Katie Willis

Early Identification of Risk Factors for Parental Abduction ,2001 The Office of Juvenile Justice and Delinquency Prevention of the U.S. Department of Justice presents the full text of a bulletin entitled Early Identification of Risk Factors for Parental Abduction, published in March 2001. The bulletin discusses the risk factors associated with parental kidnapping and strategies that may be used to intervene with families at greatest risk. The bulletin highlights research findings related to the risk factors and the effectiveness of the legal system's response to family abduction.

Theories and Practices of Development Katie Willis,2005 Throughout the twentieth century, governments sought to achieve 'development' not only in their own countries, but also in other regions of the world; particularly in Africa, Asia, Latin America and the Caribbean. This focus on 'development' as a goal has continued into the twenty-first century, for example through the United Nations Millennium Development Targets. While development is often viewed as something very positive, it is also very important to consider the possible detrimental effects it may have on the natural environment, different social groups and on the cohesion and stability of societies. In this important book, Katie Willis investigates and places in a historical context, the development theories behind contemporary debates such as globalization and transnationalism. The main definitions of 'development' and 'development theory' are outlined with a description and explanation of how approaches have changed over time. The differing explanations of inequalities in development, both spatially and socially, and the reasoning behind different development policies are also considered. By drawing on pre-twentieth century European development theories and examining current policies in Europe and the USA, the book not only stresses commonalities in development theorizing over time and space, but also the importance of context in theory construction. This topical book provides an ideal introduction to development theories for students in geography, development studies, area studies, anthropology and sociology. It contains student-friendly features, including boxed case studies with examples, definitions, summary sections, suggestions for further reading, discussion questions and website information.

Teaching Civic Engagement Alison Rios Millett McCartney,Elizabeth A. Bennion,Dick W. Simpson,2013 Teaching Civic Engagement provides an exploration of key theoretical discussions, innovative ideas, and best practices in educating citizens in the 21st century. The book addresses theoretical debates over the place of civic engagement education in Political Science. It offers pedagogical examples in several sub-fields, including evidence of their effectiveness and models of appropriate assessment. Written by political scientists from a range of institutions and subfields, Teaching Civic Engagement makes the case that civic and political engagement should be a central part of our mission as a discipline.

Poverty Reduction and Growth ,2006-01-01 That raising income levels alleviates poverty, and that economic growth can be more or less effective in doing so, is well known and has received renewed attention in the search for pro-poor growth. What is less well explored is the reverse channel: that poverty may, in fact, be part of the reason for a country's poor growth performance. This more elaborated view of the development process opens the door to the existence of vicious circles in which low growth results in high poverty and high poverty in turn results in low growth. Poverty Reduction and Growth is about the existence of these vicious circles in Latin America and the Caribbean about the ways and means to convert them into virtuous circles in which poverty reduction and high growth reinforce each other. Through its analysis of fresh data and the attention it pays to issues such as the persistent inequality in the region, the role played by various microdeterminants of income, and the potential existence of human capital underinvestment traps, this title should be a valuable contribution to the current regional debate on poverty and growth, a debate that is critical to the design of policies conducive to enhancing welfare in all its dimensions among the poor of Latin America and the Caribbean.

One Man's Everest Kenton Cool,2015-08-27 Kenton Cool is the finest alpine climber of this generation. His accomplishments are staggering. He has summited Everest twelve times. He is the first person in history to climb the three Everest peaks, the so-called Triple Crown, in one climb, a feat previously thought impossible. He was nominated for the prestigious piolet d'Or in 2004 for climbing a previously unclimbed route on Annapurna III. In 2012 he fulfilled the Olympic Games pledge of placing a 1924 gold medal on the Everest summit. He is the only Briton to have skied down two 8000-metre mountains, and in 2009 he guided Sir Ranulph Fiennes to the summit of Everest, helping to raise over £3 million for Marie Curie Cancer Care. His accomplishments are all the more extraordinary considering an incident in the summer of 1996 which tore Kenton's world apart. Whilst climbing in Wales, he broke a handhold on a route aptly called 'Major Headstress' and fell to the ground with such force that he shattered both his heel bones. Initially told he would never walk unaided again, Kenton spent four weeks in hospital, had three operations, three and a half months in a wheelchair and months of rehab. Today he is still in pain and after a long day in the mountains it's not uncommon to see him struggling to walk or moving around on his hands and knees. Yet he still climbs. 'Why do you do it?' people ask him. This book tells why.

Renewables David Elliott,2019 Renewable energy is a rapidly expanding field, welcomed by many as part of the answer to climate change and energy security concerns. This book offers a comprehensive, authoritative and up-to-date overview of this globally-expanding field, including a thorough review of fluid-driven mechanical power, heat-based systems and light conversion. It also examines the challenges involved with the unpredictable nature of renewable energy sources, and how these variable energy inputs can be balanced and integrated into a viable energy supply system. Finally, the book discusses both the developing technologies and support policies from around the world. This second edition has been extensively revised and updated and remains an invaluable reference text for scientists and professionals

involved with the technology, policy and implementation of renewable energy. It is essential reading for renewable energy courses. Part of IOP Series in Renewable and Sustainable Power.

One Mountain Thousand Summits Freddie Wilkinson,2010-07-06 The account of one of the deadliest and most mysterious tragedies in mountaineering history-the 2008 K2 disaster. One Mountain Thousand Summits reveals the true story of the K2 tragedy that claimed the lives of eleven men. Based on his numerous trips to Nepal and in-depth interviews he conducted with the survivors, the families of the lost climbers, and the Sherpa guides whose heroic efforts saved the lives of at least four climbers, Freddie Wilkinson's narrative uncovers what actually occurred on the mountain, while delivering a criticism of the mainstream press's incomplete coverage of the event, and an insightful look into the lives of the six Sherpas who were involved.

Mastering Purchasing Management for Inbound Supply Chains Thomas A. Cook,2016-04-19 Importing finished products, components, and raw materials has become the status quo in today's increasingly competitive business landscape. The lessons of inbound supply, however, can be very costly if learned through a trial-and-error approach-especially foreign purchasing. By not understanding the parameters of landed costs alone, purchasing managers can cause serious and expensive disruptions to their supply chain. Leaving little to chance, Mastering Purchasing Management for Inbound Supply Chains details the fundamentals regarding logistics and compliance. It emphasizes the importance of bonded warehouses and cost modeling and presents case studies from a wide range of industries that illustrate best practices in imports, logistics, and landed cost modeling. International trade expert Thomas Cook provides valuable insights for avoiding common foreign trade zone pitfalls. He also explains the best ways to handle and minimize landed costs, including duties, shipping costs, and transfer pricing. This comprehensive purchasing guide covers the potential risks and complications involved with U.S. Customs (CBP), freight, INCO terms, and title and payment issues. Complete with a multitude of references to additional information in print and on the Web, the text provides the well-rounded understanding needed to avoid costly mistakes and make purchasing one of the strongest links in your global supply chain.

Let the Crazy Child Write! Clive Matson,2011-02-08 Twelve lively, in-depth chapters reveal how following our untrained impulses – our creative unconscious or Crazy Child – gives an authentic grasp on writing stories, poems, plays, and essays. Let the Crazy Child Write! introduces exercises that explicitly tap this knowledge and also presents guidelines on how to

give, and receive, constructive feedback. This is the first how-to-write text to give full credit to the creative unconscious since *Becoming a Writer*, the 1934 classic by Dorothea Brande. Matson goes further by developing writing techniques step by step: Image Detail, Slow Motion, Hook, Persona Writing, Point of View, Dialogue, Plot, Narrative Presence, Good Clichés, Character, Surrealism, and Resolution.
