Lebanese Place-names Elie Wardini, 2002 The present volume covers some 1724 Lebanese place-names in the districts of Mount Lebanon and North Lebanon. The aim has been to: a) establish a database of place-names based on fieldwork; b) present the etymologies of these names based on the latest findings in Semitic lexicography, onomastics and dialectology; and c) plot the results across the Lebanese territory. analysis of the place-names, focusing on language, geography and society, tends to confirm that language and religion shifts in Lebanon were gradual. Nearly 49 are Phoenician. The traditional dividing lines between religious groups are only slightly reflected in place-names. These groups seem to have had a similar sociocultural development. The landscape holds a central position in Lebanese place-names. Water, human occupation, religion and the family also hold a prominent position

Handbook of Proof Theory S.R. Buss, 1998-07-09 This volume contains articles covering a broad spectrum of proof theory, with an emphasis on its mathematical aspects. The articles should not only be interesting to specialists of proof theory, but should also be accessible to a diverse audience, including logicians, mathematicians, computer scientists and philosophers. Many of the central topics of proof theory have been included in a self-contained expository of articles, covered in great detail and depth. The chapters are arranged so that the two introductory articles come first; these are then followed by articles from core classical areas of proof theory; the handbook concludes with articles that deal with topics closely related to computer science.

Toward Effective Cyber Defense in Accordance with the Rules of Law A. Brill, K. Misheva, M. Hadji-Janev, 2020-06-18 Information and communication technologies now play a big part in the daily personal and professional lives of us all. Cyberspace – the interconnected digital technology domain which underlies communications, transportation, state administration, finance, medicine and education – is part of all our lives. In the last decade, the digital revolution in the South Eastern European (SEE) countries has given more people there access to communication, education, and news than ever before, and we should not underestimate the power of these information and communication technologies. This book presents papers from the NATO Science for Peace and Security Advanced Training Course (ATC) Toward Effective Cyber Defense in Accordance With the Rules of Law, held in Ohrid, Republic of North Macedonia, in November 2019. The course focused on the SEE countries, where, in general, governments have paid appropriate attention to developing cyber defense capacities. In some cases, however, limitations in technological resources have restricted the capabilities of governments to respond to the ever-evolving challenges of defending the cyber domain. Laws and regulations differ from country to country, and the topics covered here were carefully chosen to cover issues in laws and regulations, cyber defense policies and their practical implementation. The series of papers presented in this book will provide a deeper understanding of these topics for scholars, associated professionals in the public and private sectors, and for a more general audience.
