Accelerate Nicole Forsgren PhD,Jez Humble,Gene Kim,2018-03-27 Winner of the Shingo Publication Award Accelerate your organization to win in the marketplace. How can we apply technology to drive business value? For years, we've been told that the performance of software delivery teams doesn't matter—that it can't provide a competitive advantage to our companies. Through four years of groundbreaking research to include data collected from the State of DevOps reports conducted with Puppet, Dr. Nicole Forsgren, Jez Humble, and Gene Kim set out to find a way to measure software delivery performance—and what drives it—using rigorous statistical methods. This book presents both the findings and the science behind that research, making the information accessible for readers to apply in their own organizations. Readers will discover how to measure the performance of their teams, and what capabilities they should invest in to drive higher performance. This book is ideal for management at every level.

Photography and Collaboration Daniel Palmer,2020-09-14 Photography and Collaboration offers a fresh perspective on existing debates in art photography and on the act of photography in general. Unlike conventional accounts that celebrate individual photographers and their personal visions, this book investigates the idea that authorship in photography is often more complex and multiple than we imagine – involving not only various forms of partnership between photographers, but also an astonishing array of relationships with photographed subjects and viewers. Thematic chapters explore the increasing prevalence of collaborative approaches to photography among a broad range of international artists – from conceptual practices in the 1960s to the most recent digital manifestations. Positioning contemporary work in a broader historical and theoretical context, the book reveals that collaboration is an overlooked but essential dimension of the medium's development and potential.
