Shadows of the Dead Spencer Kope, 2020-08-25 The best tracker in the world, a man with a secret and a special set of skills, must find two nearly untraceable killers before time runs out for their victims, in Spencer Kope's *Shadows of the Dead*. A woman—abducted and found in the trunk of a car after a high-speed chase—regains consciousness in the ICU to reveal two crucial pieces of information: the man who kidnapped her is not the same as the man who left her in the woods, and she's not the first victim—in fact, she is number eight. Magnus “Steps” Craig is part of the elite three-man Special Tracking Unit of the FBI. Known for his ability to find and follow trails over any surface, Steps is called in on cases that require his unparalleled skills. But there’s a secret to his talent. Steps has a kind of synesthesia where he can see the ‘essence’ of a person—what he calls ‘shine’—on everything they’ve touched. Brought in to track the driver through a dense forest after the blood hounds have lost his trail, Steps and his

partner Jimmy find the driver laughing maniacally, babbling about souls, and hiding a pristinely maintained box of eight posed rats. Now the Special Tracking Unit must chase two villains—through not just the real world, but the dark web as well—tracking an enemy they can't see, as time runs out for the unknown victims.

The Oxford Handbook of Media, Technology, and Organization Studies Timon Beyes, 2019-11-07 Our most basic relationship with the world is one of technological mediation. Nowadays our available tools are digital, and increasingly what counts in economic, social, and cultural life is what can be digitally stored, distributed, replayed, augmented, and switched. Yet the digital remains very much materially configured, and though it now permeates nearly all human life it has not eclipsed all older technologies. This Handbook is grounded in an understanding that our technologically mediated condition is a condition of organization. It maps and theorizes the largely uncharted territory of media, technology, and organization studies. Written by scholars of organization and theorists of media and technology, the chapters focus on specific, and specifically mediating, objects that shape the practices, processes, and effects of organization. It is in this spirit that each chapter focuses on a specific technological object, such as the Battery, Clock, High Heels, Container, or Smartphone, asking the question, how does this object or process organize? In staying with the object the chapters remain committed to the everyday, empirical world, rather than being confined to established disciplinary concerns and theoretical developments. As the first sustained and systematic interrogation of the relation between technologies, media, and organization, this Handbook consolidates, deepens, and further develops the empirics and concepts required to make sense of the material forces of organization.

Rosenberg, 2011 This lively book explores the changes taking place in history and the archives as a result of new concepts, practices, and technologies. Among other issues, it raises the question of what future historical archives will be like if scholars and archivists cannot understand each others' work.

International Law's Objects Jessie Hohmann, Daniel

Joyce, 2019-01-20 International law's rich existence in the world can be illuminated by its objects. International law is often developed, conveyed, and authorized through its objects and/or their representation. From the symbolic (the regalia of the head of state and the symbols of sovereignty), to the mundane (a can of dolphin-safe tuna certified as complying with international trade standards), international legal authority can be found in the objects around us. Similarly, the practice of international law often relies on material objects or their image, both as evidence (satellite images, bones of the victims of mass atrocities) and to found authority (for instance, maps and charts). This volume considers these questions: firstly what might the study of international law through objects reveal? What might objects, rather than texts, tell us about sources, recognition of states, construction of territory, law of the sea, or international human rights law? Secondly, what might this scholarly undertaking reveal about the objects-as aims or projects-of international law? How do objects reveal, or perhaps mask, these aims, and what does this tell us about the reasons some (physical or material) objects are foregrounded, and others hidden or ignored. Thirdly what objects, icons, and symbols preoccupy the profession and academy? The personal selection of these objects by leading and emerging scholars worldwide will illuminate the contemporary and historical fascinations of international lawyers. By considering international law in the context of its material culture the authors offer a new and exciting theoretical perspective on the subject. With an image of each object reproduced

in full colour, the book will make an engaging and interesting read for scholars, practitioners, and students alike.

The Minimalist Home Joshua Becker,2018-12-18 USA TODAY BESTSELLER • A popular minimalist blogger and author of *The More of Less* shows you how to methodically turn your home into a place of peace, contentment, and purposeful living. One of today's most influential minimalist advocates takes us on a decluttering tour of our own houses and apartments, showing us how to decide what to get rid of and what to keep. He both offers practical guidelines for simplifying our lifestyle at home and addresses underlying issues that contribute to over-accumulation in the first place. The purpose is not just to create a more inviting living space. It's also to turn our life's HQ—our home—into a launching pad for a more fulfilling and productive life in the world.
