Classical Morality in International Peremptory Criminal Law Farhad Malekian,2018-10-09 This book begins with the belief that, if a moral principle cannot be identified in the language of the law, if law is not underpinned by a moral understanding of the norm, if the moral accusation is not attached to the violations of certain indispensable norms of the law, then we are violating the peremptory character of the universality of the moral law. The book vicariously objects to any dispute for the advantage of the impunity of those who have cruelly contravened the corpus juris of international peremptory criminal law. What justifies the law in recognizing certain principles as peremptory derives from the highest genetic merit for the international human community as a whole. Here, the term ‘peremptory’, for classical morality, is seen to encompass love for the spirit of truth, for the strength of equality of arms and for the reaffirmation of the value of the essence of man where its infringements violate the indispensable universal rights of nature. This is regardless of whether its perpetrators are Western or non-Western.
Corpus Juris of Islamic International Criminal Justice Farhad Malekian,2018-09-30 This pioneering scholarly oeuvre evaluates the major comparative philosophy of Islamic international criminal justice. It represents an in-depth analysis of the necessities of creating an Islamic international criminal court, its possible jurisdiction, proceedings, judgments, and sanctions. It implies a court functioning under the legal personality of the International Criminal Court, with comparative international criminal lawyers with basic knowledge of Shariah contributing to the prevention of crimes and impunity at an international level. The morality and philosophy of Islamic justice are highly relevant with reference to the atrocities committed explicitly or implicitly under the pretext of Islamic rules by superiors, groups and governments. The volume focuses on substantive criminal law and three methods of the criminal procedure, namely the inquisitorial, adversarial, and acquisitorial. The first two constitute the corpus juris of civil and common law systems. The third term presents a hybrid of the first two methods. The intention is to enhance the scope of each method of the criminal procedure comprehensively. The volume examines their variations and effects on a shared system of international criminal justice. The inherence of comparable norms in the foundation of Islamic and international criminal law affirms their efficiency in the implementation of the essence of the complementarity principle. This book will appeal to readers who are interested in comparative criminal law, international criminal justice, and Shariah criminal law. It is recommended for course literature.
