teaching activities and 40 games to use with pupils who struggle with maths is based on the author's years of experience in schools, working with dyslexic, dyspraxic and dyscalculic pupils - but all the suggested strategies are equally suitable for teaching the basics of numeracy to any pupil aged 7 to 14. The toolkit covers: - early number work with numbers under 10 - basic calculations with numbers above 10 - place value - times tables, multiplication and division The activities and games provided can be used with individuals, pairs or small groups of pupils, and the CD-rom accompanying the book contains printable and photocopiable resources.

The Encyclopaedia Britannica: Index, 1911 The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ... Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained within its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars-- The Guardian, <https://www.theguardian.com/books/booksblog/2012/apr/10/encyclopedia-britannica-11th-edition>.

While the plans cover the National Numeracy Strategy, they can also be used in any setting where maths is being taught. Topics covered include: - games and puzzles for learning number components - bridging - multiplication - division - reasoning strategies A bank of accompanying resources, games, activities and Su-Doku puzzles is available on the companion website for the book.
