**Ethical Imperialism** Zachary M. Schrag, 2010-09-01 A powerful indictment of the IRB regime. University researchers in the United States seeking to observe, survey, or interview people are required first to complete ethical training courses and to submit their proposals to an institutional review board (IRB). Under current rules, IRBs have the power to deny funding, degrees, or promotion if their recommended modifications to scholars' proposals are not followed. This volume explains how this system of regulation arose and discusses its chilling effects on research in the social sciences and humanities. Zachary M. Schrag draws on original research and interviews with the key shapers of the institutional review board regime to raise important points about the effect of the IRB process on scholarship. He explores the origins and the application of these regulations and analyzes how the rules—initially crafted to protect the health and privacy of the human subjects of medical experiments—can limit even casual scholarly interactions such as a humanist interviewing a poet about his or her writing. In assessing the issue, Schrag argues that biomedical researchers and bioethicists repeatedly excluded social scientists from rule making and ignored the existing ethical traditions in nonmedical fields. Ultimately, he contends, IRBs not only threaten to polarize medical and social scientists, they also create an atmosphere wherein certain types of academics can impede and even silence others. The first work to document the troubled emergence of today's system of regulating scholarly research, *Ethical Imperialism* illuminates the problems caused by simple, universal rule making in academic and professional research. This short, smart analysis will engage scholars across academia.

### **Shaping Roman Landscape** Mantha

Zarmakoupi,2023-08-22 A groundbreaking ecocritical study that examines how ideas about the natural and built environment informed architectural and decorative trends of the Roman Late Republican and Early Imperial periods. Landscape emerged as a significant theme in the Roman Late Republican and Early Imperial periods. Writers described landscape in texts and treatises, its qualities were praised and sought out in everyday life, and contemporary perceptions of the natural and built environment, as well as ideas about nature and art, were intertwined with architectural and decorative trends. This illustrated volume examines how representations of real and depicted landscapes, and the merging of both in visual space, contributed to the creation of novel languages of art and architecture. Drawing on a diverse body of archaeological, art historical, and literary evidence, this study applies an ecocritical lens that moves beyond the limits of traditional iconography. Chapters consider, for example, how garden designs and paintings appropriated the cultures and ecosystems brought under Roman control and the ways miniature landscape paintings chronicled the transformation of the Italian shoreline with colonnaded villas, pointing to the changing relationship of humans with nature. Making a timely and original contribution to current discourses on ecology and art and architectural history, *Shaping Roman Landscape* reveals how Roman ideas of landscape, and the decorative strategies at imperial domus and villa complexes that gave these ideas shape, were richly embedded with meanings of nature, culture, and labor.

**Rules of Play** Katie Salen Tekinbas, Eric Zimmerman, 2003-09-25 An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as

important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.
