Evidence-Based School Development in Changing Demographic Contexts Rose M. Ylimaki,2022 This Open Access book features a school development model (Arizona Initiative for Leadership Development and Research AZiLDR) that offers a roadmap for schools to navigate the complexities of continuous school development. Filled with processes that balance evidence-based values with democratic, culturally responsive values, this book offers strategies to mediate the tensions and to address school culture, context and values, leadership capacity, using data as a source of reflection, curricular and pedagogical activity, and strengths-based approaches to meeting the needs of culturally diverse students. You will find: - Active, reflective activities - Case studies illustrating each concept - The research base supporting each concept - Descriptions of processes from other contexts (South Carolina, Germany, Australia, Sweden) - Thoughts about next steps for contextually sensitive and multi-level school development - Suggestions for cross-national dialogue and research within the Zone of Uncertainty Use this ideal source to guide school leadership teams in creating productive schools that continually grow!

Smartphones within Psychological Science David A. Ellis,2020-09-24 Psychologists can now quantify behaviours beyond the laboratory using a mass-adopted, unified system that is primed for data capture a.k.a. smartphones. This is the first book to bring together related areas of smartphone research and point towards how psychology can benefit and engage with these developments in the future. It critically considers how smartphones and related digital devices help answer and generate new research questions for psychological science. The book then guides readers through how smartphones are being used within psychology and social science more broadly. Drawing from examples of both good and bad practice within current research, a new perspective is brought to major themes and debates across behavioural science. In the digital age, smartphones and associated devices will be able to accomplish much more in the near future. Psychology has a key role to play when it comes to balancing this monumental potential with carefully considered

research.

Program Development by Refinement Emil Sekerinski, Kaisa Sere, 1999 This volume contains a collection of case studies in program refinement with the B Method. They show typical program developments from problem analysis to implementation with non-trivial examples. They cover areas for which the B Method was originally conceived as well as the following novel areas: - data structures; - information management; - process control systems; - distributed systems. This volume will primarily be of interest to practitioners who either already use B and want to improve their program refinement techniques, or those who are considering using it and want to learn about its implementation. It will also provide useful background reading for students taking courses in the B Method, Formal Specification, or Refinement.

Eighty-Eight Assignments for Development in Place Michael Lombardo, Robert Eichinger, 2018-05-01 Often people are given new positions in order to provide them with developmental experiences. But what if such a transfer is not possible? This report contains 88 assignments that can be added to a current job, offering individual developmental opportunities.

Development of the National Inventory of Family Planning Services, United States Gloria Hollis Kapantais, Donna L. Morrow, 1976

Engineering, Social Justice, and Sustainable Community Development National Academy of Engineering, Advisory Group for the Center for Engineering, Ethics, and Society, 2010-06-14 Engineering, Social Justice, and Sustainable Community Development is the first in a series of biennial workshops on the theme of engineering ethics and engineering leadership. This workshop addresses conflicting positive goals for engineering projects in impoverished areas and areas in crisis. These conflicts arise domestically as well as in international arenas. The goals of project sponsors and participants, which are often implicit, include protecting human welfare, ensuring social justice, and striving for environmental sustainability alongside the more often explicit goal of economic development or progress. The workshop, summarized in this volume, discussed how to achieve the following: Improve research in engineering ethics. Improve engineering practice in situations of crisis and conflict. Improve engineering education in ethics and social issues. Involve professional societies in these efforts.

The British Aircraft Industry and American-led Globalisation Takeshi Sakade, 2021-12-09 Sakade challenges the narrative that the focus of British manufacturing went from Empire to Europe and argues rather that, following the Second World War, the key relationship was in fact trans-Atlantic. There is a commonly accepted belief that, during the twentieth century, British manufacturing declined irreparably, that Britain lost its industrial hegemony. But this is too simplistic. In fact, in the decades after 1945, Britain staked out a new role for itself as a key participant in a US-led process of globalisation. Far from becoming merely a European player, the UK actually managed to preserve a key share in a global market, and the British defence industry was, to a large extent, successfully rehabilitated. Sakade returns to the original scholarly parameters of the decline controversy, and especially questions around post-war decline in the fields of high technology and the national defence industrial base. Using the case of the strategically critical military and civil aircraft industry, he argues that British industry remained relatively robust. A valuable read for historians of British aviation and more widely of 20th century British Industry.

Agile for Instructional Designers Megan Torrance, 2019-08-27 Discover Agile for Better Instructional Design To serve business needs amid greater volatility and uncertainty in the workplace, learning and development professionals need project

management methods that can keep up. Enter Agile. Popular in the software development space as an approach to project management, Agile when applied to instructional design provides a framework for adapting to change as it happens and for delivering the content most needed by learners. Agile for Instructional Designers proposes using Agile methodology to manage training projects and highlights where traditional linear processes have failed the business and the end users. Recognizing that software development and instructional design have different needs and outcomes, author Megan Torrance developed the LLAMATM methodology. Her approach adapts the common phases of ADDIE to incorporate the incremental, iterative nature of Agile projects. It allows learners to test and evaluate which features or design functions work before they're finalized. It also offers a way to accommodate inevitable mid-project modifications pushed by stakeholders, subject matter experts, or organizational leaders. With templates for goal alignment, learner personas, scope definition, estimating, planning, and iterative development, Agile for Instructional Designers is the resource you need to embrace change in learning and development.

Developmental Health and the Wealth of Nations Daniel P. Keating,Clyde Hertzman,2000-02-08 Probing the effects of the social environment upon human development, this volume asks how we can best support the health and well-being of infants and children in an era of rapid economic and technological change. The book presents cogent findings on human development as both an individual and a population phenomenon. Topics covered include links between socioeconomic status, achievement, and health; the impact of early experience upon brain and behavioral development; and how schools and communities can develop new kinds of learning environments to enhance adaptation and foster intellectual growth. Synthesizing developmental, biological, and social perspectives, this volume will appeal to a broad interdisciplinary audience.
