The Death of Expertise Tom Nichols, 2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

Sports Tourism Chris Bull, Mike Weed, 2012-05-23 Sports Tourism: participants, policy and providers is an unparalleled text that explains sports tourism as a social, economic and cultural phenomenon that stems from the unique interaction of activity, people and place. Unlike other texts, it seeks to present sports tourism as a unique area that produces its own unique issues, concerns and controversies. The text tackles these issues from three viewpoints: participants: examining the profiles, motivations and behaviour patterns of sports tourists to create a typology of participants policy: analyses the response by policy makers to this phenomenon and the problems of achieving integration between two sectors with historically different cultures providers: their motivations, aims, objectives and strategies Illustrated by international case studies in each chapter, and with four extended case study chapters, Sports Tourism: participants, policy and providers examines this area using real life experiences and concrete evidence.

The Baseball 100 Joe Posnanski, 2021-09-28 NEW YORK TIMES BESTSELLER * Winner of the

CASEY Award for Best Baseball Book of the Year “An instant sports classic.” —New York Post * “Stellar.” —The Wall Street Journal * “A true masterwork...880 pages of sheer baseball bliss.” —BookPage (starred review) * “This is a remarkable achievement.” —Publishers Weekly (starred review) A magnum opus from acclaimed baseball writer Joe Posnanski, *The Baseball 100* is an audacious, singular, and masterly book that took a lifetime to write. The entire story of baseball rings through a countdown of the 100 greatest players in history, with a foreword by George Will. Longer than *Moby-Dick* and nearly as ambitious, *The Baseball 100* is a one-of-a-kind work by award-winning sportswriter and lifelong student of the game Joe Posnanski. In the book’s introduction, Pulitzer Prize-winning commentator George F. Will marvels, “Posnanski must already have lived more than two hundred years. How else could he have acquired such a stock of illuminating facts and entertaining stories about the rich history of this endlessly fascinating sport?” Baseball’s legends come alive in these pages, which are not merely rankings but vibrant profiles of the game’s all-time greats. Posnanski dives into the biographies of iconic Hall of Famers, unfairly forgotten All-Stars, talents of today, and more. He doesn’t rely just on records and statistics—he lovingly retraces players’ origins, illuminates their characters, and places their accomplishments in the context of baseball’s past and present. Just how good a pitcher is Clayton Kershaw in the 21st-century game compared to Greg Maddux dueling with the juiced hitters of the nineties? How do the career and influence of Hank Aaron compare to Babe Ruth’s? Which player in the top ten most deserves to be resurrected from history? No compendium of baseball’s legendary geniuses could be complete without the players of the segregated Negro Leagues, men whose extraordinary careers were largely overlooked by sportswriters at the time and unjustly lost to history. Posnanski writes about the efforts of former Negro Leaguers to restore sidelined Black athletes to their due honor and draws upon the deep troves of the Negro Leagues Baseball Museum and extensive interviews with the likes of Buck O’Neil to illuminate the accomplishments of players such as pitchers Satchel Paige and Smokey Joe Williams; outfielders Oscar Charleston, Monte Irvin, and Cool Papa Bell; first baseman Buck Leonard; shortstop Pop Lloyd; catcher Josh Gibson; and many, many more. *The Baseball 100* treats readers to the whole rich pageant of baseball history in a single volume. Engrossing, surprising, and heartfelt, it is a magisterial tribute to the game of baseball and the stars who have played it.

Behavioral Finance: The Second Generation Meir Statman,2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
