Adult Language Education and Migration James Simpson, Anne Whiteside, 2015-03-27 *Adult Language Education and Migration: Challenging Agendas in Policy and Practice* provides a lively and critical examination of policy and practice in language education for adult migrants around the world, showing how opportunities for learning the language of a new country both shape and are shaped by policy moves. Language policies for migrants are often controversial and hotly contested, but at the same time innovative teaching practices are emerging in response to the language learning needs of today's mobile populations. This book: analyses and challenges language education policies relating to adult migrants in nine countries; provides a comparative study with separate chapters on policy and practice in each country; focuses on Australia, Canada, Spain (Catalonia), Finland, France, Ireland, the Netherlands, the UK and the US. *Adult Language Education and Migration* is essential reading for practitioners, students and researchers working in the area of language education in migration contexts.

Language, Society and Power Annabelle Mooney, Jean Stilwell Peccei, Suzanne LaBelle, Berit Engøy Henriksen, Eva Eppler, Anthea Irwin, Pia Pichler, Siân Preece, Satori Soden, 2010-12-14 *Language, Society and Power* is the essential introductory text for students studying language in a variety of social contexts. This book examines the ways in which language functions, how it influences thought and how it varies according to age, ethnicity, class and gender. It seeks to answer such questions as: How can a language reflect the status of children and older people? Do men and women talk differently? How can our use of language mark our ethnic identity? It also looks at language use in politics and the media and investigates how language affects and constructs our identities, exploring notions of correctness and attitudes towards language use. This third edition of this bestselling book has been completely revised to include recent developments in theory and research and offers the following features: a range of new and engaging international examples drawn from everyday life: beauty advertisements, conversation transcripts, newspaper headlines reporting on asylum seekers, language themed cartoons, and excerpts from the television programme *South Park* and satirical news website *The Onion* new activities designed to give students a real understanding of the topic a new chapter covering 'Student Projects' – giving readers suggestions on how to further explore the topics covered in the book updated and expanded further reading sections for each chapter and a glossary. While it can be used as a stand-alone text, this edition of *Language, Society and Power* has also been fully cross-referenced with the new companion title: *The Language, Society and Power Reader*. Together these books provide the complete resource for students of English language and linguistics, media, communication, cultural studies, sociology and psychology.

Channelling Mobilities Valeska Huber, 2013-08-01 The history of globalisation is usually told as a history of shortening distances and acceleration of the flows of people, goods and ideas. *Channelling Mobilities* refines this picture by looking at a wide variety of mobile people passing through the region of the Suez Canal, a global shortcut opened in 1869. As an empirical contribution to global history, the book asks how the passage between Europe and Asia and Africa was perceived, staged and controlled from the opening of the Canal to the First World War, arguing that this period was neither an era of unhampered acceleration, nor one of hardening borders and increasing controls. Instead, it was characterised by the channelling of mobilities through the differentiation, regulation and bureaucratisation of movement. Telling the stories of tourists, troops, workers, pilgrims, stowaways, caravans, dhow skippers and others, the book reveals the complicated entanglements of empires, internationalist initiatives and private companies.

Metrolingualism Alastair Pennycook,Emi Otsuji,2015-03-05 This book is about language and the city. Pennycook and Otsuji introduce the notion of 'metrolingualism', showing how language and the city are deeply involved in a perpetual exchange between people, history, migration, architecture, urban landscapes and linguistic resources. Cities and languages are in constant change, as new speakers with new repertoires come into contact as a result of globalization and the increased mobility of people and languages. Metrolingualism sheds light on the ordinariness of linguistic diversity as people go about their daily lives, getting things done, eating and drinking, buying and selling, talking and joking, drawing on whatever linguistic resources are available. Engaging with current debates about multilingualism, and developing a new way of thinking about language, the authors explore language within a number of contemporary urban situations, including cafés, restaurants, shops, streets, construction sites and other places of work, in two diverse cities, Sydney and Tokyo. This is an invaluable look at how people of different backgrounds get by linguistically. Metrolingualism: Language in the city will be of special interest to advanced undergraduate/postgraduate students and researchers of sociolinguistics and applied linguistics.

Encyclopedia of the World's Endangered Languages Christopher Moseley,2008-03-10 The concern for the fast-disappearing language stocks of the world has arisen particularly in the past decade, as a result of the impact of globalization. This book appears as an answer to a felt need: to catalogue and describe those languages, making up the vast majority of the world's six thousand or more distinct tongues, which are in danger of disappearing within the next few decades. Endangerment is a complex issue, and the reasons why so many of the world's smaller, less empowered languages are not being passed on to future generations today are discussed in the book's introduction. The introduction is followed by regional

sections, each authored by a notable specialist, combining to provide a comprehensive listing of every language which, by the criteria of endangerment set out in the introduction, is likely to disappear within the next few decades. These languages make up ninety per cent of the world's remaining language stocks. Each regional section comprises an introduction that deals with problems of language preservation peculiar to the area, surveys of known extinct languages, and problems of classification. The introduction is followed by a list of all known languages within the region, endangered or not, arranged by genetic affiliation, with endangered and extinct languages marked. This listing is followed by entries in alphabetical order covering each language listed as endangered. Useful maps are provided to pinpoint the more complex clusters of smaller languages in every region of the world. The Encyclopedia therefore provides in a single resource: expert analysis of the current language policy situation in every multilingual country and on every continent, detailed descriptions of little-known languages from all over the world, and clear alphabetical entries, region by region, of all the world's languages currently thought to be in danger of extinction. The Encyclopedia of the World's Endangered Languages will be a necessary addition to all academic linguistics collections and will be a useful resource for a range of readers with an interest in development studies, cultural heritage and international affairs.

The Elements of Academic Style Eric Hayot,2014-08-26 Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

Herbert of Bosham Michael Staunton,2019 In-depth study of an important writer and close associate of Becket. Herbert of Bosham (c.1120-c.1194) was one of the most brilliant, original and versatile thinkers of the twelfth century. Herbert was Thomas Becket's closest confidant, a theologian, biblical commentator, historian, letter-writer and Hebrew scholar; he wrote a Life of St Thomas unlike any other contemporary biography, produced one of the most visually-arresting illuminated Bible books of his age, and composed a commentary on the Psalms inspired by Jewish

scholarship. His uncompromising character, and the originality and complexity of his thought, meant that Herbert's works were largely ignored during his lifetime and forgotten for centuries, but more recently they have begun to receive the attention and approval that their author insisted they deserved. The chapters in this book, the first to be devoted to Herbert's life and works, examine his eventful and troubled life, his remarkable corpus of works, and how they came to be neglected and rediscovered. They provide an introduction to his life, writings and legacy, direction to existing scholarship on the subject, and new insights on, interpretations of and discoveries about anidiosyncratic representative of the twelfth-century renaissance. MICHAEL STAUNTON is Associate Professor of History at University College Dublin. Contributors: Julie Barrau, Laura Cleaver, Matthew Doyle, Anne J. Duggan, Christopher de Hamel, Sabina Flanagan, Michael Staunton, Nicholas Vincent.
