**The Origins of War in Mozambique** Funada-Classen Sayaka,2012-04 The book focuses on an area called Maúa, not because I believe Maúa represents the whole of Mozambique as such, but because highlighting a specific area and people helps to understand the Mozambican history more deeply and comprehensively. In any case, it would be impossible to study the experience of all Mozambicans. I am not attempting to write a history textbook of Mozambique, or a glorious history of the liberation struggle, but rather trying to fill a gap in the descriptions of contemporary Mozambican history by delving into matters that have not been written about before.

Perils of the Seas and Inherent Vice in Marine Insurance Law Ayça Uçar,2020-10-28 The Supreme Court ruling in Global Process System Inc. v Syarikat Takaful Malaysia Berhad (The Cendor MOPU) created a shock wave in the London marine insurance market, as the Supreme Court decision changed the boundaries of doctrine with respect to the meaning of ‘perils of the sea’ and ‘inherent vice’. Both phrases play an important role in the insurance market, affecting both assureds and insurers and their respective interests under all classes of marine insurance policies. This book reviews the origin of the clauses ‘perils of the sea’ and ‘inherent vice’ by tracing back through the early cases in order to understand the origin and noting how and why the changes occurred. It will examine how the law has been developed in the recent cases and discuss whether the Supreme Court case The Cendor MOPU has overruled the previous cases in terms of the clauses ‘inherent vice’ and ‘perils of the sea’. Considering the impact of The Cendor MOPU decision with respect to the Marine Insurance Act 1906, as well as the standard Institute Cargo Clauses, it evaluates whether the decision is consistent with these things and discusses the effect of the decision on recent cases and on the insurance market.

**Police Expenditures** Bruce T. Olson,1967 Statistical data on police budget and manpower trends is related to historical trends in the other public services. The author concludes that although the American police service has received substantial increases in man power and budgets, it has not been underwritten, either in terms of dollars or man power, to the same general extent as most other public services since 1900.

**Water Supply Systems** Cedo Maksimovic,Francesco Calomino,John Snoxell,2011-11-06 Technology now affects almost every aspect of Water Supply Management, Operation, Planning and Design; the speed of development means that assessing what is new is sometimes difficult. Old ideas can now be applied because of new technology; technology is now revealing problems that were unnoticed 10 years ago. Some emerging technologies promise much but are still underdeveloped for use in real world conditions, while we should always remember that new technology depends upon the state of development in respective countries, a point which is particularly relevant to the NATO Advanced Study Institute, for which this book has been produced. Thus our objective in producing the book has been to highlight, in a wide range of technical areas, where and how technology is being applied, what is new and what the limitations of these technologies are in the real world. We have also tried to provide an European and American perspective where possible to illustrate how problems are tackled in different cultural environments. It is probably true that technology is also somewhat dependent upon the political, economic and organisational climate in different countries and we have included a chapter covering these aspects.
