Surface and Destroy Michael Sturma,2011-03-25 World War II submariners rarely experienced anything as exhilarating or horrifying as the surface gun attack. Between the ocean floor and the rolling whitecaps above, submarines patrolled a dark abyss in a fusion of silence, shadows, and steel, firing

around eleven thousand torpedoes, sinking Japanese men-of-war and more than one thousand merchant ships. But the anonymity and simplicity of the stealthy torpedo attack hid the savagery of warfare -- a stark difference from the brutality of the surface gun maneuver. As the submarine shot through the surface of the water, confined sailors scrambled through the hatches armed with large-caliber guns and met the enemy face-to-face. *Surface and Destroy: The Submarine Gun War in the Pacific* reveals the nature of submarine warfare in the Pacific Ocean during World War II and investigates the challenges of facing the enemy on the surface. The surface battle amplified the realities of war, bringing submariners into close contact with survivors and potential prisoners of war. As Japan's larger ships disappeared from the Pacific theater, American submarines turned their attention to smaller craft such as patrol boats, schooners, sampans, and junks. Some officers refused to attack enemy vessels of questionable value, while others attacked reluctantly and tried to minimize casualties. Michael Sturma focuses on the submariners' reactions and attitudes toward their victims, exploring the sailors' personal standards of morality and their ability to wage total war. *Surface and Destroy* is a thorough analysis of the submariner experience and the effects of surface attacks on the war in the Pacific, offering a compelling study of the battles that became intolerably personal.

The Falklands War D. Monaghan, 1998-09-14 This book examines the debate which has long raged in Britain about the meaning of the Falklands War. Using

literary critical methods, Monaghan examines how the Thatcherite reading of the war as a myth of British greatness reborn was developed through political speeches and journalistic writing. He then goes on to discuss a number of films, plays, cartoon strips and travel books which have subverted the dominant myth by finding national metaphors of a very different kind in the Falklands War.

McPherson) The first guide to Civil War literature to appear in nearly 30 years, this book provides the most comprehensive, up-to-date, and informative survey and analysis of the vast body of Civil War literature. More than 40 essays, each by a specialist in a

particular subfield of Civil War history, offer unmatched thoroughness and discerning assessments of each work's value. The essays cover every aspect of the war from strategy, tactics, and battles to logistics, intelligence, supply, and prisoner-of-war camps, from generals and admirals to the men in the ranks, from the Atlantic to the Far West, from fighting fronts to the home front. Some sections cover civilian leaders, the economy, and foreign policy, while others deal with the causes of war and aspects of Reconstruction, including the African-American experience during and after the war. Breadth of topics is matched by breadth of genres covered. Essays discuss surveys of the war, general reference works, published and unpublished papers, diaries and letters, as well as the vast body of monographic literature, including books, dissertations, and articles. Genealogical sources, historical fiction, and video and audio recordings also receive attention. Students of the American Civil War will find this work an indispensable gateway and guide to the enormous body of information on America's pivotal experience.

Gardens of Hell Patrick Gariepy, 2014-05-15 Gardens of Hell examines the human side of one of the great tragedies of modern warfare, the Gallipoli campaign of the First World War. In February 1915, beginning with a naval attack on Turkey in the Dardanelles, a combined force of British, Australian, New Zealand, Indian, and French troops invaded the Gallipoli Peninsula only to face crushing losses and an ignominious retreat from what seemed a hopeless mission. Both sides in the battle suffered huge casualties, with a combined 127,000 servicemen killed during the action. Patrick Gariepy has pieced together the battle from combatants' own words. Drawn from diaries and letters and from stories passed down through generations of families, these firsthand accounts offer an honest, heartfelt, and sometimes painful

testimony to a doomed campaign fought by the men who lived through the fury, terror, and grief that was Gallipoli. Gardens of Hell is a sensitive acknowledgment of the enormous human cost of military folly and failure.

Representations of Classical Greece in Theme Parks Filippo Carlà-Uhink, 2020-04-16 Theme park studies is a growing field in social and cultural studies. Nonetheless, until now little attention has been dedicated to the choice of the themes represented in the parks and the strategies of their representation. This is particularly interesting when the theme is a historical one, for example ancient Greece. Which elements of classical Greece find their way into a theme park and how are they chosen and represented? What is the “entertainment” element in ancient Greek history, culture and myth, which allows its presence in commercial structures aiming to people's fun? How does the representation of Greece change against different cultural backgrounds, e.g. in different European countries, in the USA, in China? This book frames a discussion of these representations within the current debates about immersive spaces, uses of history and postmodern aesthetics, and analyses how ancient Greece has been represented and made “enjoyable” in seven different theme parks across the world, providing an original and ground-breaking contribution to theme park studies and classical reception.

Food for War Alan F. Wilt, 2001-09-20 Food for War is a ground-breaking

study of Britain's food and agricultural preparations in the 1930s as the nation once again made ready for war. Historians writing about 1930s Britain have usually focused on the Depression, appeasement, or political, military, and industrial concerns. None have dealt adequately with another significant topic, food and agriculture, as the nation moved, albeit reluctantly, from peace to war. In this new account Alan F. Wilt makes right this omission by examining in depth the relationship between food, agriculture, and the nation's preparations for war. He reveals how food and agriculture became closely linked to rearmament as early as 1936; that the government's preparations in this sector, as contrasted with other areas of the economy, were relatively well-developed when war broke out in 1936; and that rural and farm interests well understood the effect that war would have on their way of life. He argues that food and agriculture need to be integrated into the more general historical discourse, for what happened in Britain in the 1930s not only set the stage for World War II, but also contributed to a more robust agriculture in the decades that followed.
