The Changing Postal Environment Pier Luigi Parcu, Timothy J. Brennan, Victor Glass, 2020-04-06 This book addresses major issues facing postal and delivery services throughout the world. Worldwide, there is currently a considerable amount of interest in postal and delivery economics. The industry is reacting to a state of near crisis and is implementing different drastic changes. The European Commission and member States are still wrestling with the problem of how to implement entry liberalization into postal markets, how to address digital competition, and how to maintain the Universal Service Obligation (USO). Digitalization, technological development and online platforms are strongly affecting both the way postal and delivery operators are managing their services, as well as their role on the market. Strong emphasis was attributed to the assets of Postal Operators (POs) and their added value in the digital age, as well as on new business strategies. This volume presents original essays by prominent researchers in the field, selected and edited from papers presented at the 27th Conference on Postal and Delivery Economics held in Dublin, Ireland, 22-25 May, 2019. Topics addressed by this volume include the fragmentation of the postal supply chain, blockchain and digital postal services, and the fading of traditional postal market boundaries. This book will be a useful tool not only for graduate students and professors, but also for postal administrations, consulting firms, and federal government departments.

**Play Holdem Poker Like a Bookie** John "The Engineer" Turmel, 2010-07-22 Playing Holdem Poker like a Bookie means calling all overlays and folding all underlays so determining the overlay/underlay cut point is crucial. Online players use online calculators dozens of times every hour to get the overlay/underlay cut points for their pair, flush, and/or straight draw potentials but David Sklansky has shown how it's almost impossible to do in a live game when combining just two features takes 7 steps, three features takes 9. Poker Systems Engineering Taj Professor John Great Canadian Gambler Turmel has published the Turmel-Two-Step in-head calculator for approximating the win/lose cut point in only two steps. No Division, No Multiplication to master the Turmel-Two-Step. The Turmel-Two-Step Holdem Call Odds System Study Course & Exercise Book includes over 15,000 distinct random hands to exercise counting outs. Visit: [johnnturmel.com](http://johnnturmel.com)

**Anarchy in Action** Colin Ward, 2018-01-15 The argument of this book is that an anarchist society, a society which organizes itself without authority, is always in existence, like a seed beneath the snow, buried under the weight of the state and its bureaucracy, capitalism and its waste, privilege and its injustices, nationalism and its suicidal loyalties, religious differences and their superstitious separatism. Anarchist ideas are so much at variance with ordinary political assumptions and the solutions anarchists offer so remote, that all too often people find it hard to take anarchism seriously. This classic text is an attempt to bridge the gap between the present reality and anarchist aspirations, "between what is and what, according to the anarchists, might be." Through a wide-ranging analysis—drawing on examples from education, urban planning, welfare, housing, the environment, the workplace, and the family, to name but a few—Colin Ward demonstrates that the roots of anarchist practice are not so alien or quixotic as they might at first seem but lie precisely in the ways that people have always tended to organize themselves when left alone to do so. The result is both an accessible introduction for those new to anarchism and pause for thought for those who are too quick to dismiss it. For more than thirty years, in over thirty books, Colin Ward patiently explained anarchist solutions to everything from vandalism to climate change—and celebrated unofficial uses of the landscape as commons, from holiday camps to squatter communities. Ward was an anarchist journalist and editor for almost sixty years, most famously editing the journal *Anarchy*. He was also a columnist for *New Statesman*, *New Society*, *Freedom*, and *Town and Country Planning*.

DIY U Anya Kamenetz, 2010-04-01 The price of college tuition has increased more than any other major good or service for the last twenty years. Nine out of ten American high school seniors aspire to go to college, yet the United States has fallen from world leader to only the tenth most educated nation. Almost half of college students don't graduate; those who do have unprecedented levels of federal and private student loan debt, which constitutes a credit bubble similar to the mortgage crisis. The system particularly fails the first-generation, the low-income, and students of color who predominate in coming generations. What we need to know is changing more quickly than ever, and a rising tide of information threatens to swamp knowledge and wisdom. America cannot regain its economic and cultural leadership with an increasingly ignorant population. Our choice is clear: Radically change the way higher education is delivered, or resign ourselves to never having enough of it. The roots of the words university and college both mean community. In the age of constant connectedness and social media, it's time for the monolithic, millennium-old, ivy-covered walls to undergo a phase change into something much lighter, more permeable, and fluid. The future lies in personal learning networks and paths, learning that blends experiential and digital approaches, and free and open-source educational models. Increasingly, you will decide what, when, where, and with whom you want to learn, and you will learn by doing. The university is the cathedral of modernity and rationality, and with our whole civilization in crisis, we are poised on the brink of Reformation.

**On Education** Zygmunt Bauman, Riccardo Mazzeo, 2013-04-25 What is the role of education in a world where we no longer have a clear vision of the future and where the idea of a single, universal model of humanity seems like the residue of a bygone age? What role should educators play in a world where young people find themselves faced with deep uncertainty about their future, where the prospects of securing a stable, long-term career seem increasingly remote and where intensified population movements have created more diverse communities in which different cultures find themselves living side by side, no longer bound together by the belief that the other would eventually be assimilated into 'our' culture? Faced with the bewildering features of our liquid modern world, many young people are inclined to withdraw - in some cases into the online world of games and virtual relationships, in other cases into anorexia, depression, alcohol or even drug abuse, hoping to find shelter from a world perceived as more and more dangerous. Others launch into more violent forms of behaviour, like street gangs and the looting carried out by young people who have been excluded from the temples of consumption but are eager to participate in the ceremony. And all this happens while our politicians look on, uncomprehending and indifferent. In this short book Zygmunt Bauman - the leading social theorist of our liquid modern world, here in conversation with Riccardo Mazzeo - reflects on the predicament of young people today and on the role of education and the educator in a world where the certainties of our predecessors can no longer be taken for

granted.

*Ubiquitous Learning* Bill Cope, Mary Kalantzis, 2010-10-01 This collection seeks to define the emerging field of ubiquitous learning, an educational paradigm made possible in part by the omnipresence of digital media, supporting new modes of knowledge creation, communication, and access. As new media empower practically anyone to produce and disseminate knowledge, learning can now occur at any time and any place. The essays in this volume present key concepts, contextual factors, and current practices in this new field. Contributors are Simon J. Appleford, Patrick Berry, Jack Brighton, Bertram C. Bruce, Amber Buck, Nicholas C. Burbules, Orville Vernon Burton, Timothy Cash, Bill Cope, Alan Craig, Lisa Bouillion Diaz, Elizabeth M. Delacruz, Steve Downey, Guy Garnett, Steven E. Gump, Gail E. *Economy and Society* Talcot Parsons, Neil Smelser, 2005-07-12 This volume is designed as a contribution to the synthesis of theory in economics and sociology. We believe that the degree of separation between these two disciplines separation emphasized by intellectual traditions and present institutional arrangements arbitrarily conceals a degree of intrinsic intimacy between them which must be brought to the attention of the respective professional groups.

**Peeragogy Handbook**, 2016-01-01 The Peeragogy Handbook isn't a normal book. It is an evolving guide, and it tells a collaboratively written story that you can help write. It is a living document, and we've released a new version every year as we improve the material. We've built the book collaboratively online. At any given moment the latest version is available on peeragogy.org and the source is at git.io/Handbook. You can comment on each page in the online edition. And you can talk directly with the contributors and connect with others who are interested in applying peeragogy in the Peeragogy in Action community on G+. But the print edition lets you do some things that the web doesn't. Get out a pen or pencil and mark it up as you read - underline, or cross things out. Ask questions and think about how things could be said better or how the ideas could be made more effective. And get back to us with your ideas for the next edition. We're not being lazy - this is what we've been doing ourselves for three years! To make it easier to dive into the content, we're kicking things off with a short workbook that contains a concise guide to the who, what, when, where, how and why of peeragogy. We've also updated our pattern catalog, added more case studies, and made numerous small improvements to the text throughout.
