**Weird Airplanes** Jim Norfolk,2001-01-01 The third in a series of model aircraft plans books, this book goes boldly into some strange designs. A twin engined aircraft the Grumman Skyrocket, the F4D Skyray, a delta winged jet, and the P 55 Assender, a pusher canard represent real planes while the Batplane a modified p 40, the X plane a glider and the weird thing from the 1936 movie Things to Come represent fantasy designs. Somehow they all work with careful trimming and building. These aircraft are designed for free flight powered with a rubber band but could adapted to a small gas or electric motor. These models are around 1/24 th scale. The Book contains a brief description of the aircraft, design, construction and trimming and flying instructions. The book is well illustrated with photos showing each step of the way to successfully building the model.
