*An A-Z of Type Designers* Neil Macmillan, 2006-01-01 Review: This illustrated A-Z features outstanding type designers from around the world, from Gutenberg to the present day. Arranged alphabetically by designer's name, the book contains over 260 biographical profiles. Entries are illustrated by key typefaces taken from a wide range of sources, including type specimens, original posters, private press editions and magazine covers, and also give a list of work and, where applicable, further reading references and a website address. An essential reference for typographers, graphic designers and students, the book also features a full index and eight short texts by leading typographers - Jonathan Barnbrook, Erik van Blokland, Clive Bruton, John Downer, John Hudson, Jean Francois Porchez, Erik Spiekermann and Jeremy Tankard - that cover a variety of different aspects of type design, including typeface revivals, font piracy, designing fonts for corporate identities and the role of nationality in type design.--BOOK JACKET

Retrofonts Gregor Stawinski, 2010-08-02 Accompanied by CD-ROM with 222 free fonts.

*Ireland: Looking East* Christophe Gillissen, 2010 If Ireland's relations with the Western world have been the object of numerous scientific publications, its links with the East have been neglected by research. The aim of this book is to redress that imbalance by proposing studies of various aspects of Ireland's interactions with the East. It is a multidisciplinary publication, dealing with some of the historical, political, religious, cultural, demographic and sociological connections between Ireland - both North and South - and the East. The chapters, which offer novel perspectives for the field of Irish studies, are organised in a chronological sequence, from the mid-19th century to the present. They focus on three main areas: the links between Ireland and the Asian continent, notably India, China

and Turkey; its interactions with the Jewish people and the state of Israel; and its relations with Eastern European countries, in particular Poland and Lithuania. -- Back cover.

Font Technology Peter Karow, 2012-12-06 Computers have changed typography and prepress as well as printing. Typefaces are manufactured by digital punch cutters with a PC, not any more by punch cutters. Typefaces are constructed an output by a new technology, the so-called fonttechnology. The book by Peter Karow covers the whole area of it. It offers various chapters about (among others) issues like intelligent font scaling, kerning, quality of type, legibility, and problems of different output devices. It is interesting to read about Gutenberg setting, the font market, optical scaling, and last but not least a hand on Kanjhi, the Chinese/Japanese Glyphs. Furthermore, Fonttechnology contains a number of valuable and instructive appendices. Almost everything one has to know about type and computers!

**The Pilgrim's Progress** John Bunyan, George Bagshawe Harrison, 1928

**Classic Typefaces** David Consuegra, 2011-10-10 Graphic designers will enrich their understanding of American type design and type designers with this unique and extensive reference. The fascinating history of type in America is chronicled through the typefaces and biographies of sixty-two of the most influential type designers, including Linn Boyd Benton, Morris Fuller Benton, and Darius Wells, and through the description and history of nine American type foundries. Complete with samples of 334 different typefaces, and 700 black-and-white illustrations, this eye-popping reference reveals the expansive contribution America has made to the world of type design.

*Rudolf Koch* Gerald Cinamon, 2000 A biography and study of Rudolph Koch, a master of lettering and the design of typefaces. Illustrated with nearly 300 examples of Koch's work, this text looks beyond the - often eulogistic and uncritical - contemporary accounts of his output, to examine his work

and complex character in detail.
