Information Fusion for Cyber-Security Analytics Izzat M Alsmadi,George Karabatis,Ahmed Aleroud,2016-10-21 This book highlights several gaps that have not been addressed in existing cyber security research. It first discusses the recent attack prediction techniques that utilize one or more aspects of information to create attack prediction models. The second part is dedicated to new trends on information fusion and their applicability to cyber security; in particular, graph data analytics for cyber security, unwanted traffic detection and control based on trust management software defined networks, security in wireless sensor networks & their applications, and emerging trends in security system design using the concept of social behavioral biometric. The book guides the design of new commercialized tools that can be introduced to improve the accuracy of existing attack prediction models. Furthermore, the book advances the use of Knowledge-based Intrusion Detection Systems (IDS) to complement existing IDS technologies. It is aimed towards cyber security researchers.

Data Analytics for Cybersecurity Vandana P. Janeja,2022-07-21 Shows how traditional and nontraditional methods such as anomaly detection and time series can be extended using data analytics.

Intrusion Detection and Correlation Christopher Kruegel,Fredrik Valeur,Giovanni Vigna,2005-12-29 Details how intrusion detection works in network security with comparisons to traditional methods such as firewalls and cryptography Analyzes the challenges in interpreting and correlating Intrusion Detection alerts

Security in Wireless Sensor Networks George S. Oreku,Tamara Pazynyuk,2015-09-12 This monograph covers different aspects of sensor network security including new emerging technologies. The authors present a mathematical approach to the topic and give numerous practical examples as well as case studies to illustrate the theory. The target audience primarily comprises experts and practitioners in the field of sensor network security, but the book may also be beneficial for researchers in academia as well as for graduate students.

7th International Conference on Knowledge Management in Organizations: Service and Cloud Computing Lorna Uden,Francisco Herrera,Javier Bajo Pérez,Juan Manuel Corchado Rodríguez,2012-07-18 The seventh International Conference on Knowledge Management in Organizations (KMO) brings together researchers and developers from industry and the academic world to report on the latest scientific and technical advances on knowledge

management in organisations. KMO 2012 provides an international forum for authors to present and discuss research focused on the role of knowledge management for innovative services in industries, to shed light on recent advances in cloud computing for KM as well as to identify future directions for researching the role of knowledge management in service innovation and how cloud computing can be used to address many of the issues currently facing KM in academia and industrial sectors. The conference took place at Salamanca in Spain on the 11th-13th July in 2012.
