot allocate SDRs to itself but
receives them from members through various
financial transactions and operations. Entities
authorized to conduct transactions in SDRs are the
IMF itself, participants in the SDR Department,
and other "prescribed holders." The IMF quota
increase under the Fourteenth General Review of
Quotas became effective recently. The details
regarding the associated change can be found in
the IMF Press Release No. 16/25, dated January 27,
2016. The effect of quota payments is reflected in
the following Fund Accounts for those members that
have made their quota payments: Quota, Reserve
Tranche Position, Fund Holdings of Currency, SDR
Holdings. It is also reflected in the
international liquidity and central bank data.
