Handbook of Research on Business Model Innovation Through Disruption and Digitalization Rasmussen, Erik Stavnsager,Petersen, Nicolaj Hannesbo,2023-02-27 Digital technologies are changing both the national and global business landscapes. Digitalization within firms and industries and newcomers from other fields give new conditions for competition through new business models. The Handbook of Research on Business Model Innovation Through Disruption and Digitalization discusses the aspects of the innovation of business models through disruption and digitalization. It further includes chapters on theories and practices related to the overall theme of how business models are developed. Covering topics such as agile networks, interactive business models, and managerial implications, this major reference work is a dynamic resource for business leaders and executives, IT managers, human resource managers, entrepreneurs, government officials, students and faculty of higher education, librarians, researchers, and academicians.

Technological Imagination in the Green and Digital Transition Eugenio Arbizzani,Eliana Cangelli,Carola Clemente,Fabrizio Cumo,Francesca Giofrè,Anna Maria Giovenale,Massimo Palme,Spartaco Paris,2023-06-29 This open access book addresses the pressing need for sustainability in urban development and the use of technology, with cities to serve as the main stage for strategies that seek to meet the targets and the cross-sector priorities indicated in the EU's Next Generation program, all in pursuit of a solid recovery on the part of the European economy, along lines of ecological transition, digitalization, competitiveness, training, and inclusion to overcome social, territorial, and gender differences. The international study encounter is meant to promote

visions shared by architectural technology and other disciplines, which, though they may appear to differ, are closely interconnected, with the aim of achieving an open, interdisciplinary integration capable of proposing concrete projects regarding topics held to be of strategic importance to the future of the built environment. These are identified to draw up evolving scenarios of architecture and cities suited to reflection, at various levels, on innovative models of process and product.

Digital Technologies in Construction Engineering Sergey Vasil'yevich Klyuev,2021-11-30 This book gathers the latest advances, innovations, and applications in the field of construction engineering, as presented by researchers and engineers at the Digital Technologies in Construction Engineering conference, held in Belgorod, Russia, on June 8-9, 2021. It covers highly diverse topics, including industrial and civil construction, building materials; environmental engineering and protection; sustainability; structure safety and special construction structures. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

Building the Agile Business through Digital Transformation Neil Perkin,Peter Abraham,2017-04-03 Building the Agile Business through Digital Transformation is an in-depth look at transforming businesses so they are fit for purpose in a digitally enabled world. It is a guide for all those needing to better understand, implement and lead digital transformation in the workplace. It sets aside traditional thinking and outdated strategies to explain what steps need to be taken for an organization to become truly agile. It addresses how to build organizational velocity and establish iterative working, remove unnecessary process, embed innovation, map strategy to motivation and develop talent to succeed. Building the Agile Business through Digital Transformation provides guidance on how to set the pace and frequency for change and shows how to break old habits and

reform the behaviours of a workforce to embed digital transformation, achieve organizational agility and ensure high performance. Full of practical advice, examples and real-life insights from organizational development professionals at the leading edge of digital transformation, this book is an essential guide to building an agile business.

Cognitive Surplus Clay Shirky,2010-06-10 The author of the breakout hit Here Comes Everybody reveals how new technology is changing us for the better. In his bestselling Here Comes Everybody, Internet guru Clay Shirky provided readers with a much-needed primer for the digital age. Now, with Cognitive Surplus, he reveals how new digital technology is unleashing a torrent of creative production that will transform our world. For the first time, people are embracing new media that allow them to pool their efforts at vanishingly low cost. The results of this aggregated effort range from mind-expanding reference tools like Wikipedia to life-saving Web sites like Ushahidi.com, which allows Kenyans to report acts of violence in real time. Cognitive Surplus explores what's possible when people unite to use their intellect, energy, and time for the greater good.

Sustainable and Digital Building Florindo Gaspar,Artur Mateus,2023-04-29 This book presents the Proceedings of the International Conference on Sustainable and Digital Building, at Marinha Grande, Portugal held in October 2022. The Conference created a forum for discussion of a range topics on this broad area, including building materials, building processes, digital technologies, and building sustainability. A major focus of the collection is green building throughout a structure's life-cycle—from planning to design, construction, operation, maintenance, renovation, and demolition. In addition, the Conference examined industry making the transition to digital transformation of buildings, a key benchmark to realizing European climate goals and

achieving net-zero carbon buildings by 2050.

Structures and Architecture. A Viable Urban Perspective? Marie Frier Hvejsel,Paulo J.S. Cruz,2022-07-07 Structures and Architecture. A Viable Urban Perspective? contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture (ICSA2022, Aalborg, Denmark, 6-8 July 2022). The book (578 pages) also includes a USB with the full texts of the papers (1448 pages). The contributions on creative and scientific aspects in the conception and construction of structures as architecture, and on the role of advanced digital-, industrial- and craft -based technologies in this matter represent a critical blend of scientific, technical, and practical novelties in both fields. Hence, as part of the proceedings series Structures and Architecture, the volume adds to a continuous exploration and

development of the synergetic potentials of the fields of Structures and Architecture. With each volume further challenging the conditions, problems, and potentials related to the art, practice, and theory of teaching, researching, designing, and building structures as vehicles towards a viable architecture of the urban environment. The volumes of the series appear once every three years, in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers, practitioners, and students, including architects, structural and construction engineers, builders and building consultants, constructors, material suppliers, planners, urban designers, anthropologists, economists, sociologists, artists, product manufacturers, and other professionals involved in the design and realization of architectural, structural, and infrastructural projects.

7 Fundamentals of an Operationally Excellent Management System Chitram Lutchman,Douglas Evans,Waddah Shihab Ghanem Al Hashemi,Rohanie Maharaj,2014-12-16 Developing and maintaining a disciplined management system provides any organization with a blueprint for exceptional performance and success. Indeed, for larger multinational corporations, a management system is a critical component for sustainable growth and performance management. In this book, the authors discuss a series of fundamentals for creating an operationally excellent management system (OEMS). The book also examines the business performance impact of an OEMS across leading gas and oil organizations, such as Exxon Mobil, BP, Suncor, and Chevron. In 7 Fundamentals of an Operationally Excellent Management System, the authors discuss each fundamental in detail and provide the supporting training and workshop materials that are essential for integrating these fundamentals into the business processes of the organization. The seven fundamentals identified by the authors provide a sequential approach for developing and executing an OEMS across any

organization. Integrating sound organizational and business practices with personnel and process safety management principles, the book is an invaluable resource for organizations seeking operational discipline and excellence. Well-supported with graphics and practical examples, the book provides a simple pathway for an organization to evolve its management system into an OEMS designed to reduce workplace incidents and improve business performance on a sustainable basis. The management system principles discussed in the book are intended for the business leader who is motivated to transition his or her organization from ordinary, through best in class, to an organization of world-class stature and performance.

Geometry for Programmers Oleksandr Kaleniuk,2023-06-06 Master the math behind CAD, game engines, GIS, and more! This hands-on book teaches you the geometry used to create simulations, 3D prints, and other models of the physical world. In Geometry for Programmers you will learn how to: Speak the language of applied geometry Compose geometric transformations economically Craft custom splines for efficient curves and surface generation Pick and implement the right geometric transformations Confidently use important algorithms that operate on triangle meshes, distance functions, and voxels Geometry for Programmers guides you through the math behind graphics and modeling tools. It's full of practical examples and clear explanations that make sense even if you don't have a background in advanced math. You'll learn how basic geometry can help you avoid code layering and repetition, and even how to drive down cloud hosting costs with more efficient runtimes. Cheerful language, charts, illustrations, equations, and Python code help make geometry instantly relevant to your daily work as a developer. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Geometry is at the heart of game engines, robotics, computer-aided design, GIS, and image processing. This book

draws back what is for some a mathematical curtain, giving them insight and control over this central tool. You'll quickly see how a little geometry can help you design realistic simulations, translate the physical world into code, and even reduce your cloud services bill by improving the efficiency of graphics-intensive applications. About the Book Geometry for Programmers is both practical and entertaining. Fun illustrations and engaging examples show you how to apply geometry to real programming problems, like changing a scan into a CAD model or developing 3D printing contours from a parametric function. And don't worry if you aren't a math expert. There's no heavy theory, and you'll learn how to offload most equations to the SymPy computer algebra system. What's Inside Speak the language of applied geometry Compose geometric transformations economically Craft custom splines for efficient curves and surface generation Confidently use geometry algorithms About the Reader Examples are in Python, and all you need is high school–level math. About the Author Oleksandr Kaleniuk is the creator of Words and Buttons Online, a collection of interactive tutorials on math and programming. Table of Contents 1 Getting started 2 Terminology and jargon 3 The geometry of linear equations 4 Projective geometric transformations 5 The geometry of calculus 6 Polynomial approximation and interpolation 7 Splines 8 Nonlinear transformations and surfaces 9 The geometry of vector algebra 10 Modeling shapes with signed distance functions and surrogates 11 Modeling surfaces with boundary representations and triangle meshes 12 Modeling bodies with images and voxels

Challenges for Technology Innovation: An Agenda for the Future Fernando Moreira da Silva,Helena Maria Bártolo,Paulo Bártolo,Rita Almendra,Filipa Roseta,Henrique Amorim Almeida,Ana Cristina Lemos,2017-04-21 The world is undergoing a profound transformation, driven by radical technological changes and an accelerated globalisation process. A new culture of greater

resource efficiency and disruptive innovation will require new technologies, processes and materials, fostering new knowledge, innovation, education and a digital society, bringing forward new business opportunities and novel solutions to major societal challenges. Challenges for Technology Innovation: an Agenda for the Future is the result of the 1st International Conference on Sustainable Smart Manufacturing – S2M, held at the Faculty of Architecture in Lisbon, Portugal, on October 20-22, 2016. It contains innovative contributions in the field of Sustainable Smart Manufacturing and related topics, making a significant contribution to further development of these fields. This volume covers a wide range of topics including Design and Digital Manufacturing, Design Education, Eco Design and Innovation, Future Cities, Medicine 4.0, Smart Manufacturing, Sustainable Business Models, Sustainable Construction, Sustainable Design and Technology and Sustainable Recycling.

   Fabricate 2024 Bob Sheil,Marilena Skavara,Mette Ramsgaard Thomsen,Phil Ayres,2024-04-04 Fabricate 2024: Creating Resourceful Futures is the fifth volume in the series of Fabricate publications. The first conference – 'Making Digital Architecture' – explored the ways in which technology, design and industry are shaping the world around us. Since then, we have become finely attuned to the negative impacts of this shaping. The 2024 conference, hosted in Copenhagen, sets focus on the pressing need to develop new models for architectural production that rethink how resource is deployed, its intensity, its socio-ecological origins and sensitivity to environment. This book features the work of designers, engineers and makers operating within the built environment. It documents disruptive approaches that reconsider how fabrication can be leveraged to address our collective and entangled challenges of resource scarcity, climate emergency and burgeoning demand. Exploring case studies of completed buildings and works-in-progress, together with interviews with leading thinkers, this edition of Fabricate offers a plurality of tangible models for

design and production that set a creative and responsible course towards resourceful futures.

Sustainability and Toxicity of Building Materials Emina K. Petrović,Morten Gjerde,Fabricio Chicca,Guy Marriage,2024-02-10 Sustainability and Toxicity of Building Materials: Manufacture, Use and Disposal Stages provides a review of toxicity impacts from building materials, including the consideration of the toxicity in the extraction and manufacture of the materials and eventual dismantling and disposal. This book also offers the potential to stimulate future developments in this area, both in terms of knowledge-building and methods for future research. With the increasing emphasis on sustainable construction, it has become important to better understand the impacts of common materials. Civil and structural engineers, postgraduates, researchers as well as architects will find this book to be useful in selecting sustainable building materials.While many building and furnishing materials are safe to use, in recent decades, some have had to be redesigned due to recognition that they contained problem chemicals like formaldehyde. Unfortunately, there is still limited understanding of the toxic impacts of many synthetic chemicals which means that the risks in this area are not well recognized. With increasing interest in using limited resources more sustainably, definitions of what is sustainable should be expanded to move from the focus on energy and carbon impacts to also include more explicit consideration of toxicity impacts. Examines toxicity in the extraction and manufacturing of materials Presents the short and long-term toxicity effects of natural and manmade building materials Guides readers in selecting building materials that have a positive impact on the health of occupants and the environment

Web3 Marketing Amanda Cassatt,2023-04-04 THE ESSENTIAL WEB3 MARKETING BOOK For a limited time, claim an NFT with a copy of your book! Web3 Marketing: A Handbook for the Next Internet Revolution is the essential book for anyone looking to understand the next era of the

internet and start building. Beyond the sensational hype and headlines around crypto and NFTs, a real revolution is taking place: new technologies for owning, moving, and organizing value spell the overdue end of an internet where a few huge companies hoard data and power, and open a new frontier for products, services, and applications in which ownership and control belongs to creators, builders, and users. As former CMO of ConsenSys then Founder and CEO of top web3 marketing firm Serotonin—Amanda Cassatt is in a unique position to tell this story, and delivers a remarkably clear, nontechnical guide to the history, key concepts, and still-evolving landscape of Web3. Cassatt explains how Web3 transforms time-tested approaches to marketing and brand-building, including how to build a Web3 community. This book is a must-read for professionals at any level in their Web3 careers—already working or investing in Web3, exploring what it means for their business, or considering a jump into something new—and for anyone who wants to understand the next internet revolution.

Here Comes Everybody Clay Shirky,2008 Discusses and uses examples of how digital networks transform the ability of humans to gather and cooperate with one another.

Digital Negatives with QuadToneRIP Ron Reeder,Christina Z Anderson,2020-10-29 Digital Negatives with QuadToneRIP is a text that fully explores how the QuadToneRIP printer driver can be used to make expert digital negatives. The book takes a comprehensive, Òunder-the-hoodÓ look at how Roy Harrington's QTR printer driver can be adapted for use by artists in several different creative practice areas. The text is written from the Mac/Photoshop point of view. The book is divided into three parts. Part One is a step-by-step how-to section that will appeal to both beginning and more advanced practitioners. Part One includes quickstart guides or summary sheets for

beginning students who want to jump into using QTR before understanding all of its functional components. Part Two addresses dimroom, darkroom, and printmaking practices, walking the reader through brief workflows from negative to print for lithium palladium, gum bichromate, cyanotype, salted paper, kallitype, silver gelatin and polymer photogravure, with a sample profile for each. It also includes an introduction to a new software iteration of QTR: QuickCurve-DN (QCDN). Part Three is devoted to contemporary practitioners who explain how they use QTR in their creative practice. The book includes: A list of supplies and software needed A summary QTR glossary with a simple explanation of how each function works A sample walk-through to create a QTR profile from start to finish How to linearize profiles with simple to more exacting tools A visual guide to modifying functions Quickstart guides for many of the workflows Instructions for crafting monochrome, duotone, tricolor, and quadcolor negatives Instructions for using QTR to print silver gelatin in the darkroom Instructions for using QTR to print alternative processes in the dimroom Instructions for using QTR to print polymer photogravure in the printmaking room Introductory chapter to QuickCurve-DN software Troubleshooting common QTR problems Generic starter profiles for processes discussed Contemporary artists: their work and QTR process. Learning how to craft expert digital negatives can be a bit overwhelming at the outset. Digital Negatives with QuadToneRIP makes the process as user-friendly as possible. Like other books in the series, Digital Negatives with QuadToneRIP is thoroughly comprehensive, accessible to different levels of learner, and illustrative of the contemporary arts.

Gravel Roads Ken Skorseth,2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been more of

an art than a science and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Decoding **Digital Clay Solution Builder Kit**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its ability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Digital Clay Solution Builder Kit**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives.
