The European Conservatives and Reformists (ECR) Martin Steven, 2020-08-04 The European Conservatives and Reformists (ECR) are now established as one of the larger groups in the European Parliament and from 2014 to 2019 had more MEPs than the Liberals, Greens or radical left and right-wing factions. Despite this, ECR has so far been largely dismissed by political scientists, journalists and Brussels policy-makers as merely another Euro-sceptic faction. Representing the first major study of the political activities of ECR and its 'Euro-realist' agenda, this book argues that ECR ought to be recognised as the main voice for Conservatism in Strasbourg, promoting 'Anglosphere' free market values and the role of NATO in international relations. The book begins with an examination of the origins and early development of ECR, when British Conservative leader David Cameron established the group in a Euro-sceptic gesture to his party. Cameron failed, however, to see the isolating long-term consequences of withdrawing his MEPs from the powerful European People's Party (EPP). Other chapters examine the role of ECR member parties in its development and profile – including Law and Justice (PiS) from Poland, the Czech Civic Democrats (ODS), the New Flemish Alliance (N-VA) and the Danish People's Party (DF). Drawing on interviews with MEPs and other key figures, the book concludes with an analysis of the leadership and policy activities of ECR politicians in Brussels and Strasbourg in an attempt to measure influence.

The 2009 Elections to the European Parliament J. Lodge, 2010-09-17 An analysis of the 2009 European elections in each of the 27 member states of the newly enlarged European Union, and assessment of the European Parliament in 2004-2009. This book looks at the implications of low turnout for the future of European Union democracy and accountability.

International Populism Duncan McDonnell, Annika Werner, 2020-01-01 The 2014 European Parliament elections were hailed as a populist earthquake, with parties like the French Front National, UKIP and the Danish People's Party topping the polls in their respective countries. But what happened afterwards? Based on policy positions, voting data, and interviews conducted over three years with senior figures from fourteen radical right populist parties and their partners, this is the first major study to explain these parties' actions and alliances in the European Parliament. International Populism answers three key questions: why have radical right populists, unlike other ideological party types, long been divided in the Parliament? Why, although divisions persist, are many of them now more united than ever? And how does all this inform our understanding of the European populist radical right today? Arguing that these parties have entered a new international and transnational phase, with some trying to be respectable radicals while others embrace their shared populism, McDonnell and Werner shed new light on the past, present and future of one of the most important political phenomena of twenty-first-century Europe.

Russia and the Western Far Right Anton Shekhovtsov, 2017-09-08 The growing influence of Russia on the Western far right has been much discussed in the media recently. This book is the first detailed inquiry into what has been a neglected but critically important trend: the growing links between Russian actors and Western far right activists, publicists, ideologues, and politicians. The author uses a range of sources including interviews, video footage, leaked communications, official statements and press coverage in order to discuss both historical and contemporary Russia in terms of its relationship with the Western far right. Initial contacts between Russian political actors and Western far right activists were established in the early 1990s, but these contacts were low profile. As Moscow has become more anti-Western, these contacts have become more intense and have operated at a higher level. The book shows that the Russian establishment was first interested in using the Western far right to legitimise Moscow's politics and actions both domestically and internationally, but more recently Moscow has begun to support particular far right political forces to gain leverage on European politics and undermine the liberal-democratic consensus in the West. Contributing to ongoing scholarly debates about Russia's role in the world, its strategies aimed at securing legitimisation of Putin's regime both internationally and domestically, modern information warfare and

propaganda, far right politics and activism in the West, this book draws on theories and methods from history, political science, area studies, and media studies and will be of interest to students, scholars, activists and practitioners in these areas.

Euroscepticism as a Transnational and Pan-European Phenomenon John FitzGibbon, Benjamin Leruth, Nick Startin, 2016-08-19 As the EU enters an increasingly uncertain phase after the 2016 Brexit referendum, Euroscepticism continues to become an increasingly embedded phenomenon within party systems, non-party groups and within the media. Yet, academic literature has paid little attention to the emergence of, and increased development of, transnational and pan-European networks of EU opposition. As the 'gap' between Europe's mainstream political elites and an increasingly sceptical public has widened, pan-European spheres of opposition towards the EU have developed and evolved. The volume sets out to explain how such an innately contradictory phenomenon as transnational Euroscepticism has emerged. It draws on a variety of perspectives and case studies in a number of spheres – the European Parliament, political parties, the media, civil society and public opinion. Examining to what extent the pan-European dimension of Euroscepticism is becoming increasingly influential, it argues that opposition to European integration has for too long been viewed somewhat narrowly, through the paradigm of national party politics. This text will be of key interest to scholars, students and professionals in EU politics, European studies, political parties, and more broadly to comparative politics and international relations.

Contestation of EU Enlargement and European Neighbourhood Policy Magdalena Góra, Natasza Styczynska, Marcin Zubek, 2020-05-04 This book investigates the domestic sources of two components of the EU Foreign Policy directed toward its closest neighbourhood: the EU Enlargement and the European Neighbourhood Policy (ENP). The book employs various methodologies and approaches to uncover the main actors, arguments and arenas that are engaged in the processes of contestation, legitimization and politicisation of the EU's relations with its neighbours. In doing so, it highlights how these policies are contested by civil society, political parties and in parliamentary debates at the EU level and in member states. By implication, this volume encourages a debate on if, and how, democratic principles can operate within the EU Foreign Policy realm, and also on the effects of citizens' involvement in the external relations domain.

Legal Remedies in European Tax Law Pasquale Pistone, Group for Research on European International Taxation, 2009 Until now the topic of legal remedies in European direct tax law has been significantly underexposed within the academic tax community. This book aims at filling this gap by providing the typical approaches to European tax law with a general vision on European law, and puts together theory and practice, but also includes contributions on selected relevant issues arising in the protection of taxpayers' rights.

Data Science with R for Psychologists and Healthcare Professionals Christian Ryan, 2021-12-23 This introduction to R for students of psychology and health sciences aims to fast-track the reader through some of the most difficult aspects of learning to do data analysis and statistics. It demonstrates the benefits for reproducibility and reliability of using a programming language over commercial software packages such as SPSS. The early chapters build at a gentle pace, to give the reader confidence in moving from a point-and-click software environment, to the more robust and reliable world of statistical coding. This is a thoroughly modern and up-to-date approach using RStudio and the tidyverse. A range of R packages relevant to psychological research are discussed in detail. A great deal of research in the health sciences concerns questionnaire data, which may require recoding, aggregation and transformation before quantitative techniques and statistical analysis can be applied. R offers many useful and transparent functions to process data and check psychometric properties. These are illustrated in detail, along with a wide range of tools R affords for data visualisation. Many introductory statistics books for the health sciences rely on toy examples - in contrast, this book benefits from utilising open datasets from published psychological studies, to both motivate and demonstrate the transition from data manipulation and analysis to published report. R Markdown is becoming the preferred method for communicating in the open science community. This book also covers the detail of how to

integrate the use of R Markdown documents into the research workflow and how to use these in preparing manuscripts for publication, adhering to the latest APA style guidelines.

Advances in Machinery, Materials Science and Engineering Application IX M. Chen, M. Giorgetti, B. Jin, 2023-11-14 New engineering materials, techniques and applications are constantly being researched and developed, and keeping up to speed with the latest advances is crucial for engineers if they are to successfully address the challenges they face in their work. This book presents the selected proceedings of MMSE2023, the 9th International Conference on Advances in Machinery, Materials Science and Engineering Applications, jointly organized by the SAE-Supmeca, France and China University of Geosciences (Wuhan) and held on 22 and 23 July 2023 in Wuhan, China. For the past 12 years, this annual conference has collated recent advances and experiences, identified emerging trends and provided a platform for participants from academia and industry to exchange information and views, helping to address the world's machinery and engineering challenges. The book contains 4 sections: mechanical engineering, material science and manufacturing technology; electrical engineering, automation and control; modeling, simulation and optimization techniques in engineering; and advanced engineering technologies and applications. A total of 241 submissions were received for MMSE2023, of which 151 papers were selected for the conference and for publication by means of a rigorous international peer-review process. These papers present exciting ideas and methods that will open novel research directions for different communities. Offering a current overview of the latest research and applications in machinery and materials-science engineering, the book will be of interest to all those working in the field.

Judicial Enforcement and Implementation of European Union Law Ami Barav, 2017-11-08 The potency of the law in fostering the process of gradual European integration is easily discernable and widely acknowledged. It is largely and conspicuously revealed by the litigation before the courts of, both, the European Union and its Member States. The concern faithfully to give the European treaty the authentic meaning and scope as intended by its authors permeates the European courts' judgments, and the constant theme of the entitlement of those vested with rights conferred by the law of the European Union to effective judicial protection is omnipresent in their decisions. The law of European integration has been uncharted territory. The novelty of various issues which have arisen and on which the courts have had to pronounce springs from the originality of the integration venture and is commensurate with its uniqueness, distinctive nature and specific exigencies. The writings here assembled allow to trace the starting point since the inceptive formative years of the growth of a legal doctrine and an evolving jurisprudential edifice in several areas, to appraise their direction and constancy and to assay adjustments and adaptations.

Bridging the Prosperity Gap in the EU Ulf Bernitz, Moa Mårtensson, Thomas Persson, Lars Oxelheim, 2018 Taking an interdisciplinary approach, the authors invaluable pinpoint both overarching problems and possibilities associated with the social dimension of European integration. Prominent researchers of economics, law and political science tackle this complex issue, providing new solutions within their respective fields of expertise. Illustrating the importance of cohesion, this book is vital for those interested in comparative European studies, from backgrounds in public and social policy, law and economics.

Dictionary of European actors Elisabeth Lambert Abdelgawad, Hélène Michel, 2015-04-07 If the European political space has been extensively explored, research has remained all too often focused on the institutions of the European Union and the Council of Europe rather than on the actors who make Europe. This dictionary brings a new angle to scholarship on Europe by systematically investigating its actors: those who work within the

institutions or in close contact with them; those who are the targets of European policies; those in the name of whom reforms are carried out; those who promote Europe and those who oppose it. It showcases a comprehensive, interdisciplinary approach that bridges the usual separation between the European Union and the Council of Europe. In each entry, contributors selected among the leading specialists in their fields of research present the state of the art and the most current research perspectives on European actors. Students, teachers and researchers with an interest in Europe will find this volume to be a valuable work of reference and a source of new and stimulating ideas and perspectives on Europe. More broadly, the dictionary will appeal to 'professionals of Europe' eager to gain insights into their working environment as well as to readers interested in understanding Europe through its actors.

The Right to Damages in European Law Andrea Biondi, Martin Farley, 2009-02-15 This is the first book to present an in-depth discussion of the right of individuals to receive damages in European law. Analyzing relevant ECJ cases, the authors detail the substantive and procedural criteria that need to be satisfied in order for an individual to succeed in a claim for damages against Community institutions under Article 288 EC or against a defaulting Member State under the court-created Francovich principle.

Network Forensics Ric Messier, 2017-07-14 Intensively hands-on training for real-world network forensics Network Forensics provides a uniquely practical guide for IT and law enforcement professionals seeking a deeper understanding of cybersecurity. This book is hands-on all the way—by dissecting packets, you gain fundamental knowledge that only comes from experience. Real packet captures and log files demonstrate network traffic investigation, and the learn-by-doing approach relates the essential skills that traditional forensics investigators may not have. From network packet analysis to host artifacts to log analysis and beyond, this book emphasizes the critical techniques that bring evidence to light. Network forensics is a growing field, and is becoming increasingly central to law enforcement as cybercrime becomes more and more sophisticated. This book provides an unprecedented level of hands-on training to give investigators the skills they need. Investigate packet captures to examine network communications Locate host-based artifacts and analyze network logs Understand intrusion detection systems—and let them do the legwork Have the right architecture

and systems in place ahead of an incident Network data is always changing, and is never saved in one place; an investigator must understand how to examine data over time, which involves specialized skills that go above and beyond memory, mobile, or data forensics. Whether you're preparing for a security certification or just seeking deeper training for a law enforcement or IT role, you can only learn so much from concept; to thoroughly understand something, you need to do it. Network Forensics provides intensive hands-on practice with direct translation to real-world application.

The Emerging Constitutional Law of the European Union Adam Bodnar,Michal Kowalski,Karen Raible,Frank Schorkopf,2003-07-22 Young lawyers from different academic centres in Germany and Poland comment on the ongoing constitutional debate in the EU. Each of the more than 20 articles is dedicated to a specific theme, i.e. human rights, institutional design, current and future function of the EU, homogeneity and identity, security and defence policy, home policy and common values. Similarities as well as differences in the perspectives of an old EU Member State on the one hand and an EU Member State-to-be on the other hand are revealed.

The Interim Protection of Individuals Before the European and National Courts Dimitrios Sinaniotis,2006-01-01 This thesis focuses on the interim protection of the individual in the Community legal order. An analysis will be made of the avenues available to individuals for requesting interim relief when a case is brought before the European or the national courts. An extensive examination of the relevant case law will be performed to reveal what appears to be an evolving concept of the individual's interim protection in the European Community structure and to suggest any possible changes in order to guarantee an effective remedy of interim relief.

Powertrain Systems for a Sustainable Future Institution of Mechanical Engineers (IMechE),2023-11-02 The transport sector continues to shift towards alternative powertrains, particularly with the UK Government's focus on ending the sale of petrol and diesel passenger cars by 2030 and increasing support for alternatives. Despite this announcement, the internal combustion could continue to play a significant role both in the passenger car market through the use of hybrids and sustainable low carbon fuels including hydrogen, as well as a key role in other sectors such as heavy-duty vehicles and off-highway applications across the globe. The contributions presented at the International Conference on Powertrain Systems for a Sustainable Future 2023 (London, UK, 29- 30 November 2023) focus on the internal combustion engine's role in net-zero transport as well as covering developments in the wide range of propulsion systems available (electric, hydrogen internal combustion engines and fuel cells, sustainable fuels etc) and their associated powertrains. To achieve a sustainable future for transport across the globe we will need to deploy all technologies and so, to help understand how these might fit together, life-cycle analysis of future powertrain systems and energy will also be included. Powertrain Systems for a Sustainable Future provides a forum for engine, fuels, e-machine, fuel cell and powertrain experts to look closely at developments in powertrain technology required to meet the demands of the net-zero future and global competition in all sectors of the road transportation, off-highway, marine and stationary power industries.
