DOTS, LINES and BOXES Sweet Revenge®,2019-10-26 DOTS, LINES AND BOXES is a pencil-and-paper game usually for two players. It was first published in 1889 by French mathematician Édouard Lucas. It has gone by many names including the game of dots, dot to dot grid, boxes, and pigs in a pen. It is a simple game with an objective: the one that owns most of the boxes at the end of the game wins. You and your opponent take turns drawing horizontal or vertical lines to connect and close the square boxes. When someone draws a line that completes a square, write your initial inside to win the box. Once all the points have been connected and all the boxes have been closed, you can count the boxes of each player and know the winner. This notebook has 50 pages with templates for building square boxes, 30 pages with templates for triangular boxes and 20 pages with templates for hexagonal boxes.

Glaucoma Imaging Antonio Ferreras, 2015-10-21 This atlas offers a truly comprehensive update on the use of imaging technologies for the diagnosis and follow-up of glaucoma. In addition to standard automated perimetry, gonioscopy, fundus photography, and stereophotography, other advanced, high-resolution methods for imaging the eye in glaucoma are explained in detail, including ultrasound biomicroscopy, confocal scanning laser ophthalmoscopy, scanning laser polarimetry, and spectral domain optical coherence tomography. The role of the various tests and the keys to optimizing their use in clinical practice are detailed with the aid of high-quality figures in order to enable the reader to achieve the best possible performance when applying these tools. Personalized testing strategies and tailored therapeutic interventions are required to effectively reduce visual impairment due to glaucoma. Glaucoma Imaging will assist residents, researchers, and clinicians in improving their ability to understand and integrate the information obtained using traditional techniques with the reports provided by computer-assisted image instruments.
