Warming the World William D. Nordhaus,Joseph Boyer,2003-08-11 This book presents in detail a pair of models of the economics of climate change. The models, called RICE-99 (for the Regional Dynamic Integrated model of Climate and the Economy) and DICE-99 (for the Dynamic Integrated Model of Climate and the Economy) build on the authors' earlier work, particularly their RICE and DICE models of the early 1990s. Humanity is risking the health of the natural environment through a myriad of interventions, including the atmospheric emission of trace gases such as carbon dioxide, the use of ozone-depleting chemicals, the engineering of massive land-use changes, and the destruction of the habitats of many species. It is imperative that we learn to protect our common geophysical and biological resources. Although scientists have studied greenhouse warming for decades, it is only recently that society has begun to consider the economic, political, and institutional aspects of environmental intervention. To do so raises formidable challenges of data modeling, uncertainty, international coordination, and institutional design. Attempts to deal with complex scientific and

economic issues have increasingly involved the use of models to help analysts and decision makers understand likely future outcomes as well as the implications of alternative policies. This book presents in detail a pair of models of the economics of climate change. The models, called RICE-99 (for the Regional Dynamic Integrated model of Climate and the Economy) and DICE-99 (for the Dynamic Integrated Model of Climate and the Economy) build on the authors' earlier work, particularly their RICE and DICE models of the early 1990s. They can help policy makers design better economic and environmental policies.

Loaded Dice James Swain,2005-01-25 When Tony Valentine, a master at catching casino cheaters, jets to Las Vegas to look for his missing son, he lands in the middle of a dangerous turf war between rival casinos. Valentine's longtime pal then taps him to figure out how an amateur won \$25,000 at his blackjack tables. But the job is full of land mines. For starters, the suspect bears a strong resemblance to his late wife. Upping the ante, a dead stripper is found with Valentine's calling card—and her grief-stricken policeman boyfriend is vowing revenge. Yet in a city where barracudas wear pinstripes, and reality and illusion shift depending on the neon light, a greater threat maneuvers through the streets: an all-new breed of criminal with an agenda propelled by fury that will shake not only Valentine, but the city of Las Vegas itself.
