Engineering Unesco,2010-01-01 This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

The Island Maneskootuk Carolyn G. Scofield,2008 Maneskootuk Island lies prominently in the eastern part of Maines ten-square-mile Rangeley Lake, in one of the state's most beautiful vacation regions, the western mountains. The pristine island has had a colorful, lively history that is lovingly-and candidly-recounted by the woman who holds the current deed, Carolyn Garrigues Scofield. The Island Maneskootuk includes accounts of the historic island's flora and fauna, its various boats, old and new structures, gardens, and countless resident and local characters. There are colorful accounts by the author and her family and visitors, as well as the descendants of early Maneskootuk residents, describing life on the island through many decades, llustrated throughout by fifty pages of historic and family photos. Setting the tone for The Island Maneskootuk is the author's heartfelt approach to the island treasure that has meant so much to her, her family and now her grandchildren. The Dicksons built their big house and lived in splendor, the public rented accommodations on the island when Dr.Clough invited physicians, the Persians turned the island into a mini-principality, and then we, the Scofields stepped ashore. We stepped foot on our Maneskootuk in late afternoon. The grass was at least a foot high, and the dandelions blazed at their peak. The sun was still hot and everything was still. We marveled at this place, this magical land, and began immediately to bask in the peace and serenity of our island home. Our Maneskootuk adventure was about to begin.

Neuroeconomics of Prosocial Behavior Carolyn Declerck,Christophe Boone,2015-08-21 This summary of recent research in neuroeconomics aims to explain how and why a person can sometimes be generous, helpful, and cooperative, yet other times behave in a self-interested and/or exploitative manner. The book explains a dual process of analysis measuring immediate needs of the individual, relative to long term gains possible through prosocial behavior (e.g. synergy, accumulating profits, (in)direct reciprocity) with the output further mitigated by the motivation of the individual at that moment and any special circumstances of the environment. Ultimately it can be shown that prosocial behavior can be economically rational. Yet even when individuals are intrinsically motivated to act prosocially, they are also able to reverse this behavior when they sense it is no longer adaptive. The book will further explore individual differences in prosocial behavior, the development of prosocial behavior, and how a personal neural signature forms that facilitates or hampers cooperation. The book includes

game theory research, neuroimaging studies, and research in traditional cognitive psychology to better understand human decision-making re prosocial behavior. This will be of interest to cognitive, developmental, and social psychologists, as well as neuroscientists, and behavioral economists. Explores: Individual differences in prosocial behavior, The development of prosocial behavior, How a personal neural signature forms that facilitates or hampers cooperation Includes: Game theory research, Neuroimaging studies, Research in traditional cognitive psychology

Managing for Stakeholders R. Edward Freeman, Jeffrey S. Harrison, Andrew C. Wicks, 2007-01-01 Managing for Stakeholders: Survival, Reputation, and Success, the culmination of twenty years of research, interviews, and observations in the workplace, makes a major new contribution to management thinking and practice. Current ways of thinking about business and stakeholder management usually ask the Value Allocation Question: How should we distribute the burdens and benefits of corporate activities among stakeholders? Managing for Stakeholders, however, helps leaders develop a mindset that instead asks the Value Creation Question: How can we create as much value as possible for all of our stakeholders? Business is about how customers, suppliers, employees, financiers (stockholders, bondholders, banks, etc.), communities, the media, and managers interact and create value. World-renowned management scholar R. Edward Freeman and his coauthors outline ten concrete principles and seven practical techniques for managing stakeholder relationships in order to ensure a firm's survival, reputation, and success. Managing for Stakeholders is a revolutionary book that will change not only how managers do business but also how they recognize and evaluate business opportunities that would otherwise be invisible.

**Tectonic Evolution, Collision, and Seismicity of Southwest Asia** Rasoul Sorkhabi, 2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding, large-magnitude earthquakes, volcanic landscapes, petroliferous foreland basins, historical civilizations as well as geologic outcrops that display the protracted and complex 540 m.y. stratigraphic record of Earth's Phanerozoic Era. Emerged from the birth and demise of the Paleo-Tethys and Neo-Tethys oceans, southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia-Arabia continental plates. The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros, Alborz, Caucasus, Taurus, and Pontic mountains; the region also includes the strategic marine domains of the Persian Gulf, Gulf of Oman, Caspian, and Mediterranean.

This 19-chapter volume, published in honor of Manuel Berberian, a preeminent geologist from the region, brings together a wealth of new data, analyses, and frontier research on the geologic evolution, collisional tectonics, active deformation, and historical and modern seismicity of key areas in southwest Asia.

**Judeans in Babylonia** Tero Alstola, 2020 In *Judeans in Babylonia*, Tero Alstola presents a comprehensive investigation of deportees in the sixth and fifth centuries BCE. By using cuneiform documents as his sources, he offers the first book-length social historical study of the Babylonian Exile, commonly regarded as a pivotal period in the development of Judaism. The results are considered in the light of the wider Babylonian society and contrasted against a comparison group of Neirabian deportees. Studying texts from the cities and countryside and tracking developments over time, Alstola shows that there was notable diversity in the Judeans' socio-economic status and integration into Babylonian society.

*Mesopotamia* K. R. Veenhof, Jesper Eidem, 2008 Der erste Teil bietet eine kritische Gesamtschau unseres Wissens und zugleich eine Einführung in das Studium der altassyrischen Epoche (die ersten beiden Jahrhunderte des 2. Jahrtausends), wie wir sie durch Entdeckungen in Assur und die Keilschriftarchive der altassyrischen Händler kennen, die in der Handelskolonie (genannt Karum) in der Unterstadt des alten Kanesh (moderne Kültepe) in Zentralanatolien lebten. Die ersten Kapitel bestimmen, was altassyrisch ist und analysieren die Chronologie und die verfügbaren archäologischen und schriftlichen Quellen. Darauf folgt eine kritische Darstellung der Veröffentlichungen zu den altassyrischen Quellen. Nach einem Abriss der Altassyrischen Geschichte folgt ein Überblick zur anatolischen Situation, der die Städte, lokale Herrscher und die rund vierzig altassyrischen Handelsniederlassungen in Nordmesopotamien und Anatolien behandelt. Ein eigenes Kapitel ist den wichtigen altassyrischen Handelsverträgen gewidmet. Der zweite Teil fasst die jüngsten Erkenntnisse zur Geschichte Nordsyriens zeitgleich mit der späten Phase des altassyrischen Handels zusammen. Der ausführlichen Untersuchung der Quellen ist ein Appendix der wichtigsten Texte beigelegt. Das Buch ist durch umfassende Indices erschlossen und enthält eine ausführliche Bibliographie.

**Psychiatry** Konstantinos N. Fountoulakis, 2021-11-26 This book was the end product of life experiences, thoughts and intellectual wanderings of the author, who through his career and for the last twenty years was always serving all the three aspects of a Psychiatrist: He is a clinician, a researcher and an academic teacher. The book includes a comprehensive history of Psychiatry since antiquity and until today, with an emphasis not only on main events but also specifically and with much detail and explanations, on the chain of events that led to a particular development. At the center of this work is the question 'What is mental illness?' and 'Does free will exist?'. These are questions which tantalize Psychiatrists, neuroscientists, psychologists, philosophers, patients and their families and the sensitive and educated lay persons alike. Thus, the book includes a comprehensive review and systematic elaboration on the definition and the concept of mental illness, a detailed discussion on the issue of free will as well as the state of the art of contemporary Psychiatry and the socio-political currents it has provoked. Finally the book includes a description of the academic, social and professional status of Psychiatry and Psychiatrists and a view of future needs and possible developments. A last moment addition was the chapter on conspiracy theories, as a consequence of the experience with the social media and the public response to the COVID-19 outbreak which coincided with the final stage of the preparation of the book. Their study is an excellent opportunity to dig deep into the relation among human psychology, mental health, the society and politics and to swim in intellectually dangerous waters.

*African Herbal Pharmacopoeia* Thomas Brendler, 2010 The African Herbal Pharmacopoeia (AfrHP) provides comprehensive, up to date botanical, commercial and phytochemical information on over fifty of the most important African medicinal plants. The technical data were made on plant samples sourced from across the continent. These monographs prepared by leading African scientists, have been reviewed by international experts. Additional data includes micro morphology of the plant material, distribution maps and TLC Chromatograms. These data are crucial for producers, collectors and traders in medicinal plants and extracts as well as researchers, manufacturers and practitioners. The scope, quality and standard of these herbal monographs are comparable to those prepared in Europe, North America and Asia. Whilst this is the very first edition, it is being proposed to proceed to a second edition, quickly, as more plant species will be covered.
