Bottom Time Norbert Weissinger,2007-03-07 Join author Norbert Weissinger as he narrates his most memorable dives, starting with his first scuba dive while attending college, to the grueling work in the Gulf of Mexico as a commercial oilfield diver. Experience the thrills, terrors, mystifying beauty, and awful monotony of life at sea. Meet the colorful and eccentric personalities that risk their lives daily in the development of offshore oilfields. Commercial divers go under water every day to earn a living. Strangely, they enjoy the abuse of the sea, and if they survive a ten-year career, they can take home a wealth of memories about a world that few have ever seen. Bottom Time is filled with travel anecdotes, dive narratives, and vivid descriptions of the undersea world. While working on the sea floor was sometimes lonely and frightening, the author experienced sublime moments when he felt privileged to be a visitor to an alien realm. The triggerfish, tarpon, groupers, sea turtles, and barracuda became his friends, and he wished that bottom time would never end. After spending countless hours under water, the author found not only beauty and exotic marine life, but inspiration. Life spent on the bottom is truly living in the moment, where past and future dissolve, and nothing matters but a breath.

Best Dives of the Western Hemisphere Joyce Huber,Jon Huber,1999 Includes: Atlantic (Bahamas, Turks & Caicos, Bermuda, Florida Keys); Caribbean (Barbados, Bonaire, British Virgin Islands, Cayman Islands, Cozumel, Curacao, United States Virgin Islands); Central America (Belize); South America (Brazil); Pacific (Channel Islands Marine Sanctuary, Santa Catalina, Galapagos, Hawaii).

Hell Or High Water Mark Rainbolt,2012-08-17 I learned to dive in the mid 70's by reading a short book about diving. Then my brother told me to NOT hold my breath and swim. My first dive was a solo dive in a stone quarry in Indiana. The next few years I got formal training and worked through the ranks to instructor. I worked as a YMCA and PADI instructor in Florida for several years before going to the West coast to train instructors at PADI College. In the mid 80's I was hired by Werner and Myra Kurn to work as the Director of Training at Ocean Enterprises in San Diego, and trained instructors at Ocean Enterprises in Guantanamo Bay Cuba. I worked as a PADI Instructor examiner for more than 20 years and have more than 5000 dives.

Scuba Diver's Log Book aquaCorp,2017-06-14 Scuba Diving Log - Fantastic diver's log book for recording 50 dives - designed by Professional Scuba Instructors - Suitable for divers of all levels and training agencies - Record all key information and notes - High Quality

The Recreational Diver Achim R. Schlöffel,Michael Creutzner,2015-09-23 The Recreational Diver was chosen with care. We think that „recreational diving“ describes our activity much better than „Sport diving“ as it is for people who want to become divers and not for those who want to try diving. There is a gap to close. A gap in training, that has been weakened by greed. A gap in the training material that is outdated and a gap in the actual training, that is getting easier and easier, to be able to sell it to an even broader range of potential customers. No matter if they have the physical and mental prerequisites for the sport. It is time for a new training system, where quality is more important than quantity and where the individual is more important than the size of the course. Have a good dive.

Diving Guide to Underwater Florida Ned Deloach,1993-07 Maps and directions for 500 of Florida's best ocean and spring dives.

Gulf. A detailed index, numerous photos, and tourism contacts are included. This comprehensive book features artificial reef loran numbers, fresh water springs and caves, inshore flats and channels, reefs and barrier islands, back country estuaries and Gulf stream passes.

Scuba James A. Lapenta, 2016-11-10 Building on his first book, SCUBA: A Practical Guide for the New Diver, James Lapenta addresses what is most often the next step in diver training. Advanced Level or Advanced Open Water training is often taken by divers to gain additional skills and knowledge. It is also taken to allow them to gain access to more challenging dives and dive sites. These also pose a greater degree of risk to the individual. Unfortunately some advanced classes are no more than a taste or tour of advanced level dives. The divers do not get the new knowledge and skills required to safely embark on these dives. In order to safely pursue these dives James has outlined the steps to take to reduce the risk of injury and worse. From describing the dives to offering advice on the content one should expect, as well as selecting an instructor, he offers new and not so new divers guidance. Additional sections on equipment options, air supply management, dive planning, and dive selection for maximum learning potential are looked at. Also included is a section on a subject often overlooked in recreational SCUBA diving - the after-effects of a diving accident and rescue/recovery on the rescuer and witnesses to the event. Post Traumatic Stress in Recreational Dive Rescues is a real possibility and one that must be looked at when executing dives with greater risk. Safety in training and after training is the heart of this work and the driving force behind its publication. James has experienced the best in training and that which left something to be desired. He gives examples of both throughout the work. If you do not have his first book, it is highly recommended that you also acquire it as a companion to this one. While they do contain some sections of the same information, there are sections in the first book that are not included in this that are highly beneficial.

Diver Down Michael Ange, 2005-10-18 One diver, after a seemingly brief period below the surface, discovers that his gas supply has run perilously low. Another, paralyzed, bobs helplessly on the surface, and when a poorly trained divemaster attempts rescue, things go from bad to worse. Two other divers, fascinated by the bountiful undersea life of the Caribbean, fail to notice that a powerful current is sweeping them rapidly away from their unattended boat.

These are just a few of the true stories you'll find in *Diver Down*, most of them involving diver error and resulting in serious injury or death. Each of these tales is accompanied by an in-depth analysis of what went wrong and how you can recognize, avoid, and respond to similar underwater calamities. This unique survival guide explores the gamut of diving situations, including cave and wreck diving, deep-water dives, river and drift diving, decompression sickness, and much more. It shows you how to prevent tragic mishaps through: Inspection and maintenance of primary and secondary diving gear Learning and following established safety protocols Confirming the training and credentials of diving professionals Practicing emergency responses under real-world conditions
