Chemometric Monitoring Madhusree Kundu,Palash Kumar Kundu,Seshu K. Damarla,2017-10-10 Data collection, compression, storage, and interpretation have become mature technologies over the years. Extraction of meaningful information from the process historical database seems to be a natural and logical choice. In view of this, the proposed book aims to apply the data driven knowledge base in ensuring safe process operation through timely detection of process abnormal and normal operating conditions, assuring product quality and analyzing biomedical signal leading to diagnostic tools. The book poses an open invitation for an interface which is required henceforth, in practical implementation of the propositions and possibilities referred in the book. It poses a challenge to the researchers in academia towards the development of more sophisticated algorithms. The proposed book also incites applications in diversified areas. Key Features: Presents discussion of several modern and popular chemometric techniques Introduces specific illustrative industrial applications using the chemometric techniques Demonstrates several applications to beverage quality monitoring Provides all the algorithms developed for the automated device design, data files, sources for biomedical signals and their pre-processing steps, and all the process models required to simulate process normal/faulty data Includes casestudy-based approach to the topics with MATLAB and SIMULINK source codes

Public Administration in the Middle East and North Africa Shahjahan Bhuiyan,2023-06-30 This book examines the status of public administration in eight countries—the United Arab Emirates (UAE), Turkey, Lebanon, Jordan, Morocco, Tunisia, Sudan, and Libya—in the Middle East and North Africa (MENA). This volume explores the issues, perspectives, traditions, and cultures that shape the operation of public administration in the region. This book also offers critical narratives on how the region's governments manage the state and statecrafts regarding their governance design. It reflects on the multiplicity of public administration structures, functions, processes, and procedures, as well as reform schemes, which are critical in achieving good governance to continuously improve the human condition in the MENA region. Public Administration in the Middle East and North Africa will be of interest to scholars, practitioners, and students concerned with the ways in which technological change, knowledge accumulation, and dissemination can increase a state's effective governance capacity. Foreword by B. Guy Peters, University of Pittsburgh is freely available to download on the Routledge website.

Arab Human Development Report 2016 United Nations Development Programme (United Nations Development Programme (UNDP)),2016-12-29 This report addresses the development challenges facing young people in the Arab region. The current young generation is the largest this region has had over the past 50 years, making up 30% of its population. In light of the youth-led movements during and after the 2011 uprisings, the report argues for a renewed policy focus on youth development in the region. It deals with the pillars of human development (income, education and health) with the attainment, achievement and equitable distribution of education, and with the challenges of finding stable and decent jobs. With protracted conflict in several Arab countries, young Arabs have become victims or perpetrators of violence, challenged by difficulties of mobility and migration. AHDR 2016 aims to engage youth in building a better future.

The Leatherback Turtle James R. Spotila, Pilar Santidrián Tomillo, 2015-10-30 The most comprehensive book ever written on leatherback sea turtles. Weighing as much as 2,000 pounds and reaching lengths of over seven feet, leatherback turtles are the world's largest reptile. These unusual sea turtles have a thick, pliable shell that helps them to withstand great depths—they can swim more than one thousand meters below the surface in search of food. And what food source sustains these goliaths? Their diet consists almost exclusively of jellyfish, a meal they crisscross the oceans to find. Leatherbacks have been declining in recent decades, and some predict they will be gone by the end of this century. Why? Because of two primary factors: human redevelopment of nesting beaches and commercial fishing. There are only twenty-nine index beaches in the world where these turtles nest, and there is immense pressure to develop most of them into homes or resorts. At the same time, longline and gill net fisheries continue to overwhelm waters frequented by leatherbacks. In *The Leatherback Turtle*, James R. Spotila and Pilar Santidrián Tomillo bring together the world's leading experts to produce a volume that reveals the biology of the leatherback while putting a spotlight on the conservation problems and solutions related to the species. The book leaves us with options: embark on the conservation strategy laid out within its pages and save one of nature's most splendid creations, or watch yet another magnificent species disappear.
