The Poor Raul Brandão, 2016 *The Poor* (Os Pobres, 1906), by Portuguese author Raúl Brandão is a powerful tribute to the underclasses. Innovative thematically and stylistically, the novel consists of loosely connected vignettes on two narrative levels: the lives of prostitutes, where the inexorable need for love is transformed into a means for survival; and the life of Gebo, a seemingly slovenly man, with neither sentiment nor intelligence. Instead, as he searches tirelessly for work -- and loves his daughter and wife with tenderness and constancy -- he is revealed as a victim of the economic situation in Portugal. With prescience, Brandão emphasizes the interdependence between nature and humankind by intertwining descriptions of the physical and human surroundings, while his depictions of desperation, sorrow and violence prefigure the works of contemporary Portuguese writers.

Climate Rationality Jason S. Johnston, 2021-08-19 Most environmental statutes passed since 1970 have endorsed a pragmatic or 'precautionary' principle under which the existence of a significant risk is enough to trigger regulation. At the same time, targets of such regulation have often argued on grounds of inefficiency that the associated costs outweigh any potential benefits. In this work, Jason Johnston unpacks and critiques the legal, economic, and scientific basis for precautionary climate policies pursued in the United States and in doing so sheds light on why the global warming policy debate has become increasingly bitter and disconnected from both climate science and economics. Johnston analyzes the most influential international climate science assessment organizations, the US electric power industry, and land management and renewable energy policies. Bridging sound economics and climate science, this pathbreaking book shows how the United States can efficiently adapt to a changing climate while radically reducing

greenhouse gas emissions.

**The Passing-on of Knowledge** Max Kreijn,2010-04-02 Assuming 'God' as in 'God will provide' is the biggest excuse used in the last two thousand years or more, Anthony Ramekin sets about using his extensive contacts in the art-world, which he has been part of for more than twenty five years, to facilitate the rise and rise of a brilliant young photographer, Dorian Grey, his lover . Soon he realizes that the knowledge he is passing on, comes in equal measurements to the wisdom, love and fast mind of someone so much younger than himself. As Oscar Wilde so famously said: 'I'm not young enough to know everything...' Scandal, sets off a useful precedent for the people's interest in imagery, which somehow strikes a chord deep in their hearts. This is, after all, a love story, set in some of the world's great cities and Grand Hotels. The 'Hotel de l'Europe' in Amsterdam, the 'Cloitre de St.Louis' in Avignon, the 'Grand Hotel Wagner' in Palermo, The 'Hotel des Bains' in Venice. Berlin, London, Cordoba in Southern Spain, Monreale in Sicily and Bangkok all pass by. 'Recognizing fresh talent is not an act of abuse, ' Anthony is heard to say at some press-conference, beleaguered by tabloid scribblers, 'but can be gentle and enrich everybody's life.' Soon Dorian is working on his second book of photographs, cataloguing first love between two under-aged boys, with two of Luchino Visconti's most famous films, 'The Leopard' and 'Death in Venice' as background. Again Anthony is facilitating this new love-affair, which takes on an integral part of the story. Soon they realize they have a worldwide best-seller on their hands.

**Accuracy Requirements and Uncertainties in Radiotherapy** International Atomic Energy Agency,2017-04-12 Accuracy requirements in radiation oncology have been defined in multiple publications; however, these have been based on differing radiation technologies. In the meantime, the uncertainties in radiation dosimetry reference standards have been reduced and more detailed patient outcome data are available. No comprehensive literature on accuracy and uncertainties in radiotherapy has been published so far. The IAEA has therefore developed a new international consensus document on accuracy requirements and uncertainties in radiation therapy, to promote safer and more effective patient treatments. This publication addresses accuracy and

uncertainty issues related to the vast majority of radiotherapy departments including both external beam radiotherapy and brachytherapy. It covers clinical, radiobiological, dosimetric, technical and physical aspects.

**A Textbook of Clinical Embryology** Eliezer Girsh,2021-05-06 Personnel working in assisted reproductive technology often lack the opportunities for dedicated training in the specialized techniques and technologies required for the procedures. As such, success in the form of live birth rates can range from over 50% to less than 10% per treatment cycle. This comprehensive introductory textbook is an essential resource for trainee embryologists, medical students and nurses. The recent revolutions in biotechnology and molecular biology involved in delivering assisted reproductive services are thoroughly discussed. Basic knowledge such as the development and physiology of both male and female reproductive systems is covered, with practical aspects of IVF including gamete and embryo manipulation, cryopreservation and genetic testing explained in detail. A full description of the optimal structure and management of the IVF laboratory is given, helping ensure procedures are safe and effective. Extensive and highly detailed colour illustrations bring the content to life and aids readers in their understanding.
