Author and Subject Indexes S. Böhme, Ute Esser, Professor Dr. Walter Fricke, Inge Heinrich, W. Hofmann, Dietlinde Krahn, D. Rosa, Dr. Lutz D. Schmadel, Gert Zech, 2013-11-11 Astronomy and Astrophysics Abstracts, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. According to a resolution adopted at the 14th General Assembly in 1970 it is prepared under the auspices of the International Astronomical Union. Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation in all fields of astronomy and astrophysics. It is due to the ever lasting increase of the bulk of material that the information content of our regular volumes is growing seriously. Therefore, the need for detailed index informations allowing the performance of retrospective literature searches becomes more and more important. Volume 23/24-the second General Index of Astronomy and Astrophysics Abstracts - contains author and subject indexes to volumes 11-14 and, respectively, 17-22. Thus, the astronomical and astrophysical literature of the whole five-year period 1974-1978 is covered by this volume. It is a pleasure to express our gratitude to Ms. Helga Ballmann, Ms. Monika Betz, Mr. Gernot Burkhardt, Ms. Lore Kiefert, Ms. Dagmar Roeder, Ms. Dimitra Roussou, and Mr. Werner Sanns for their kind support during the detailed preparation steps of the indexes.

Essential Oils 45 Wonderful Summer Diffuser Blends Lora Brenner, 2016-05-13 Essential Oils 45 Wonderful Summer Diffuser Blends Our mind is more powerful than we can imagine. Due to all that hustle and bustle, you maybe haven't had time to close your eyes, relax and observe how your brain creates connections between different fragrances that your nose picks up and your emotions, memories, and surroundings. Besides their numerous benefits, diffusing essential oils is a simple yet effective way to access all those connections. Moreover, taking some time to indulge yourself in aromatherapy will also help build new and positive experiences and memories. Essential oils simply explode with a whole variety of health benefits. They are praised for their antiseptic, antiviral, stimulant, antispasmodic, analgesic and all sorts of other properties. Since diffusion effectively distributes essential oil molecules into the air, this process is a great way to maximize your experience with these powerful oils. Diffusion does not only fill a room with a naturally refreshing aroma. This process of dispersing essential oil molecules across space actually scatters so many healing properties these oils possess. There are different ways to diffuse essential oils, but in this book, the focus will be on those blends that can be used in candle oil and ultrasonic diffusers. The book presents you 45 essential oil blends. Try them out and discover how essential oils can work wonders for your home and your loved ones. Principles of Colour and Appearance Measurement Asim Kumar Roy Choudhury, 2014-02-19 Colour and appearance perceptions are very complex psychological phenomena. Written by one of the foremost authorities in the field, Principles of Colour and Appearance Measurement is a major two-volume work addressing the key topics required to understand the issues and manage colour effectively. The book addresses how objects appear to viewers, how viewers perceive colour, and the major types of instrumentation used to measure colour. Chapters detail the characteristics of light sources and object colour and appearance attributes. They encompass the complexities of human visual perception, including the various causes and types of colour blindness, and other unusual visual phenomena. The book also covers colour measurement instruments and methods, as well as fluorescence and whiteness. Principles of Colour Appearance and Measurement is a comprehensive

resource for designers, colour technologists, colour quality inspectors, product developers, and anyone who uses colour in their work. Addresses the key topics required to understand the issues of colour measure and management Examines how viewers perceive colour and how objects appear to them Reviews the major types of instrumentation used to measure colour

Proceedings of the 3rd International Symposium on Orbital Disorders Amsterdam, September 5-7, 1977 G.M. Bleeker,2012-12-06 We have compiled a series of over 300 consecutive cases of unilateral exophthalmos with definitive diagnosis of the causes of disease process and an adequate follow-up period. Orbital and periorbital tumors constitute 34% of this series, inflammatory diseases including thyroid disorders 50%, arteriovenous abnormalities 4%, and miscellaneous disorders 12%. All patients were thoroughly evaluated clinically and with appropriate diagnostic tests, including ultrasonography (combined A-scan and B-scan), computerized axial tomography (EMI cranial scan), and radiographic techniques (plain films and hypocycolidal poly tomography), orbital venography, and carotid arteriography. Each test was found to have diagnostic capabilities which complemented other studies, depending upon the specific disease process involved. No one test was entirely adequate without the others. Radiographic studies demonstrated bony abnormality in 50% of tumor cases, but in only 28% of the entire series of exophthalmos cases. Primary orbital tumors had a lower yield with radiography than did secondary tumors. Computerized tomography demonstrated diagnostic soft tissue abnormality in 86% of tumors, 43% of inflammatory diseases, and an overall yield of 62% positive results. Ultrasonography proved the most versatile test for evaluation of orbital soft tissues, with 80% positive results for tumors, 87% for inflammatory disorders, and 78% overall accurate diagnosis.

Monogenic Hyperinsulinemic Hypoglycemia Disorders Charles A. Stanley,Diva D. De León,2012 Molecular mechanisms, clinical manifestations and new treatments In this volume of 'Frontiers in Diabetes' dealing with the molecular basis of monogenic disease of beta-cell insulin

regulation, world-renowned experts provide in-depth descriptions of the many recent advances in genetic defects that cause hyperinsulinemic hypoglycemia. These disorders comprise the most important form of hypoglycemia in infants and children and are associated with a high risk of morbidity, including seizures and severe brain injury. The discovery of eight different genetic loci involved in congenital hyperinsulinism has led to greatly improved methods of diagnosis and treatment. New approaches to diagnosis are highlighted, such as 18F-DOPA PET scans for preoperative localization of focal hyperinsulinism, as well as potential new treatments, such as green tea polyphenols for GDH-HI and GLP- receptor antagonists for SUR1 and Kir6.2 hyperinsulinism. Practitioners, including pediatricians and specialists in endocrinology, surgery, genetics, pathology, and radiology, will find important up-to-date information for clinical diagnosis, management, and new treatments for infants and children with congenital hyperinsulinism. Researchers will discover how genetic hyperinsulinism disorders provide novel insights into the basic mechanisms regulating insulin secretion not only in diabetics, but also in healthy humans.

The European Court of Human Rights and its Discontents Spyridon Flogaitis, Tom Zwart, Julie Fraser, 2013-01-01 The European Court of Human Rights has long been part of the most advanced human rights regime in the world. However, the Court has increasingly drawn criticism, with questions raised about its legitimacy and backlog of cases. This book for the first time brings together the critics of the Court and its proponents to debate these issues. The result is a collection which reflects balanced perspectives on the Court's successes and challenges. Judges, academics and policymakers engage constructively with the Court's criticism, developing novel pathways and strategies for the Court to adopt to increase its legitimacy, to amend procedures to reduce the backlog of applications, to improve dialogue with national authorities and courts, and to ensure compliance by member States. The solutions presented seek to ensure the Court's relevance and impact into the future and to promote the effective protection of human rights across Europe. Containing a dynamic mix of high-profile contributors from across Council of Europe member States, this book will appeal to human rights professionals, European policymakers and politicians, law and politics academics and students as well as human rights NGOs.

Radiological Imaging in Hematological Malignancies Ali Guerhazi, 2012-12-06 One of the first book's to deal specifically with imaging of the entire spectrum of hematological malignancies. The use of the latest imaging modalities is well described, and an important aspect of the book is the role of imaging techniques in differentiating between manifestations of the underlying disease and complications of treatment. Each of the 28 chapters is written by an internationally recognized expert, making this book the most current and complete treatment of this subject available. Includes many high-quality radiological and histological illustrations. It should be of great interest to radiologists and hematologists.
