Science Fair Warm-up John Haysom,2013 Answer the questions and face science fairs without fear with help from the Science Fair Warm-Up series. The teachers guide lets you make best use of the original investigations and problem-solving exercises provided by each of the grade-appropriate student editions. The Science Fair Warm-Up series consists of three books; each book builds on the ideas introduced in the previous book, and the problems in the later books are progressively more challenging. The series' field-tested material will help your students develop the inquiry skills to carry their projects through whether they're middle schoolers preparing for their first science fair or high schoolers ready for very challenging investigations.

Technobiophilia Sue Thomas,2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. *Technobiophilia: Nature and Cyberspace* offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

Social Software in Libraries Meredith G. Farkas,2007 Social software lets libraries show a human face online, helping them communicate, educate, and interact with their communities. This nuts-and-bolts guide provides librarians with the information and skills necessary to implement the most popular and effective social software technologies: blogs, RSS, wikis, social networking software, screencasting, photo-sharing, podcasting, instant messaging, gaming, and more. Success stories and interviews highlight these tools ease-of-use and tremendous impact.

Make It So Nathan Shedroff,Christopher Noessel,2012-09-17 Many designers enjoy the interfaces seen in science fiction films and television shows. Freed from the rigorous constraints of designing for real users, sci-fi production designers develop blue-sky interfaces that are inspiring, humorous, and even instructive. By carefully studying these “outsider” user interfaces, designers can derive lessons that make their real-world designs more cutting edge and successful.

Race on the Brain Jonathan Kahn,2017-11-07 Of the many obstacles to racial justice in America, none has received more recent attention than the one that lurks in our subconscious. As social movements and policing scandals have shown how far from being “postracial” we are, the concept of implicit bias has taken center stage in the national conversation about race. Millions of Americans have taken online tests purporting to show the deep, invisible roots of their own prejudice. A recent Oxford study that claims to have found a drug that reduces implicit bias is only the starkest example of a pervasive trend. But what do we risk when we seek the simplicity of a technological diagnosis—and solution—for racism? What do we miss when we locate racism in our biology and our brains rather than in our history and our social practices? In *Race on the Brain*, Jonathan Kahn argues that implicit bias has grown into a master narrative of race relations—one with profound, if unintended, negative consequences for law, science, and society. He emphasizes its limitations, arguing that while useful as a tool to understand particular types of behavior, it is only one among several tools available to

policy makers. An uncritical embrace of implicit bias, to the exclusion of power relations and structural racism, undermines wider civic responsibility for addressing the problem by turning it over to experts. Technological interventions, including many tests for implicit bias, are premised on a color-blind ideal and run the risk of erasing history, denying present reality, and obscuring accountability. Kahn recognizes the significance of implicit social cognition but cautions against seeing it as a panacea for addressing America's longstanding racial problems. A bracing corrective to what has become a common-sense understanding of the power of prejudice, *Race on the Brain* challenges us all to engage more thoughtfully and more democratically in the difficult task of promoting racial justice.

SHEAVES Ludger Hovestadt,Vera Bühlmann,2013-10-09 "SHEAVES" will not describe anything. It will not judge. It will inspire. There are no continuous texts, but a wide range of topics. How to read this book? Take the notions seriously. Search the Internet and they will lose their generalness. They will begin to speak to you vividly. Bundle these riches with the riches of other notions and they will activate each other. Also take the pictures seriously. Photograph or scan them. Use them as an index, while searching the Internet. Again, you will find rich stories. Bundle those riches, concentrate them into new identities that are interesting to you. Let yourself be inspired by the intellectual wealth of our world. You can expand it. It is an exciting adventure, demanding and optimistic.

Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices Christina V. Schwarz,Cynthia Passmore,Brian J. Reiser ,2017-01-31 When it's time for a game change, you need a guide to the new rules. *Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices* provides a play-by-play understanding of the practices strand of A Framework for K-12 Science Education (Framework) and the Next Generation Science Standards (NGSS). Written in clear, nontechnical language, this book provides a wealth of real-world examples to show you what's different about practice-centered teaching and learning at all grade levels. The book addresses three important questions: 1. How will engaging students in science and engineering practices help improve science education? 2. What do the eight practices look like in the classroom? 3. How can educators engage students in practices to bring the NGSS to life? *Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices* was developed for K-12 science teachers, curriculum developers, teacher educators, and administrators. Many of its authors contributed to the Framework's initial vision and tested their ideas in actual science classrooms. If you want a fresh game plan to help students work together to generate and revise knowledge—not just receive and repeat information—this book is for you.

Computerization Movements and Technology Diffusion Margaret S. Elliott,Kenneth L. Kraemer,2008 Computerization movement (CM) refers to a special kind of social and technological movement that promotes the adoption of computing within organizations and society. ... Through theoretical analyses, systematic empirical studies, field-based studies, and case studies of specific technologies, the book shows CMs to be driven by Utopian visions of technology that become part of the ether within society. The empirical studies presented here show the need for designers, users, and the media to be aware that CM rhetoric can propose grand visions that never become part of a reality and reinforce the need for critical and scholarly review of promising new technologies.--Back cover.

Global Trends 2040 National Intelligence Council,2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -*Global Trends 2040* (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19

pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.
