Grace J. Craig, Don Baucum

**Interaction, Communication and Development** Charis Psaltis, Anna Zapiti, 2014-04-16 For decades there has been considerable interest in the ways that interactions between children can provide a beneficial context for the study of cognitive and social development. In this book Psaltis and Zapiti use both theoretical and empirical research to build on the perspectives of Piaget, Vygotsky, Moscovici, and others including the legacy of Gerard Duveen, to offer a state of the art account of research on the themes of social interaction and cognitive development. Interaction Communication and Development discusses the significance of social identities for social interaction and cognitive development. The empirical set of studies presented and discussed focus on patterns of communication between children as they work together to solve problems. Communications are examined in detail with a focus on: Socio-cognitive conflict, conversational moves and conversation types The way the different forms of the interactions relate to different sources of asymmetry in the classroom The way social representations and social identities of gender are negotiated in the interaction This book provides an important account of how children develop through different kinds of social interactions. It will have considerable appeal for researchers in the fields of developmental psychology, socio-cultural psychology, social representations theory and education who wish to gain a deeper understanding of development and its relation to socio-cultural

processes.

The Oxford Handbook of Parenting and Moral Development Deborah J. Laible, Gustavo Carlo, Laura M. Padilla Walker, 2019-09-30 The Oxford Handbook of Parenting and Moral Development provides a collection of state-of-the-art theories and research on the role that parents play in moral development. Contributors who are leaders in their fields take a comprehensive, yet nuanced approach to considering the complex links between parenting and moral development. The volume begins by providing an overview of traditional and contemporary perspectives on parenting and moral development, including perspectives related to parenting styles, domain theory, attachment theory, and evolutionary theory. In addition, there are several chapters that explore the genetic and biological influences related to parenting and moral development. The second section of the volume explores cultural and religious approaches to parenting and moral development and contributes examples of contemporary research with diverse populations such as Muslim cultures and US Latino/as. The last major section of the volume examines recent developments and approaches to parenting, including chapters on topics such as helicopter parenting, proactive parenting, parent-child conversations and disclosure, parental discipline, and other parenting practices designed to inhibit children's antisocial and aggressive behaviors. The volume draws together the most important work in the field; it is essential reading for anyone interested in parenting and moral development.

*An Introduction to Theories of Human Development* Neil J Salkind, 2004-01-22

An Introduction to Theories of Human Development provides a comprehensive view of the primary theoretical models of human development including those from the biological, psychoanalytic, behavioral, and cognitive developmental perspectives. Along with a brief discussion of a historical background for each of these approaches, this book examines the application of these theories to various aspects of human development, such as the effectiveness of early intervention, individual differences, adolescence, and sociobiology.

*Parental Development* Jack Demick, Krisanne Bursik, Rosemarie

DiBiase, 2014-02-25 This volume seeks to identify and define the parameters of a relatively new problem area -- parental development. Drawing on the grand developmental theories of Sigmund Freud, Lawrence Kohlberg, Jean Piaget, Lev Vygotsky, Heinz Werner, and their descendants, this book has the potential to generate an area of common concern for those interested in either child/adolescent or adult development through the novel application of developmental principles and considerations to the ecological context of parenting. To that end, this volume brings together theory and research from the subfields of adult and child/adolescent development. Chapter authors place the problem area of parental development in theoretical context and examine selected psychological part-processes implicated by focusing on cognitive and psychosocial development. The authors then deal with a range of issues that are perhaps less traditional and/or more in line with the complex

character of everyday life. That is, they utilize either relatively novel comparison groups or treat parents at later stages of development rather than those in young adulthood as is often the case. Finally, the authors uncover both similarities and differences among their theoretical perspectives with an eye toward delineating some possible future research directions.

**Development and Prevention of Behaviour Problems** Richard E. Tremblay, Marcel A. G. van Aken, Willem Koops, 2010-02-25 This book brings together world leading researchers from diverse fields to explore the potential causes of the development of behaviour problems. The book presents theories that hope to influence public health, education and social policy in the prevention of the costly social troubles that behaviour problems can cause. Featuring contributions from researchers whose backgrounds range from the social and behavioural sciences to economics, the varied chapters assesses the potential role of gene-environment interactions, biological factors and gender differences in the development of behaviour problems. The book includes a review of studies that attempt to understand why antisocial behaviour is concentrated within families, and concludes with three chapters that link developmental research directly with policy issues. It provides a framework for students, scientists, educators and care givers to understand where frontier research on behaviour problems is going and how it can be applied in the social, educational and health services. This collection will interest all students of psychology and the behavioural sciences as well as those with

an interest in public policy, sociology, abnormal psychology, psychopathology and personality disorders.

A Clinician's Guide to Normal Cognitive Development in Childhood Elisabeth Hollister Sandberg, Becky L. Spritz, 2011-03-17 Clinicians and practitioners-in-training can often lose sight of the normal developmental landscape that underlies behavior, especially in the field of cognitive development. It exists in an insular bubble within the broader field of psychology, and within each sub-domain there is a wide continuum between the anchors of atypical and optimal development. Clinicians need to learn, and to be reminded of, the unique peculiarities of developing cognitive skills in order to appreciate normal developmental phenomena. In A Clinician's Guide to Normal Cognitive Development in Childhood, every chapter provides students and established professionals with an accessible set of descriptions of normal childhood cognition, accompanied by suggestions for how to think about normal development in a clinical context. Each sub-topic within cognitive development is explicated through a succinct presentation of empirical data in that area, followed by a discussion of the ethical implications. With an extensive review of data and clinical practice techniques, professionals and students alike will benefit enormously from this resource.
