The Psychology of Money Morgan Housel,2020-09-08 Doing well with money isn’t necessarily about what you know. It’s about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don’t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life’s most important topics.

The Music Shop Rachel Joyce,2018-11-06 “An unforgettable story of music, loss and hope. Fans of *High Fidelity*, meet your next quirky love story.”—People NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE TIMES (UK) AND THE WASHINGTON POST It is 1988. On a dead-end street in a run-down suburb there is a music shop that stands small and brightly lit, jam-packed with records of every kind. Like a beacon, the shop attracts the lonely, the sleepless, and the adrift; Frank, the shop’s owner, has a way of connecting his customers with just the piece of music they need. Then, one day, into his shop comes a beautiful young woman, Ilse Brauchmann, who asks Frank to teach her about music. Terrified of real closeness, Frank feels compelled to turn and run, yet he is drawn to this strangely still, mysterious woman with eyes as black as vinyl. But Ilse is not what she seems, and Frank has old wounds that threaten to reopen, as well as a past it seems he will never leave behind. Can a man who is so in tune with other people’s needs be so incapable of connecting with the one person who might save him? The journey that these two quirky, wonderful characters make in order to overcome their emotional baggage speaks to the healing power of music—and love—in this poignant, ultimately joyful work of fiction. Praise for *The Music Shop* “Captures the sheer, transformative joy of romance.”—The Washington Post “Love, friendship, and especially the healing powers of music all rise together into a triumphant crescendo. . . . This lovely novel is as satisfying and enlightening as the music that suffuses its every page.”—The Boston Globe “Magnificent . . . If you love words, if you love music, if you love love, this [novel] will be without question one of the year’s best.”—BookPage (Top Pick in Fiction) “Joyce has a knack for quickly sketching characters in a way that makes them stick. [The Music Shop] will surprise you.”—Minneapolis Star Tribune “Rachel Joyce has established a reputation for novels that celebrate the dignity and courage of ordinary people and the resilience of the human spirit. . . . But what really elevates *The Music Shop* is Joyce’s detailed knowledge of—and passion for—music.”—The Guardian

*Black Coffee Blues* Henry Rollins,2005 'If I lose the light of the sun, I will write by candlelight, moonlight, no light, If I lose paper and ink, I will write in blood on forgotten walls. I will write always. I will capture nights all over the world and bring them to you.' Henry Rollins, renowned spoken-word performer, musician, actor and author of several books, has a unique, hard-edged view of the world. This collection of writings from 1989 - 1991 is the classic Rollins book. From dramatic fiction shorts detailing stark, disturbing realities to gut-wrenching tour journals destroying all misconceptions of the glamour of fame and the music industry; from the challenging poetry to revealing dream sequences, Rollins' writing is unflinching in its honesty, uncompromising in its truth and irresistibly addictive.

*Mountaineer Jamboree* Ivan M. Tribe,2015-01-13 Jamboree! To many country music fans the word conjures up memories of Saturday nights around the family radio listening to live broadcasts from that haven of hillbilly music, West Virginia. From 1926 through the 1950s, as Ivan Tribe shows in his lively history, country music radio programming made the Mountain State a mecca for country singers and instrumentalists from all over America. Wilma Lee and Stoney Cooper, Little Jimmy Dickens, Hawkshaw Hawkins, Red Sovine, Blaine Smith, Curly Ray Cline, Grandpa Jones, Cowboy Loyce, Rex and Eleanor Parker, Lee Moore, Buddy Starcher, Doc and Chickie Williams, and Molly O'Day were among the many who came to prominence via West Virginia radio. Wheeling's WWVA jamboree, first broadcast in 1933, attracted a wide audience, especially after 1942, when the station increased its power. The show's success spawned numerous competitors, as new stations all over West Virginia followed WWVA's lead in headlining country music. The state also played an important role in the early recording industry. The Tweedy Brothers, Frank Hutchison, Roy Harvey, Blind Alfred Reed, Frank Welling and John McGhee, Cap and Andy, and the Kessinger Brothers were among West Virginians whose waxings contributed to the state's reputation for fine native musicianship. So too did those who sought out and recorded the Mountaineer folksong heritage. As Nashville's dominance has grown since the 1960s, West Virginia's leadership in country music has lessened. Young performers must now seek fame outside their native state. But, as Ivan Tribe demonstrates, the state's numerous outdoor festivals continue to keep alive the heritage of country music's mountain mama.

*Promises to Keep* William W. Fisher, III,2004 During the past fifteen years, changes in technology have generated an extraordinary array of new ways in which music and movies can be produced and distributed. Both the creators and the consumers of entertainment products stand to benefit enormously from the new systems. Sadly, we have failed thus far to avail ourselves of these opportunities. Instead, much energy has been devoted to interpreting or changing legal rules in hopes of defending older business models against the threats posed by the new technologies. These efforts to plug the multiplying holes in the legal dikes are failing and the entertainment industry has fallen into crisis. This provocative book chronicles how we got into this mess and presents three alternative proposals--each involving a combination of legal reforms and new business models--for how we could get out of it.

**Lost Enlightenment** S. Frederick Starr,2015-06-02 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. Lost Enlightenment chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

**Stealth Assessment** Valerie Jean Shute,Matthew Ventura,2013 An approach to performance-based assessments that embeds assessments in digital games in order to measure how students are progressing toward targeted goals. To succeed in today's interconnected and complex world, workers need to be able to think systemically, creatively, and critically. Equipping K-16 students with these twenty-first-century competencies requires new thinking not only about what should be taught in school but also about how to develop valid assessments to measure and support these competencies. In Stealth Assessment, Valerie Shute and Matthew Ventura investigate an approach that embeds performance-based assessments in digital games. They argue that using well-designed games as vehicles to assess and support learning will help combat students' growing disengagement from school, provide dynamic and ongoing measures of learning processes and outcomes, and offer students opportunities to apply such complex competencies as creativity, problem solving, persistence, and collaboration. Embedding assessments within games provides a way to monitor players' progress toward targeted competencies and to use that information to support learning. Shute and Ventura discuss problems with such traditional assessment methods as multiple-choice questions, review evidence relating to digital games and learning, and illustrate the stealth-assessment approach with a set of assessments they are developing and embedding in the digital game Newton's Playground. These stealth assessments are intended to measure levels of creativity, persistence, and conceptual understanding of Newtonian physics during game play. Finally, they consider future research directions related to stealth assessment in education.
