**Mobile Interfaces in Public Spaces** Adriana de Souza e Silva, Jordan Frith, 2012-04-23 Mobile phones are no longer what they used to be. Not only can users connect to the Internet anywhere and anytime, they can also use their devices to map their precise geographic coordinates - and access location-specific information like restaurant reviews, historical information, and locations of other people nearby. The proliferation of location-aware mobile technologies calls for a new understanding of how we define public spaces, how we deal with locational privacy, and how networks of power are developed today. In Mobile Interfaces in Public Spaces, Adriana de Souza E. Silva and Jordan Frith examine these social and spatial changes by framing the development of location-aware technology within the context of other mobile and portable technologies such as the book, the Walkman, the iPod, and the mobile phone. These technologies work as interfaces to public spaces - that is, as symbolic systems that not only filter information but also reshape communication relationships and the environment in which social interaction takes place. Yet rather than detaching people from their surroundings, the authors suggest that location-aware technologies may ultimately strengthen our connections to locations.

**Negotiating Marian Apparitions** Agnieszka Halemba, 2015-10-01 This book concerns the politics of religion as expressed through apparitions of the Virgin Mary in Dzhublyk in Transcarpathian Ukraine. On the one hand, the analysis provides insights into the present position of Transcarpathia in regional, Ukraine-wide, and European struggles for identity and political belonging. The way in which the apparitions site has been conceived and managed raises questions concerning the fate of religious communities during and after socialism, the significance of national projects for religious organizations, and the politics of religious management in a situation in which local religious commitments are relatively strong and religious organizations are relatively weak. The analysis contributes to the ethnography and history of this particular region and of the post-socialist world in general. On the other hand, the changing status of the apparition site over the years allows investigation of the questions concerning authority, legitimacy, and power in religious organizations, especially in relation to management of religious experiences. The analysis aims at clarification of such concepts as religious institutions, organizations but also religious experiences and is relevant to anthropology, sociology and religious studies. It is argued that the important question in analyses of religious apparitions should not be how an individual experience becomes institutionalized and instrumentalized, but how experience becomes a tool for negotiation and transformation in the religious field. Key word: 1. Mary, Blessed Virgin, Saint--Apparitions and miracles-Ukraine-Zakarpats'ka oblast'. 2. Zakarpats'ka oblast' (Ukraine)-Church history.
