Legged Alarm Clocks Dennis Sagvold, 2004 For the first time, alarm clocks with legs, produced between 1880 and 1935, are brought together in a single volume. Over 375 black and white photos and catalog pages illustrate clocks from American clock makers Ansonia, Attleboro, Gilbert, Ingersoll, Ingraham, Lux, New Haven, Parker, Scott, Sessions, Seth Thomas, Waterbury, Welch, and Westclox, as well as international alarms. Private label dial alarm clocks are also featured. Values are found in the captions.

The Timing of Biological Clocks Arthur T. Winfree, 1987 Examines circadian rhythms, tells how biological clocks are reset, and discusses time zones, consciousness, and clocks

The Rhythms Of Life Leon Kreitzman, Russell Foster, 2011-09-30 Popular science at its most exciting: the breaking new world of chronobiology - understanding the rhythm of life in humans and all plants and animals. The entire natural world is full of rhythms. The early bird catches the worm - and migrates to an internal calendar. Dormice hibernate away the winter. Plants open and close their flowers at the same hour each day. Bees search out nectar-rich flowers day after day. There are cicadas that can breed for only two weeks every 17 years. And in humans: why are people who work anti-social shifts more illness prone and die younger? What is jet-lag and can anything help? Why do teenagers refuse to get up in the morning, and are the rest of us really 'larks' or 'owls'? Why are most people born (and die) between 3am-5am? And should patients be given medicines (and operations) at set times of day, because the body reacts so differently in the morning, evening and at night? The answers lie in our biological clocks the mechanisms which give order to all living things. They impose a structure that enables us to change our behaviour in relation to the time of day, month or year. They are reset at sunrise and sunset each day to link astronomical time with an organism's internal time.

Of Time, Tides, and Inner Clocks Henry Still, 1972

Biological Clocks Susan Binkley, 2020-08-26 Biological Clocks introduces the subject of human chronobiology. It describes biological clocks; why we have clocks; how biological clocks relate to sleep disorders, depression, and jet lag; and how the reader can measure his/her own rhythms.

A Book of English Clocks R. Symonds, 2010-07 Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Clocks that Time Us Martin C. Moore-Ede, Frank M. Sulzman, Charles Albert Fuller, 1982

The Clock Book Philip E. Balcomb, 1996-05-01

English 30 Hour Clocks Jeff Darken, 1997

Body Clocks Paul Kelley, 2019-01-18 Our body's clocks make the difference between happiness and depression, health and illness, and even life and death. The brilliant scientist Paul Kelley makes a compelling case for all organisations to allow people to work and study the hours that suit their personal circadian rhythms. That way, Paul argues, we would all be more productive, a great deal of ill health would be avoided and the world would be a better and happier place.

Many Alarm Clocks Sy Safransky, 2015-02-05 A collection of essays by the founder and editor of The Sun magazine.

Biological Timekeeping: Clocks, Rhythms and Behaviour Vinod Kumar, 2017-02-15 This book is a concise, comprehensive and up-to-date account of fundamental concepts and potential applications of biological timekeeping mechanisms in animals and humans. It also discusses significant aspects of the organization and importance of timekeeping mechanisms in both groups.

Divided into seven sections, it addresses important aspects including fundamental concepts; animal and human clocks; clock interactions; clocks and metabolism and immune functions; pineal, melatonin and timekeeping; and clocks, photoperiodism and seasonal behaviours. The book also focuses on biological clock applications in a 24x7 human society, particularly in connection with life-style associated disorders like obesity and diabetes. It is a valuable resource for advanced undergraduates, researchers and professionals engaged in the study of the science of biological timekeeping.

Biological Clocks Oktav Salvenmoser,Brigitta Meklau,2010 The emerging discipline denominated chronoecology of behaviour is the result of the interaction between the work of behavioural ecologists and chronobiologists -- those who explain biological rhythms on the basis of experimental studies carried out in the laboratory. Since the beginning of this century, this interaction has generated interest in understanding how biological rhythms behave in organisms living in their natural habitat. This approach requires field studies of rest/activity rhythms in order to obtain detailed hour/hour and day/day information about the possible effects of the modulation of certain environmental variables, such as photoperiod, temperature and the lunar sky, which may synchronise and/or mask behavioural activity. This book looks at the behavioural variations in non-human primates and Homo sapiens to find out how the circadian rhythm modulates behaviour and in what way social interaction influences the rhythms of circadian activity. This book also analyses the interaction between the circadian and immune systems, and explores the signal transduction pathways which could participate in this dialogue. The precise knowledge of this interaction might be extremely useful for the understanding of diseases development such as cancer. Other chapters in this book assess the quality of sleep in children and how it affects the rhythmical functions of the body. The comprehensive coverage of this topic is presented together with a general perspective from a child, caregiver and healthcare provider.
