MEDINFO 2017: Precision Healthcare Through Informatics A.V. Gundlapalli,M.-C. Jaulent,D. Zhao,2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was Precision Healthcare through Informatics, and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

E-Health for Diabetes in the Western Pacific Norihiko Aoki,Yoshiharu Akazawa,Ronald LaPorte,2000 This volume discusses possible solutions contributed by specialists gathered from all over the world to identify key issues in educating the general public regarding effective and efficient strategies to fight diabetes. Educating the general public, health care workers, and decision-makers is an important approach for the prevention and control of diabetes. It is therefore appropriate that an online information network can be considered to be an effective means for communication and education. With the emergence of the information age, the use of information technology to cultivate a new e-health environment is a valuable tool. This will provide public education, information exchange, and experience sharing; support medical care, research and training; strengthen disease surveillance and support policy and program development and evaluation.
