Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Sciences Policy,Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse,2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Studies, Commission on Life Sciences, Committee on Diet and Health, 1989-01-01 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

Too Much of a Good Thing Lee Goldman, 2015-12-08 The dean of Columbia University's medical school explains why our bodies are out of sync with today's environment and how we can correct this to save our health. Over the past 200 years, human life-expectancy has approximately doubled. Yet we face soaring worldwide rates of obesity, diabetes, high blood pressure, mental illness, heart disease, and stroke. In his fascinating new book, Dr. Lee Goldman presents a radical explanation: The key protective traits that once ensured our species' survival are now the leading global causes of illness and death. Our capacity to store food, for example, lures us into overeating, and a clotting system designed to protect us from bleeding to death now directly contributes to heart attacks and strokes. A deeply compelling narrative that puts a new spin on evolutionary biology, *Too Much of a Good Thing* also provides a roadmap for getting back in sync with the modern world.

Care of People with Diabetes Trisha Dunning, 2013-11-11 *Care of People with Diabetes* is an essential guide to the care and management of people with diabetes mellitus, with particular emphasis on the acute care setting. Written by an experienced clinical nurse specialist with extensive knowledge of evidence-based diabetes care, this fully updated fourth edition serves as an essential companion to clinical practice for nurses and healthcare professionals. People with diabetes experience a high symptom and self-care burden associated with managing their condition, and require appropriate support, advice and regular monitoring. Similarly, health professionals need to maintain and keep up-to-date with an ever-increasing body of knowledge in order to help people with diabetes incorporate new research into their self-care. *Care of People with Diabetes* provides an extensive overview of the knowledge base all health professionals require to work effectively with people with diabetes. Special features: Comprehensive clinical manual on an ever-more prevalent condition, written to meet the needs of nurses and healthcare professionals Includes new material on evaluating education programmes, cystic fibrosis-related diabetes, diabetes and sleep apnoea, and end-of-life care Provides key evidence for best practice Includes protocols for consistent care and improving patient outcomes

Nutrient Requirements of Laboratory Animals, National Research Council, Board on Agriculture, Committee on Animal Nutrition, Subcommittee on Laboratory Animal Nutrition, 1995-02-01 In the years since the third edition of this indispensable reference was published, a great deal has been learned about the nutritional requirements of common laboratory species: rat, mouse, guinea pig, hamster, gerbil, and vole. The Fourth Revised Edition presents the current expert understanding of the lipid, carbohydrate, protein, mineral, vitamin, and other nutritional needs of these animals. The extensive use of tables provides easy access to a wealth of comprehensive data and resource information. The volume also provides an expanded background discussion of general dietary considerations. In addition to a more user-friendly organization, new features in this edition include: A significantly

expanded section on dietary requirements for rats, reporting substantial new findings. A new section on nutrients that are not required but that may produce beneficial results. New information on growth and reproductive performance among the most commonly used strains of rats and mice and on several hamster species. An expanded discussion of diet formulation and preparation—including sample diets of both purified and natural ingredients. New information on mineral deficiency and toxicity, including warning signs. This authoritative resource will be important to researchers, laboratory technicians, and manufacturers of laboratory animal feed.

Eat to Live Joel Fuhrman, 2011-01-05 Hailed a medical breakthrough by Dr. Mehmet Oz, Eat to Live offers a highly effective, scientifically proven way to lose weight quickly. The key to Dr. Joel Fuhrman's revolutionary six-week plan is simple: health = nutrients / calories. When the ratio of nutrients to calories in the food you eat is high, you lose weight. The more nutrient-dense food you eat, the less you crave fat, sweets, and high-caloric foods. Eat to Live has been revised to include inspiring success stories from people who have used the program to lose shockingly large amounts of weight and recover from life-threatening illnesses; Dr. Fuhrman's nutrient density index; up-to-date scientific research supporting the principles behind Dr. Fuhrman's plan; new recipes and meal ideas; and much more. This easy-to-follow, nutritionally sound diet can help anyone shed pounds quickly-and keep them off. Dr. Fuhрман's formula is simple, safe, and solid. --Body and Soul
