*Cold War Crossings* Patryk Babiracki, Kenyon

Zimmer, 2014-03-20 Approaching the early decades of the “Iron Curtain” with new questions and perspectives, this important book examines the political and cultural implications of the communists’ international initiatives. Building on recent scholarship and working from new archival sources, the seven contributors to this volume study various effects of international outreach—personal, technological, and cultural—on the population and politics of the Soviet bloc. Several authors analyze lesser-known complications of East-West exchange; others show the contradictory nature of Moscow’s efforts to consolidate its sphere of influence in Eastern Europe and in the Third World. An outgrowth of the forty-sixth annual Walter Prescott Webb Lectures, hosted in 2011 by the University of Texas at Arlington, *Cold War Crossings* features diverse focuses with a unifying theme.

**Raphael** Konrad Oberhuber, 1999 Elegance diligence, and good manners were the characteristics attributed to Raphael by his contemporaries, in whose presence all bad emotions melted away (Vasari). The author explores the short but intensive life and

work of this mortal god, from the formative period at the refined court of Urbino, through contacts with the lively artistic centres of Umbria and Florence, to the fertile years in the Rome of Julius II and Leo X. Written over a period of many years, and supplemented by the results of recent research, this highly illustrated volume by the internationally known scholar Konrad Oberhuber, provides a unique and much needed, in-depth study of Raphael's painting.

*Thank You, Comrade Stalin!* Jeffrey Brooks, 2021-04-13 Thank you, our Stalin, for a happy childhood. Thank you, dear Marshal [Stalin], for our freedom, for our children's happiness, for life. Between the Russian Revolution and the Cold War, Soviet public culture was so dominated by the power of the state that slogans like these appeared routinely in newspapers, on posters, and in government proclamations. In this penetrating historical study, Jeffrey Brooks draws on years of research into the most influential and widely circulated Russian newspapers--including Pravda, Izvestiia, and the army paper Red Star--to explain the origins, the nature, and the effects of this unrelenting idealization of the state, the Communist Party, and the leader. Brooks shows how, beginning with Lenin, the Communists established a state monopoly of the media that absorbed literature, art, and science into a stylized and ritualistic public culture--a form of political performance that became its own reality and excluded other forms of public reflection. He presents and explains scores of self-congratulatory newspaper articles, including tales of Stalin's supposed achievements and virtue, accounts of the country's allegedly dynamic economy, and warnings about the decadence

and cruelty of the capitalist West. Brooks pays particular attention to the role of the press in the reconstruction of the Soviet cultural system to meet the Nazi threat during World War II and in the transformation of national identity from its early revolutionary internationalism to the ideology of the Cold War. He concludes that the country's one-sided public discourse and the pervasive idea that citizens owed the leader gratitude for the gifts of goods and services led ultimately to the inability of late Soviet Communism to diagnose its own ills, prepare alternative policies, and adjust to new realities. The first historical work to explore the close relationship between language and the implementation of the Stalinist-Leninist program, *Thank You, Comrade Stalin!* is a compelling account of Soviet public culture as reflected through the country's press.
