Dooble Tongue Jeffrey Skoblow,2001 'Dooble Tongue' is an imaginative meditation on Robert Burns and Scottish poetry, as well as a book that engages and contests the customary assumptions and practices of literary criticism. Beginning with an examination of two contemporary Scottish poets, W.N. Herbert and Robert Crawford, and moving back in time to the Scottish Modernist master Hugh MacDiarmid, then further back to Burns himself, the study of the Scottish tradition is situated in a broad historical context. The focus throughout is on language (particularly Scots), more broadly vernacular literature in relation to culturally elite literary and critical modes- as well as on questions of literary nationalism and the cultural politics of poetic discourse.

Overcome and Strive: Part I Matthew Magliocca,2017-10-12 There's never a dull moment at New Kapington High School. The students' test scores, the music programs, and the athletic program are all outstanding, and the teaching staff is, for the most part, exceptional-although some of them occasionally find themselves caught up in crazy controversies. Twenty-five-year-old English teacher Patricia Dooble is one of the cool faculty members. Although her behavior and clothing are a bit risqué, students know they can trust her. Another young teacher, Daniel Gardelo, runs a popular restaurant on the weekends. It's mid-May, and everyone is just trying to make it to the end of the term. But soon the school is embroiled in a series of wild events: a leaked sex video, an accidental pregnancy, a school shooting, a suicide by fire, and a bomb threat. There's no telling what will happen next. In this play as the school year winds down, teachers, students, and community members experience a variety of shocks, scandals, and tragedies.

SUPER SECRETO - The Third Epoch of Cryptography Theo Tenzer,2022-01-07 The global crisis of Privacy in the 21st century also includes discussions about the right to encryption and restrictions on so-called end-to-end encryption. In order to communicate confidentially and secure against eavesdropping, simple and practical encryption is required for everyone. But how can it be available to everyone? The magic of replacing legible characters with other apparently random and therefore illegible characters had been almost religious for centuries: only those initiated into the invention of a secret language could crack the messages. Encryption remained Super Secreto - Top Secret - Streng Geheim! In the age of smartphone and pocket computers, it is now available to everyone: ever more sophisticated math calculates the so-called cipher text with corresponding keys in our messengers. Both keys and encrypted text used to have to be transmitted to the recipient. In today's Epoch of Cryptography, the transmission of the keys is no longer necessary: The risky transport route for the keys can even be omitted! From the fascination of how Cryptography became abstinent in the transmission of keys - what effect it has on the desire of state agencies for secondary keys - and how multiple and exponential encryption makes resistant against the decryption-attempts of super-quantum-computers tells Theo Tenzer in this exciting political, technical and socially relevant innovation and science portrait on the Third Epoch of Cryptography.

King Henry IV Part 2 William Shakespeare,2016-07-28 More troubled and troubling than King Henry IV Part 1, the play continues the story of King Henry's decline and Hal's reform. Though Part 2 echoes the structure of the earlier play, it is a darker and more unsettling world, in which even Falstaff's revelry is more tired and

cynical, and the once-merry Hal sloughs off his tavern companions to become King Henry V. James C. Bulman's authoritative edition provides a wealth of incisive commentary on this complex history play.

Big Seven Study (2016): 7 open source Crypto-Messengers to be compared (English/Deutsch) David Adams,Ann-Kathrin Maier,2019-10-23 Provided with two columns in German & English Language / Zweispaltig in deutscher & englischer Sprache. BIG SEVEN STUDY about 7 open source Crypto-Messengers for Encryption at the Desktop: A contribution in the cryptographic-discussion - The two security researchers David Adams (Tokyo) and Ann-Kathrin Maier (Munich), who examined in their BIG SEVEN study seven well-known encryption applications for e-mail and instant messaging out of the open source area, performed then a deeper IT-audit for the acquainted software solution GoldBug.sf.net. The audit took into account the essential criteria, study fields and methods on the basis of eight international IT-audit manuals and was carried out in 20 dimensions. It identifies Ten Trends in the Crypto-Messaging. Security researcher David Adams from Tokyo about the published BIG SEVEN CRYPTO-study: We looked at the seven major open source programs for encrypted online-communication and identified ten trends in the Crypto-Messaging area. One of the important trends is the feature, that the users should be able to define a so-called end-to-end encrypting password by themselves manually. The software GoldBug - email client and instant messenger here was ahead with excellent results and is not only very trustworthy and compliant to international IT-audit manuals and safety standards, GoldBug also scores in comparison and in the evaluation of the single functions in much greater detail than the other comparable open source crypto messenger. Co-author of the study Ann-Kathrin Maier from Munich confirms: We have then our Messenger study deepened with a detailed audit of the crypto-program GoldBug, which received excellent results for encrypted email and secure online chat. By our code-reviews we can confirm the trustworthiness of this open source encryption in GoldBug. Numerous details have been analyzed by various methods, compared and also strategically evaluated by the two authors regarding the current encryption discussions. The comparatively studied applications include CryptoCat, GoldBug, OTR-XMPP clients such as Pidgin with the OTR-plugin, RetroShare and Signal, Surespot and Tox.

Existence is Elsewhen John Gribbin,Rhys Hughes,Christopher G. Nuttall,Douglas Thompson,J.A. Christy,Peter R. Ellis,Steve Harrison,Edwin Hayward,Stefan Jackson,Andy McKell,Siobhan McVeigh,Robin Moran,Ira Nayman,Susan Oke,Sanem Ozdural,Tanya Reimer,Chloe Skye,Tej Turner,Dave Weaver,Peter Wolfe,2016-03-18 The title, Existence is Elsewhen, paraphrases the last sentence of André Breton's 1924 Manifesto of Surrealism, perfectly summing up the intent behind this anthology of stories from a wonderful collection of authors. Different worlds... different times. It's what Elsewhen Press has been about since we launched our first title in 2011. Here, we present twenty science fiction stories for you to enjoy. We are delighted that headlining this collection is the fantastic John Gribbin, with a worrying vision of medical research in the near future. Future global healthcare is the theme of J A Christy's story; while the ultimate in spare part surgery is where Dave Weaver takes us. Edwin Hayward's search for a renewable protein source turns out to be digital; and Tanya Reimer's story with characters we think we know, gives us pause for thought about another food we take for granted. Evolution is examined too, with Andy McKell's chilling tale of what states could become if genetics are used to drive policy. Similarly, Robin Moran's story explores the societal impact of an undesirable evolutionary trend; while Douglas Thompson provides a truly surreal warning of an impending disaster that will reverse evolution, with dire consequences. On a lighter note, we have satire from Steve Harrison discovering who really owns the Earth (and why); and Ira Nayman, who uses the surreal alternative realities of his Transdimensional Authority series as the setting for a detective story mash-up of Agatha Christie and Dashiel Hammett. Pursuing the crime-solving theme, Peter Wolfe explores life, and death, on a space station; while Stefan Jackson follows a police investigation into some bizarre cold-blooded murders in a cyberpunk future. Going into the past, albeit an 1831 set in the alternate Britain of his Royal Sorceress series, Christopher G. Nuttall reports on an investigation into a girl with strange powers. Strange powers in the present-day is the theme for Tej Turner, who tells a poignant tale of how extra-sensory perception makes it easier for a husband to bear his dying wife's last few days. Difficult decisions are the theme of Chloe Skye's heart-rending story exploring personal sacrifice. Relationships aren't always so close, as Susan Oke's tale demonstrates, when sibling rivalry is taken to the limit. Relationships are the backdrop to Peter R. Ellis's story where a spectacular mid-winter event on a newly-colonised distant planet involves a Madonna and Child. Coming right back to Earth and in what feels like an almost imminent future, Siobhan McVeigh tells a cautionary tale for anyone thinking of using technology to deflect the blame for their actions. Building on the remarkable setting of Pera from her LiGa series, and developing Pera's legendary Book of Shadow, Sanem Ozdural spins the creation myth of the first light tree in a lyrical and poetic song. Also exploring language, the master of fantastika and absurdism, Rhys Hughes, extrapolates the way in which language changes over time, with an entertaining result.
