**The Meaning of Life in the 21st Century** Don Hanlon Johnson,2008 A collection of twenty cutting-edge essays on issues raised by biotechnology's increasing impact on humans and nature, *The Meaning of Life in the 21st Century* provides a forward-looking discussion by a wide array of prominent experts on where today's scientific discoveries are taking humankind. The theme is that there are expanded perspectives for retaining unique meanings of being human in the 21st century. This collection is the result of a 2005 conference organized by the Yoko Civilization Research Institute of Japan. Organized into themes by Dr. Don Hanlon Johnson, these essays present deeply informed, sometimes conflicting views of complex issues, which, in the contemporary world, are inescapably global, including: Science and religion in a pivotal age Science, experience, and values Stem cells, embryos, and the meaning of embodiment Enhancement and transformative practices Religion and ecology: a growing alliance Bringing a diversity of prominent thinkers from several continents to the scientific, sociopolitical, and religious issues at the forefront of contemporary challenges, this collection makes clear that the world is now a community which faces these issues together. This serious, thoughtful book, rich in dialogue, provides hope for new perspectives for developing a positive, sustainable future.

**International Index to Periodicals** ,1929 An author and subject index to publications in fields of anthropology, archaeology and classical studies, economics, folklore, geography, history, language and literature, music, philosophy, political science, religion and theology, sociology and theatre arts.

Guns, Germs, and Steel: The Fates of Human Societies Jared Diamond,1999-04-17 Fascinating.... Lays a foundation for understanding human history.—Bill Gates In this artful, informative, and delightful (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

**Governance of HIV/AIDS** Sophie Harman, Franklyn Lisk, 2009-07-06 Nearly thirty years since HIV/AIDS was first identified, confusion over effective mechanisms of controlling and eradicating the illness remain prevalent. This book highlights the need for comprehensive approaches to governance, as responses to HIV/AIDS become increasingly focused upon the health aspect of the epidemic, and financial commitments become subject to aid fatigue. This book examines the roles and influence of multiple actors and initiatives that have come to constitute the global response to the epidemic. It considers how these actors and structures of governance enhance, or limit, participation and accountability; and the impact this is having upon effective HIV/AIDS responses across the world. The book addresses participation and accountability as key elements of governance in four thematic areas: the role of the state and democratic governance; non-state actors

and mechanisms of political governance; public-private partnerships and economic governance; and multilateral institutions and global governance. Drawing on the insights of public health specialists; political scientists; economists; lawyers; those working with community groups, and within international organisations, it offers valuable perspectives on the governance of HIV/AIDS. Aimed at both academics and practitioners throughout the world, this book contributes to the academic debate surrounding global governance, health and development economics, and the work of multiple international organisations and civil society organisations.
