The Pragmatic MBA for Scientific and Technical Executives

Bertrand C. Liang, 2012-10-25 This primer enables professionals with technical expertise to collaborate with their business-side colleagues. Emphasizing brevity and clarity, it gives technical staff answers to their most pressing questions about economics, finance, marketing, strategic decision-making, accounting, management, and related subjects. It does not offer condensed 1st year MBA courses; instead, it presents streamlined concepts and insights that are easy enough to be accessible and challenging enough to hold one's interest. Its examples from pharma, IT, aircraft/navigation, and other industries highlight problems that technical professionals face daily. Written by one of them, its credibility makes it more useful than Internet resources. Because it concentrates on pragmatic (as opposed to academic) approaches to business, it empowers technical staff to stay with the conversation--and take it to a higher level. Bertrand C. Liang, MD, PhD, MBA, is Managing Director of LCC Ventures and Executive Director of Pfenex, Inc. He is trained in molecular biology and genetics (PhD) and is a clinician (MD) with subspecialty training in neurology and oncology, and serves as a Visiting University Professor at Liaoning He University, Shenyang, China. Creates frameworks and builds concepts enabling technical staff to work with their business colleagues Delivers content for pragmatic, immediate use, not condensed presentations of subjects from first year MBA curriculum Extends readers' grasp by posting additional resources at a freely-available website

The Project Manager's MBA Dennis J. Cohen, Robert J. Graham, 2001-07-09 Project managers are no longer judged by the technical success of their projects alone. They're also held accountable for their contributions to the company's

financial goals. Yet most project managers don't have the business knowledge necessary to make project-based decisions that lead to bottom-line success. In this book, Dennis Cohen and Robert Graham, both former university professors and experienced project management consultants, provide the skills that, until now, could only be gained through a graduate degree and years of hands-on experience. Cohen and Graham walk project managers through basic business concepts such as value creation, accounting and finance, strategy, and marketing. They connect these concepts to the decisions project managers face every day. And they make it easy to apply the resulting solutions on the job through a unique business systems calculator. Readers can use the online calculator in conjunction with the book to understand how different project variables affect business outcomes, to determine the overall impact of proposed project changes, and to evaluate the economic results of many decisions they make. Cohen and Graham's principles apply equally to projects in business, non-profit, and government organizations. And each one is illustrated through case studies drawn from a range of industries, including pharmaceuticals, the technology sector, even the winemaking business. Whether the mandate is to get new products to market, improve the infrastructure, or better serve customers and clients, this book teaches project managers how to make day-to-day decisions from an upper-management perspective. And it provides a blueprint for planning and pitching potential projects that demonstrates a higher level of business savvy.

Problem Solving for Better Health Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Barry H. Smith, MD, PhD, Pamela Hoyt-Hudson, BSN, RN, 2010-11-22 *Problem Solving for Better Health* covers human potential and possibilities for change in a global environment where health issues have now reached crisis proportions. Through the Dreyfus Health Foundation's *Problem Solving for Better Health* and related programs, this book presents innovative methodologies that promote grass-roots solutions to pressing health issues. A progress report and call to further action, the book speaks to such issues in 27 countries, including the United States. With contributions from Dreyfus Health Foundation international program leaders and esteemed health care practitioners and educators, *Problem Solving for Better Health* presents practical interventions through community and institutional initiatives to improve health and quality of life. The tools presented are currently integrated into nursing and medical curricula internationally, including 75 medical institutions in India and 20 in China. This book is an essential resource for doctors, nurses, public health care providers, and individuals working at the community, institutional, and policy levels. Co-publication with the Dreyfus Health Foundation, this book: Offers new approaches to health challenges at the local level for teachers and students in nursing, public health, medicine, and health policy programs Provides useful problem-solving tools now in use in various settings internationally Gives examples of interventions that have influenced policy in and across institutions and at the national level Incorporates perspectives from international health leaders

CEO Guide to Doing Business in China Ade Asefeso

MCIPS MBA,2012-02-15 China is the great economic success story of the past 30 years. Since the “reform and opening-up” policy was introduced in 1978, China has changed beyond recognition. A Soviet-styled planned economy has transformed into a vibrant market-oriented economy and 400 million people have been lifted out of poverty. Well known for its manufacturing capability, China is the largest global producer of toys, textiles, washing machines, cameras and computers (among hundreds of other products). It is also the world’s largest consumer of iron, steel, coal and cement, and China’s hunger for raw materials continues. Over a million enterprises have flourished, and over 40 Chinese companies have entered the global Fortune 500 list.
