Life in 2050 Jim Musgrave, 2015-10-28 1984 Meets Logan's Run The youth of the world have finally taken over in the futuristic SciFi adventure novel, LIFE IN 2050, by Jim Musgrave. In Musgrave's novel, old folks don't die from viruses; they get forced into a permanent dementia state to die. In Big Bro's dystopian world, citizens over 40 are given surgeries to see in black and white and to prepare them for early death. Short Listed in the Cygnus Best SciFi Awards, 2016. The Young Socialist Libertarians took over after the old order was defeated in the World Revolution of 2028. The elderly were now seen as a hindrance to present peace and prosperity. They carry disease, are non-productive, and they are remembered for the past generations of wars, greed, and famine. William must save his parents and family, who have been separated. This is a world, he discovers, where getting social security has become a reality show fight to the death, and prostitutes are safe sex androids. Who's behind Big Bro, and what will become of people of color and William's family? Read LIFE IN 2050. Up ahead stood the tall skyscraper—the only one allowed—of the Young Socialists' Ministry of Mindfulness. This was where William worked, and it was also broadcasting the libertarian message of the party, in ten-foot letters, running every ten seconds across the huge digital banner in front of the building: WAR IS IN THE PAST FREEDOM IS ALWAYS TODAY IGNORANCE IS IN WRITTEN HISTORY

The Year 2050 and Beyond Dale E. Lauffer, 2014-10-31 The time period for this book takes place in the year 2050. It gives a brief synopsis in the forward and the changes that have affected America. The central character is Dan Croquette and his life in this new world around him.

2050 Dave Borland, 2007-06 In 2040 the United States of America is officially dissolved by a Constitutional Convention. Atlantica, a new country composed of northeastern states from the U.S., acquires control of the world's largest aquifer system to gain economic concessions from surrounding countries.

2050 Dave Borland, 2007-08 In the late 20th Century, unprecedented immigration changed completely the cultural foundations of the United States. As new majorities took over, a counter migration began as Americans moved back to ancestral countries. By 2038 the country had a new demographic make up, so Congress empowered a Constitutional Convention to decide the future composition of the country. Some states chose annexation into Canada, Mexico, or Caribe, while others combined into new countries. In 2040 the United States was dissolved by Congress. Another event of the time was climate change that caused most of the United States to be draught stricken except the Northern Appalachians where the United States constructed a huge artificial aquifer. By 2050, Atlantica, a new country, controlled the aquifer and unexpectedly decided to use this water resource to gain concessions from its neighboring countries. This act violated UN mandates and threatened Hemispheric peace. This is the scenario for Kurt Sloan, who decides to escape Atlantica by hiking a long forgotten trail. His journey, filled with unexpected events and people, is woven with these natural and human changes in the world of 2050.

Election Year 2050 Sunshine G. Bruno, 2018 In the year 2050, things are vastly different. Due to an overpopulation problem, America now holds Presidential elections every two years. Those who vote for the losing candidate are executed. When Jaxon Ribelle and his wife, Olivia, vote for the wrong man, they attempt to flee the

country. But Albert Franch, the new President, isn't going to let them go without a fight.

The 2050 Initiative Mark Carven Olds,2015-11-17 The 2050 Initiative ought to summon the brightest minds and the most abundant resources available to Black People to engage in the production of resolves, resolutions, and solutions. The 2050 Initiative will invoke plans for positive actions beyond mere discussion without strategic mobility. To attract talented and skilled laborers, The 2050 Initiative will bring into being programmatic endeavors that shall transcend academic researchers or vaunted political orators. On the march toward the outcomes sought for achievement by the year 2050, The 2050 Initiative must set forth attainable benchmarks. The 2050 Initiative shall set the battle array to heal the current generation as well as to deliver total liberation to the next generation. The Black babies born in 2025 should come into a nation with the resources already set aside to fund whatever their destiny and vision can determine as total freedom. These 2025 babes will only need care and nurture in order to make an entrance on the passageway of ascendancy to visionary leadership set for 2050. The 2050 Initiative will present the vision of where Black People, African-American descendants of African slaves living in America, shall occupy collectively in areas of culture, economics, education, politics, sociology, and theology in the Year of Our Lord 2050 A.D. The 2050 Initiative shall exceed any sociopolitical manifesto. This interchange can bring to pass an inoculation for Black People against failure or desolation. The 2050 Initiative shall also serve as a vaccine that will declare preparation as the means to overcome any hurdle or obstruction. In addition, The 2050 Initiative shall build up the immune system of a people to conquer the fear of failure, while rejecting an inactive complacent inclination. The 2050 Initiative will thrust forth an active agenda. This proactive agenda has been birthed by the Spirit and shall spread from breast to breast among Black People. To some, 2050 may seem an extreme distant year, nevertheless, procrastination can eat up a half-century without anything positive having been accomplished. The 2050 Initiative shall set forth a detailed plethora that must begin immediately to reach a broad positive outcome that will inspire an entire people within the span of a single generation.

2050 Thomas E. Berry Phd,2016-05-18 Through ignorance, racism and selfish lobbies, Americans lost their freedom of speech. Fear of accusation closed the mouths of the powerful. In 2036 Isis easily created a Caliphate and introduced Sharia law. If students objected, one would be beheaded in front of a class. Rule by fear expanded. In one 5th grade class friends realized that their generation would be the last to save their beloved country. As they grew up, they studied how Lenin seized control of Russia. They decided to use his plan to save America. Cells were formed. Roger was selected leader. His girlfriend Emma was made head of supplies. Beautiful Sally collected info by working for a Mullah. Big black Harry brought in the Black panthers and the Hells Angels. Charley worked the Sharia political arena. The group developed well until a Sharia spy was exposed in their midst. They were forced into action ahead of schedule. Can they really extinguish Sharia law and restore America? Can one incredible sacrifice lead to a victory from failure? Find out!

Planet Earth 2050 Ted Unarce,2017-05-15 Ted Unarce's new book Planet Earth 2050 opens with a playful speculation on what extraterrestrials might think of us now and might think of us in 2050, depending on the outcome of the current challenges that engulf the entire global family at this point in history. In his kaleidoscopic analysis of the issues we face in the near future, it becomes clear that change is no less inevitable than at any other time in history. Shifting populations, fluctuating economies, and climate change are all considered in this planetary portrait of 2050. In his examination of diverse scenarios, this broad assessment describes the complex interplay of possibilities, both in terms of global scenarios, and local, more regional scenarios. What's certain is that it

will be a world of unprecedented changes. Megacities will become commonplace as migration from rural areas to urban areas goes on unabated. Trading blocs not familiar to the average Westerner, such as the BRIC nations (Brazil, Russia, India, and China) and the ASEAN nations (an economically linked group of countries in Southeast Asia), as well as the CIVETS nations (Colombia, Indonesia, Vietnam, Egypt, Turkey and South Africa) will grow stronger while countries in the West grow weaker, especially in Europe. What's not so certain is the impact of climate change, an increasingly recognized reality in public forums. Infrastructure will be key to anticipating and heading off the dangers of climate impact. Nations that remain passive on this issue, or too impoverished to protect themselves, will be devastated. The future of climate change and the economic well-being of humanity will be inextricable in the future. In the book's devastating conclusion, Unarce issues an urgent call to the wealthy countries to assume an environmentally ethical position to repair the damages their exploitation has imposed on the less fortunate countries.
