**Qatar** Diana Galeeva,2022-05-03 This book explains the parameters of Qatar's political growth by developing an alternative theory of power – 'rented' power. The author demonstrates how Qatar's emergence as a regional power can be solely explained by its capacity as a gas-rich rentier state. By using Qatar as an empirical case study of the 'rented' power theory, readers will gain insight into Qatar's engagement with non-state actors (political Islam, tribes, media, sports, and others) to wield its power, allowing Qatar to 'rent' the well-established influence of non-state actors due to their transnational nature. The Qatari case demonstrates a state's ability to establish a patron-client relationship with non-state actors, overcoming limitations set by size or military strength to gain international influence. This book is accessible to a wide readership: it will be of interest of scholars, postgraduates, journalists, policy experts, and a general audience whose interests include the politics of the Middle East and the GCC states particularly

25 Years of India-ASEAN Economic Co-operation Vishal Sarin,2019 India has always stood for an open, equitable, predictable, non-discriminatory and rule-based international trading system. It views regional trade agreements (RTAs) as building blocks in the overall objective of trade liberalization as well as complementing the multilateral trading system under the World Trade Organization (WTO). India has been actively engaging in regional and bilateral trade negotiations with a view to diversify and expand the markets for its exports as well as ensuring access to raw materials, intermediates and capital goods for stimulating value added domestic manufacturing. India unveiled its Look East policy in 1991. East Asia (including Japan, China, South Korea and ASEAN) is today India's largest trading partner. India's engagement with the Association of Southeast Asian Nations (ASEAN) started with its Look East policy. ASEAN has a membership of 10 countries, namely Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam. India became a Sectoral Dialogue Partner of ASEAN in 1992 and Full Dialogue Partner in 1996. In November 2001, the ASEAN-India relationship was upgraded to the summit level. Heads of State/Government of the Member States of ASEAN and the Republic of India gathered in New Delhi on January 25, 2018 to commemorate the 25th Anniversary of ASEAN-India Dialogue Relations under the theme of 'Shared Values, Common Destiny'. They reaffirmed their commitment to guide ASEAN-India Dialogue Relations by the principles, shared values and norms enshrined in the Charter of the United Nations. This book traces the course of India-ASEAN economic relations, focusing on trade. It provides an in-depth analysis of trade flows between India and the ASEAN countries in recent years.

**On the Balance of Trade** David Hume,2015-12-16 David Hume (7 May 1711- 25 August 1776) was a Scottish philosopher, historian, economist, and essayist, known especially for his philosophical empiricism and skepticism. He is regarded as one of the most important figures in the history of Western philosophy and the Scottish Enlightenment. Hume is often grouped with John Locke, George Berkeley, and a handful of others as a British Empiricist. Beginning with his A Treatise of Human Nature (1739), Hume strove to create a total naturalistic science of man that examined the psychological basis of human nature. In stark opposition to the rationalists who preceded him, most notably Descartes, he concluded that desire rather than reason governed human behaviour, saying: Reason is, and ought only to be the slave of the passions. A prominent figure in the skeptical philosophical tradition and a strong empiricist, he argued against the existence of

innate ideas, concluding instead that humans have knowledge only of things they directly experience. Thus he divides perceptions between strong and lively impressions or direct sensations and fainter ideas, which are copied from impressions. He developed the position that mental behaviour is governed by custom; our use of induction, for example, is justified only by our idea of the constant conjunction of causes and effects. Hume held notoriously ambiguous views of Christianity, but he famously challenged the argument from design in his *Dialogues Concerning Natural Religion* (1779).

Explaining Post-Soviet Patchworks Klaus Segbers, 2017-10-05 This title was first published in 2001: Based on extensive research, this trilogy provides new insights into Post-Soviet transformations without taking refuge in the traditional assumption that Russia is unique. Using powerful analytical tools, this trilogy marks the re-integration of the Former Soviet Union (FSU) into the main current of political science. An invaluable resource for all those interested in Russia and the Post-Soviet states. This first volume focuses on state, sectoral, and transnational actors from a predominantly rational choice perspective. The book includes an extensive introduction by the editor which uses additional material gathered by the project team on two polls, 1999 and 2000, which, in addition to the individual studies, provide sufficient data to obtain unprecedented insights into the basic preferences and the logic of action of the main players in Russia. The outcomes of this research will be particularly relevant for students, researchers, journalists and decision-makers interested in Russia and the Post-Soviet states' politics, international relations, economics, social policy and sociology.

**Russia and the Arms Trade** Ian Anthony, Stockholm International Peace Research Institute, 1998 For this study, a group of Russian authors were commissioned to describe and assess the arms trade policies and practices of Russia under new domestic and international conditions. **World Trade Report: The WTO and Preferential Trade Agreements: From Co-Existence to Coherence** World Trade Organization, 2011-07 The ever-growing number of preferential trade agreements (PTAs) is a prominent feature of international trade. The World Trade Report 2011 describes the historical development of PTAs and the current

landscape of agreements. It examines why PTAs are established, their economic effects, and the contents of the agreements themselves. Finally it considers the interaction between PTAs and the multilateral trading system. Accumulated trade opening - at the multilateral, regional and unilateral level - has reduced the scope for offering preferential tariffs under PTAs. As a result, only a small fraction of global merchandise trade receives preferences and preferential tariffs are becoming less important in PTAs. The report reveals that more and more PTAs are going beyond preferential tariffs, with numerous non-tariff areas of a regulatory nature being included in the agreements. Global production networks may be prompting the emergence of these deep PTAs as good governance on a range of regulatory areas is far more important to these networks than further reductions in already low tariffs. Econometric evidence and case studies support this link between production networks and deep PTAs. The report ends by examining the challenge that deep PTAs present to the multilateral trading system and proposes a number of options for increasing coherence between these agreements and the trading system regulated by the WTO.
