Archaeology Anthropology and Interstellar

Communication Douglas A. Douglas A.

Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

The GR5 Trail Paddy Dillon, 2016-01-19 An essential guidebook for walking the GR5, one of the world's most spectacular long-distance trails. The GR5 makes its way through the Alps from the shores of Lac Léman at Geneva to the Mediterranean at Nice. A route of 674km (420 miles), it can be trekked in a month, or split over a series of summer trips. The GR5 is well within the reach of fit and moderately experienced walkers and backpackers. There is good signposting and waymarking, and accommodation, food and drink are all available at regular intervals. The paths and tracks are generally well graded, while steep climbs are tackled on zigzag paths, so the overall gradient is not so severe. Every summer, thousands of walkers embark on this trek. This guidebook also describes some scenic variant routes, including the stunning GR55 through the Vanoise National Park and the delightful GR52 that crosses the Mercantour National Park. Full descriptions and maps are provided for these alternatives. The book includes daily stages, timings, ascents and descents, full-colour mapping and gradient profiles, alongside information about facilities and services along the route. The result is an ideal companion to planning and completing your trek. Two further Cicerone guidebooks cover the remaining sections of the GR5; 'The GR5 Trail - Vosges and Jura', and 'The GR5 Trail - Benelux and

Lorraine' which together cover the route from Lac Léman to the Hoek Van Holland.

The Mountain Hut Book Kev Reynolds, 2018-04-15

This book is a celebration of mountain huts, showcasing the sheer variety and sometimes quirky nature of these buildings that allow walkers, trekkers and climbers to access remote corners of the mountains. Packed with entertaining stories that bring the places and people to life, it contains descriptions of the author's favourite huts in the Alps, along with suggestions for hut-to-hut tours of 3-13 days duration, including the Tour of Mont Blanc. It also traces the history of huts and how they have evolved from the most primitive of shelters to the often purpose-built, eco-friendly buildings of today. For the uninitiated, it unravels some of the mystery of huts and explains how to use them and what facilities to expect. Above all, it illustrates the way in which mountain huts can be truly sociable places, where like-minded people can spend a night or two in the most magical of locations and share a love of wild places.
