Rail Transport—Systems Approach Aleksander Śladowski,2017-03-08 This book shows how the systems approach is employed by scientists in various countries to solve specific problems concerning railway transport. In particular, the book describes the experiences of scientists from Romania, Germany, the Czech Republic, the UK, Russia, Ukraine, Lithuania and Poland. For many of these countries there is a problem with the historical differences between the railways. In particular, there are railways with different rail gauges, with different signaling and communication systems, with different energy supplies and, finally, with different political systems, which are reflected in the different approaches to the management of railway economies. The book's content is divided into two main parts, the first of which provides a systematic analysis of individual means of providing and maintaining rail transport. In turn, the second part addresses infrastructure and management development, with particular attention to security issues. Though primarily written for professionals involved in various problems concerning railway transport, the book will also benefit manufacturers, railway technical staff, managers, and students with transport specialties, as well as a wide range of readers interested in learning more about the current state of transport in different countries.

Empowering Consumers Task Force on the Future of the Canadian Financial Services Sector,1998 This paper addresses marketplace factors which are critical for assisting or supporting consumers of financial services in Canada. These factors are: the transparency of transactions and disclosure; privacy of personal information; redress mechanisms; non-coercive sales practices; proficiency standards; and open markets. Particular attention is paid to financial institutions (banks, trust corporations, insurance companies, credit unions) and to financial intermediaries (primarily insurance brokers and agents). The introduction includes discussion of the rationale for focusing on retail consumers and the challenge for public policy in dealing with consumer protection issues. Chapter 2 provides further context by reviewing recent broad market developments. The subsequent chapters examine each of the above factors in turn, and include comparisons with practices in other countries.

Troubled Waters Patrick Troy,2008-06-01 Australian cities have traditionally relied for their water on a 'predict-and-provide' philosophy that gives primacy to big engineering solutions. In more recent years privatised water authorities, seeking to maximise consumption and profits, have reinforced the emphasis on increasing supply. Now the cities must cope with the stresses these policies have imposed on the eco-systems from which they harvest water, into which they discharge wastes, and on which they are located. Residents are having to pay more for their water, while the cities themselves are becoming less sustainable. Must we build more dams and desalination plants, or should we be managing the demand for urban water more prudently? This book explores the demand for urban water and how it has changed in response to shifting social mores over the past century. It explains how demand for centralised provision of water might be reshaped to enable the cities to better cope with expected changes in supply as our climate changes. And it discusses the implications of property rights in water for proposals to privatise water services.

This Is Why I Hate You Onision,2015-09-11 Within these pages wait violent fights, disease, death, controversy, sexuality, tragedy and crime. This journal documents a hateful young man's path to darkness. Many events that occur are based on real events. You will find many moments from the authors own life sewn into the life of Arthur Gale. You can only go so far before all hope of return is lost; this book reaches that point, and goes even farther. James represented the light, Arthur is the dark. There is no hero. There is only Arthur.

Capitalizing on Knowledge David Skyrme,2012-06-14 Many organizations are embracing knowledge management as a source of strategic advantage. But already people are asking: what comes next? Likewise almost every large organization is heavily involved in e-commerce and turning their organizations into e-businesses. At the moment most e-commerce is focused on selling traditional products and services through the new medium of the Internet. However, the more an organization evolves into an e-business, the more they can exploit knowledge flows between themselves and their marketplace. This book draws together the two strands of knowledge and e-business into the emerging field that this book has called k-business. A k-business is one that turns an organization's knowledge assets into knowledge products and services and uses the Internet to market and deliver them online. Despite its newness, the Delphi Group have forecast that within 5 years person-to-person information e-commerce (a major aspect of k-business) will be a \$5 billion business leveraging \$50 billion in sales of other products and services. Capitalizing on Knowledge aims to give professionals and managers early insights into how to develop successful k-businesses. It takes a critical and balanced view of the building blocks of a k-business including knowledge productizing, e-commerce enablers and Internet marketing. It draws on lessons from successes and failures in the dot.com landscape and of the early pioneers of knowledge markets. The writing style engenders interest and readability supported by diagrams, screen images, check lists and frameworks. There are 'points to ponder' to stimulate thinking and decision-making. Five case studies and over 50 illustrative examples provide insights into the application of the book's concepts. No other book brings all the elements of a k-business together in one place to provide a thought provoking yet practical companion for those who want to capitalize on their knowledge.

Is there an alternative future for the public sector? This group of essays explains why.
