Disrupt Yourself Whitney Johnson, 2016-11-03 Thinkers50 Management Thinker of 2015 Whitney Johnson wants you to consider this simple, yet powerful, idea: disruptive companies and ideas upend markets by doing something truly different--they see a need, an empty space waiting to be filled, and they dare to create something for which a market may not yet exist. As president and cofounder of Rose Park Advisors' Disruptive Innovation Fund with Clayton Christensen, Johnson used the theory of disruptive innovation to invest in publicly traded stocks and private early-stage companies. In *Disrupt Yourself*, she helps you understand how the frameworks of disruptive innovation can apply to your particular path, whether you are: a self-starter ready to make a disruptive pivot in your business a high-potential individual charting your career trajectory a manager looking to instill innovative thinking amongst your team a leader facing industry changes that make for an uncertain future We are living in an era of accelerating disruption; no one is immune. Johnson makes the compelling case that managing the S-curve waves of learning and mastery is a requisite skill for the future. If you want to be successful in unexpected ways, follow your own disruptive path. Dare to innovate. Do something astonishing. Disrupt yourself.

Big Bang Disruption Larry Downes, Paul Nunes, 2014 It used to take years or even decades for disruptive innovations to dethrone dominant products and services. But now any business can be devastated virtually overnight by something better and cheaper. Software-based products are replacing physical goods. And every service provider must compete with cloud-based tools that offer customers a better way to interact. Today, start-ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what's happening. Never mind the innovator's dilemma--This is the innovator's disaster. And it's happening in nearly every industry. The good news is that any business can master the strategy of the start-ups. In our summary of 'Big Bang Disruption : Strategy in the Age of Devastating Innovation', Larry Downes and Paul Nunes identify four key stages of the new innovation life cycle, helping you spot potential disruptors in time. And they offer twelve rules for defending your markets, launching disruptors of your own, and getting out while there's still time. --Back cover.

Disruptive Innovation IntroBooks,2019-01-12 The term disruptive innovation was given in the year 1995 by Clayton M. Christensen and is regarded as one of the most influential and important innovations of the 21st century. Disruptive innovation refers to the innovation that helps in creating new market and value network in place of the existing market, and value network which leads to the disruption of the market-leading firms, alliances, and products that had already been established earlier. Each and every innovation cannot be regarded as a disruptive innovation even if they are bringing about change in the existing system. In accordance with the Theory of Disruptive Innovation, disruptive innovation has been classified into two types - low-end disruption and new-market disruption. The low-end disruption is a type of disruption that occurs when the changes within the product take place at a higher rate than the customers are able to adapt to the changes made within the product. The new-market disruption occurs when a new product emerges in the market that has not been served earlier by any of the incumbents of the industry and that fits itself within the new or emerging market segment. The process of disruptive innovation is considered important for business leaders because of the benefits that it provides to the customers of the market. A disruptive innovator provides the products at a favorable price to its customers as well as years at creating a new and improvised value of his/her product by making additional changes in the product. The process of disruptive innovation has been proven beneficial for executives also. The first disruptive innovation was encountered by the human beings in around 10,000 BC in the Middle East, and since then it has continued to take place.

Discontinuous Innovation Peter Augsdörfer, John Bessant, Kathrin Mößlein, Bettina von Stamm, Frank Piller, 2013-08-28 This book is based on the findings, issues and questions related to an ongoing decade-old research project named the Innovation Lab (www.innovation-lab.org). The research project focuses on discontinuous innovation in more than thirteen countries, most of which are European, and provides useful insights into its different challenges. It also raises several questions related to the subject, some of which are: how do firms pick up weak signals on emerging — and possibly radically different — innovation? What should firms do when these weak signals hit their “mainstream” process? What are the criteria for allocating resources to a strategic innovation project? What actions should firms take to avoid being left out by the “corporate immune system”? How should firms organize projects that often break existing rules and require new rules to be created? This book attempts to provide answers to the above mentioned questions by gathering information from the research project and also from firms that have tried exploring various ideas, models and insights to tackle discontinuous innovation. Written in a simple and accessible manner, this book will be of interest to both practitioners and academics alike.
